STATE OF Missouri TOWN OF Saint Louis

I, Jacob F Acker, born in New York City
in the State of New York, aged Thirty three years,
and by occupation a Carpenter, Do HEREBY ACKNOWLEDGE to have
volunteered this Twenty Seventh day of August, 1864
to serve as a *Soldier* in the Army of the United States of America, for
the period of ~~THREE YEARS~~ one year, unless sooner discharged by proper authority:
Do also agree to accept such bounty, pay, rations, and clothing, as are, or may be,
established by law for volunteers. And I, Jacob F Acker, do
solemnly swear, that I will bear true faith and allegiance to the *United States*
of America, and that I will serve them honestly and faithfully against all
their enemies or opposers whomsoever; and that I will observe and obey the
orders of the President of the United States, and the orders of the officers
appointed over me, according to the Rules and Articles of War.

MODE OF EXAMINING A RECRUIT.

(From Tripler's Manual.)

"The Room in which this examination is conducted should be well lighted and large enough to admit of the men being walked about freely, that every organ concerned in locomotion may be subjected to inspection. For obvious reasons none others than they whose presence is absolutely required, should be admitted to the room."

"The person of the Recruit should be washed clean before he is presented to the Surgeon for inspection. It is impossible for the medical officer to ascertain the existence of certain defects that *absolutely disqualify*, when concealed, as they effectually may be, and sometimes are, by incrustations of dirt a month old."

"We have remarked that certain defects can be ascertained only by questioning the man himself, and that, in order to avoid all subsequent evasions, the answers to these questions should be recorded on the spot. We shall now suggest a method of effecting this object as well as of making it sure that no important part shall escape inspection through any slip of the memory."

"The Questions should be asked and the man's answers recorded before he is stripped."

"He is then to be divested of *all* his clothing and the examination proceeded with systematically, in the order of regions as indicated in the 'Form.'"

"The Surgeon is to note every peculiarity or deviation from the normal Standard in each particular region. For example: If the man has received at any time a blow upon the head with a resulting cicatrix or slight depression, let it be noted thus: 'Cicatrix and slight depression upon the right parietal protuberance.'"

"Scars upon any part of the person should be noted, and the cause assigned by the man, recorded. It is not uncommon to find marks of free cupping upon the chests of Germans, without there being any indication of disease. These however should be noted."

"If, upon inspection, the man be found to have a Circocele, though not sufficient to disqualify, let it be noted under the proper head; and so of Hæmorrhoids or any other affection. The vaccine scar and its position should be noted, and whether vaccination has been practised at the rendezvous or depot."

"Under the head of 'Remarks,' Constitutional Syphilis, or other Cachexia, will find a place. If an interpreter is required during the inspection, that fact should be recorded. Men sometimes speak English very well when first examined, who, from after considerations, are entirely ignorant of the language when re-examined, and sometimes succeed in obtaining a discharge in this way."

"By this means an accurate description of the whole person is obtained, sufficient to settle questions of identity, should such be subsequently raised; and if there be any defects about which a difference of opinion may exist, the fact that such defects were not overlooked by the first inspecting Surgeon, will be apparent."

"It will frequently happen that an 'absolute disqualification' will be discovered before completing the examination. Such a defect may be detected at any stage of the inspection. In such cases it will of course be unnecessary to proceed any further."

"The above Form, when filled up, should be sent with the Recruit to the Depot where he is to be finally inspected, and thence transmitted to the Regiment to which he may be assigned."

"Defects discovered at the Depot upon reinspection should be endorsed upon the Form, and signed by the Surgeon; in case of Rejection, the documents thus completed should be transmitted with the proceedings of the Board of Inspection to the Adjutant General of the Army."

NOTE 1.—This blank will be used for both enlistments and re-enlistments—enlistment of veterans, &c., in the volunteer service. They will be made out in duplicate in all cases—one to accompany the recruiting return of the superintendent (not the recruiting officer) to the Adjutant General, and one to accompany the accounts of the officer who pays bounty, &c. The Regiment and Company in which the soldier last served should be given in the blank.

NOTE 2.—An enlistment holds to service. A muster-in roll must, in all cases, be filed in the Adjutant General's Office as evidence of muster. The mustering officer, or assistant commissary of musters, as the case may be, will countersign both enlistments as having discovered the soldier into the service of the United States. A copy of them is given to the discharging officer.

MODE OF EXAMINING A RECRUIT.

(From Tripler's Manual.)

"The Room in which the examination is conducted should be well lighted and large enough to admit of the men being walked about freely, that every organ concerned in locomotion may be subjected to inspection. For obvious reasons, none others than they whose presence is absolutely required, should be admitted to the room."

"The person of the Recruit should be washed *clean* before he is presented to the Surgeon for inspection. It is impossible for the medical officer to ascertain the existence of certain defects that *absolutely disqualify*, when concealed, as they effectually may be, and sometimes are, by incrustations of filth a month old."

"We have remarked that certain defects can be ascertained only by questioning the man himself, and that, in order to avoid all subsequent evasions, the answers to these questions should be recorded on the spot. We shall now suggest a method of effecting this object as well as of making it sure that no important part shall escape inspection through any slip of the memory."

"The Questions should be asked and the man's answers recorded before he is stripped."

"He is then to be divested of *all* his clothing and the examination proceeded with systematically, in the order of regions as indicated in the 'Form.'"

"The Surgeon is to note every peculiarity or deviation from the normal Standard in each particular region. For example: If the man has received at any time a blow upon the head with a resulting cicatrix or slight depression, let it be noted thus: 'Cicatrix and slight depression upon the right parietal protuberance.'"

"Scars upon any part of the person should be noted, and the cause assigned by the man, recorded. It is not uncommon to find marks of free cupping upon the chests of Germans, without there being any indication of disease. These however should be noted."

"If, upon inspection, the man be found to have a Circocele, though not sufficient to disqualify, let it be noted under the proper head; and so of Hæmorrhoids or any other affection. The vaccine scar and its position should be noted, and whether vaccination has been practised at the rendezvous or depot."

"Under the head of 'Remarks,' Constitutional Syphilis, or other Cachexia, will find a place. If an interpreter is required during the inspection, that fact should be recorded. Men sometimes speak English very well when first examined, who, from after considerations, are entirely ignorant of the language when re-examined, and sometimes succeed in obtaining a discharge in this way."

"By this means an accurate description of the whole person is obtained, sufficient to settle questions of identity, should such be subsequently raised; and if there be any defects about which a difference of opinion may exist, the fact that such defects were not overlooked by the first inspecting Surgeon, will be apparent."

"It will frequently happen that an 'absolute disqualification' will be discovered before completing the examination. Such a defect may be detected at any stage of the inspection. In such cases it will of course be unnecessary to proceed any further."

"The above Form, when filled up, should be sent with the Recruit to the Depot where he is to be finally inspected, and thence transmitted to the Regiment to which he may be assigned."

"Defects discovered at the Depot upon reinspection should be endorsed upon the Form, and signed by the Surgeon; in case of Rejection, the document thus completed should be transmitted with the proceedings of the Board of Inspection to the Adjutant General of the Army."

"The Questions should be asked and the man's answers recorded before he is stripped."

"He is then to be divested of *all* his clothing and the examination proceeded with systematically, in the order of regions as indicated in the 'Form.'"

"The Surgeon is to note every peculiarity or deviation from the normal Standard in each particular region. For example: If the man has received at any time a blow upon the head with a resulting cicatrix or slight depression, let it be noted thus: 'Cicatrix and slight depression upon the right parietal protuberance.'"

"Scars upon any part of the person should be noted, and the cause assigned by the man, recorded. It is not uncommon to find marks of free cupping upon the chests of Germans, without there being any indication of disease. These however should be noted."

"If, upon inspection, the man be found to have a Circocele, though not sufficient to disqualify, let it be noted under the proper head; and so of Hæmorrhoids or any other affection. The vaccine scar and its position should be noted, and whether vaccination has been practised at the rendezvous or depot."

"Under the head of 'Remarks,' Constitutional Syphilis, or other Cachexia, will find a place. If an interpreter is required during the inspection, that fact should be recorded. Men sometimes speak English very well when first examined, who, from after considerations, are entirely ignorant of the language when re-examined, and sometimes succeed in obtaining a discharge in this way."

"By this means an accurate description of the whole person is obtained, sufficient to settle questions of identity, should such be subsequently raised; and if there be any defects about which a difference of opinion may exist, the fact that such defects were not overlooked by the first inspecting Surgeon, will be apparent."

"It will frequently happen that an 'absolute disqualification' will be discovered before completing the examination. Such a defect may be detected at any stage of the inspection. In such cases it will of course be unnecessary to proceed any further."

"The above Form, when filled up, should be sent with the Recruit to the Depot where he is to be finally inspected, and thence transmitted to the Regiment to which he may be assigned."

"Defects discovered at the Depot upon reinspection should be endorsed upon the Form and signed by the Surgeon; in case of Rejection, the document thus completed should be transmitted with the proceedings of the Board of Inspection to the Adjutant General of the Army."

MODE OF EXAMINING A RECRUIT.

(From Tripler's Manual.)

"The Room in which this examination is conducted should be well lighted and large enough to admit of the men being walked about freely, that every organ concerned in locomotion may be subjected to inspection. For obvious reasons, none others than they whose presence is absolutely required, should be admitted to the room."

"The person of the Recruit should be washed *clean* before he is presented to the Surgeon for inspection. It is impossible for the medical officer to ascertain the existence of certain defects that *absolutely disqualify*, when concealed, as they effectually may be, and sometimes are, by incrustations of filth a month old."

"We have remarked that certain defects can be ascertained only by questioning the man himself, and that, in order to avoid all subsequent evasions, the answers to these questions should be recorded on the spot. We shall now suggest a method of effecting this object as well as of making it sure that no important part shall escape inspection through any slip of the memory."

"The Questions should be asked and the man's answers recorded before he is stripped."

"He is then to be divested of *all* his clothing and the examination proceeded with systematically, in the order of regions as indicated in the 'Form.'"

"The Surgeon is to note every peculiarity or deviation from the normal Standard in each particular region. For example: If the man has received at any time a blow upon the head with a resulting cicatrix or slight depression, let it be noted thus: 'Cicatrix and slight depression upon the right parietal protuberance.'"

"Scars upon any part of the person should be noted, and the cause assigned by the man, recorded. It is not uncommon to find marks of free cupping upon the chests of Germans, without there being any indication of disease. These however should be noted."

"If, upon inspection, the man be found to have a Cirsocele, though not sufficient to disqualify, let it be noted under the proper head; and so of Hemorrhoids or any other affection. The vaccine scar and its position should be noted, and whether vaccination has been practised at the rendezvous or depot."

"Under the head of 'Remarks' Constitutional Syphilis, or other Cachexia, will find a place. If an interpreter is required during the inspection, fact should be recorded. Men sometimes speak English very well when first [illegible]. From after considerations, are entirely ignorant of the language when re-examined, and sometimes succeed in obtaining a discharge in [illegible]."

"By this means an accurate description of the whole person is obtained, sufficient to settle questions of identity, should such be subsequently raised; and if there be any defects about which a difference of opinion may exist, the fact that such defects were not overlooked by the [illegible] Surgeon, will be apparent."

"It will frequently happen that an 'absolute disqualification' will be discovered before completing the examination. Such a defect may be detected at any stage of the inspection. In such cases it will of course be unnecessary to proceed any further."

"The above Form, when filled up, should be sent with the Recruit to the Depot where he is to be finally inspected, and thence transmitted to the Regiment to which he may be assigned."

"Defects discovered at the Depot upon reinspection should be entered upon this Form, and signed by the Surgeon; in case of Rejection, this document alone would suffice, and should be transmitted with the proceedings of the Board of Inspection to the Adjutant General of the Army."

NOTE 1.—This blank will be used for both enlistments and re-enlistments—enlistment of veterans, &c., &c., in the volunteer service. They will be made out in duplicate in all cases—one to accompany the recruiting return of the superintendent (not the recruiting officer) to the Adjutant General, and one to accompany the accounts of the officer who pays bounty, &c. The Regiment and Company in which the soldier last served should be given on the back.

NOTE 2.—An enlistment holds to service. A muster-in must, in all cases, precede payment of pay, bounty, pension, &c. A muster-in roll must, in all cases, be filed in the Adjutant General's Office as evidence of muster-in. The mustering officer, commissary, or assistant commissary of musters, as the case may be, will countersign both enlistments as having mustered the soldier into the service of the United States before either of them is given to the disbursing officer.

VOLUNTEER ENLISTMENT.

STATE OF Missouri TOWN OF St Louis

I, John M. Allen, born in Monroe Point in the State of Wisconsin, aged 23 years, and by occupation a Steamboatman Do HEREBY ACKNOWLEDGE to have volunteered this 16th day of August, 1864, to serve as a **Soldier** in the **Army of the United States of America**, for the period of ~~THREE~~ one YEARS, unless sooner discharged by proper authority. Do also agree to accept such bounty, pay, rations, and clothing, as are, or may be established by law for volunteers. And I, John M Allen, do solemnly swear, that I will bear true faith and allegiance to the ***United States of America***, and that I will serve them honestly and faithfully against all their enemies or opposers whomsoever; and that I will observe and obey the orders of the President of the United States, and the orders of the officers appointed over me, according to the Rules and Articles of War.

Sworn and subscribed to, at St Louis Mo this 16th day of August, 1864. John M Allen

BEFORE M. Greene Lieut Recruiting Officer.

I CERTIFY, ON HONOR, That I have carefully examined the above-named Volunteer, agreeably to the General Regulations of the Army, and that, in my opinion, he is free from all bodily defects and mental infirmity, which would in any way disqualify him from performing the duties of a soldier.

EXAMINING SURGEON.

I CERTIFY, ON HONOR, That I have minutely inspected the Volunteer John M. Allen previously to his enlistment, and that he was entirely sober when enlisted; that, to the best of my judgment and belief, he is of lawful age; and that, in accepting him as duly qualified to perform the duties of an able-bodied soldier, I have strictly observed the Regulations which govern the recruiting service. This soldier has blue *eyes*, dark *hair*, dark *complexion*, is five *feet* three *inches* high.

MODE OF EXAMINING A RECRUIT.

(From Tripler's Manual.)

"The Room in which this examination is conducted should be well lighted and large enough to admit of the men being walked about freely, that every organ concerned in locomotion may be subjected to inspection. For obvious reasons, none others than they whose presence is absolutely required, should be admitted to the room."

"The person of the Recruit should be washed *clean* before he is presented to the Surgeon for inspection. It is impossible for the medical officer to ascertain the existence of certain defects that *absolutely disqualify*, when concealed, as they effectually may be, and sometimes are, by incrustations of filth a month old."

"We have remarked that certain defects can be ascertained only by questioning the man himself, and that, in order to avoid all subsequent evasions, the answers to these questions should be recorded on the spot. We shall now suggest a method of effecting this object as well as of making it sure that no important part shall escape inspection through any slip of the memory."

"The Questions should be asked and the man's answers recorded before he is stripped."

"He is then to be divested of *all* his clothing and the examination proceeded with systematically, in the order of regions as indicated in the 'Form.'"

"The Surgeon is to note every peculiarity or deviation from the normal Standard in each particular region. For example: If the man has received at any time a blow upon the head with a resulting cicatrix or slight depression, let it be noted thus: 'Cicatrix and slight depression upon the right parietal protuberance.'"

"Scars upon any part of the person should be noted, and the cause assigned by the man, recorded. It is not uncommon to find marks of free cupping upon the chests of Germans, without there being any indication of disease. These however should be noted."

"If, upon inspection, the man be found to have a Circocele, though not sufficient to disqualify, let it be noted under the proper head; and so of Hæmorrhoids or any other affection. The vaccine scar and its position should be noted, and whether vaccination has been practised at the rendezvous or depot."

"Under the head of 'Remarks,' Constitutional Syphilis, or other Cachexia will find a place. If an interpreter is required during the inspection, the fact should be recorded. Men sometimes speak English very well when first examined, who, from after considerations, are entirely ignorant of the language when re-examined, and sometimes succeed in obtaining a discharge in this way."

"In this means an accurate description of the whole person is obtained sufficient to settle questions of identity, should such be subsequently raised. And where there be any defects about which a difference of opinion may exist, the fact that such defects were not overlooked by the first inspecting Surgeon will be apparent."

"It will frequently happen that an 'absolute disqualification' will be discovered before completing the examination. Such a defect may be detected at any stage of the inspection. In such cases it will of course be unnecessary to proceed any further."

"The above Form, when filled up, should be sent with the Recruit to the Depot where he is to be finally inspected, and thence transmitted to the Regiment to which he may be assigned."

"Defects discovered at the Depot upon reinspection should be endorsed upon the Form, and signed by the Surgeon; in case of Rejection, the document thus completed should be transmitted with the proceedings of the Board of Inspection to the Adjutant General of the Army."

I have the honor to request that you grant me leave of absence for one day to visit Alton, Ills., on business connected with this Prison.

I have in my possession a sum of money belonging to certain prisoners in the Mil Prison at Alton, who were transferred from this prison.

I have written to the Comdg. Officer at the Alton Prison twice, but I find that it will be necessary for me to go to Alton, in order to have this matter satisfactorily arranged.

I have also the honor to request that you send me a permit to visit the Prison at Alton.

MODE OF EXAMINING A RECRUIT.

(From Tripler's Manual.)

"The Room in which this examination is conducted should be well lighted and large enough to admit of the men being walked about freely, that every organ concerned in locomotion may be subjected to inspection. For obvious reasons, none others than they whose presence is absolutely required, should be admitted to the room."

"The person of the Recruit should be washed *clean* before he is presented to the Surgeon for inspection. It is impossible for the medical officer to ascertain the existence of certain defects that *absolutely disqualify*, when concealed, as they effectually may be, and sometimes are, by incrustations of filth a month old."

"We have remarked that certain defects can be ascertained only by questioning the man himself, and that, in order to avoid all subsequent evasions, the answers to these questions should be recorded on the spot. We shall now suggest a method of effecting this object as well as of making it sure that no important part shall escape inspection through any slip of the memory."

"The Questions should be asked and the man's answers recorded before he is stripped."

"He is then to be divested of *all* his clothing and the examination proceeded with systematically, in the order of regions as indicated in the 'Form.'"

"The Surgeon is to note every peculiarity or deviation from the normal Standard in each particular region. For example: If the man has received at any time a blow upon the head with a resulting cicatrix or slight depression, let it be noted thus: 'Cicatrix and slight depression upon the right parietal protuberance.'"

"Scars upon any part of the person should be noted, and the cause assigned by the man, recorded. It is not uncommon to find marks of free cupping upon the chests of Germans, without there being any indication of disease. These however should be noted."

"If, upon inspection, the man be found to have a Circocele, though not sufficient to disqualify, let it be noted under the proper head; and so of Hæmorrhoids or any other affection. The vaccine scar and its position should be noted, and whether vaccination has been practised at the rendezvous or depot."

"Under the head of 'Remarks,' Constitutional Syphilis, or other Cachexia, will find a place. If an interpreter is required during the inspection, that fact should be recorded. Men sometimes speak English very well when first examined, who, from after considerations, are entirely ignorant of the language when re-examined, and sometimes succeed in obtaining a discharge in this way."

"By this means an accurate description of the whole person is obtained, sufficient to settle questions of identity, should such be subsequently raised; and if there be any defects about which a difference of opinion may exist, the fact that such defects were not overlooked by the first inspecting Surgeon, will be apparent."

"It will frequently happen that an 'absolute disqualification' will be discovered before completing the examination. Such a defect may be detected at any stage of the inspection. In such cases it will of course be unnecessary to proceed any further."

"The above Form, when filled up, should be sent with the Recruit to the Depot where he is to be finally inspected, and thence transmitted to the Regiment to which he may be assigned."

"Defects discovered at the Depot upon reinspection should be endorsed upon the Form, and signed by the Surgeon; in case of Rejection, the document thus completed should be transmitted with the proceedings of the Board of Inspection to the Adjutant General of the Army."

NOTE 1.—This blank will be used for both enlistments and re-enlistments—enlistment of veterans, &c., &c., in the volunteer service. They will be made out in duplicate in all cases—one to accompany the recruiting return of the superintendent (not the recruiting officer) to the Adjutant General, and one to accompany the accounts of the officer who pays bounty, &c. The Regiment and Company in which the soldier last served should be given on the back.

NOTE 2.—An enlistment holds to service. A muster-in must, in all cases, precede payment of pay, bounty, pension, &c. A muster-in roll must, in all cases, be filed in the Adjutant General's Office as evidence of muster-in. The mustering officer, commissary, or assistant commissary of musters, as the case may be, will countersign both enlistments as having mustered the soldier into the service of the United States before either of them is given to the disbursing officer.

DECLARATION OF VOLUNTEER

VOLUNTEER ENLISTMENT.

STATE OF Missouri TOWN OF St Louis

I, Henry Umbing, born in Germany in the State of Missouri, aged 18 years, and by occupation a Cigarmaker, Do HEREBY ACKNOWLEDGE to have volunteered this 22nd day of August, 1864, to serve as a **Soldier** in the **Army of the United States of America**, for the period of ~~THREE YEARS~~ One Year, unless sooner discharged by proper authority: Do also agree to accept such bounty, pay, rations, and clothing, as are, or may be, established by law for volunteers. And I, Henry Umbing, do solemnly swear, that I will bear true faith and allegiance to the ***United States of America***, and that I will serve them honestly and faithfully against all their enemies or opposers whomsoever; and that I will observe and obey the orders of the President of the United States, and the orders of the officers appointed over me, according to the Rules and Articles of War.

Sworn and subscribed to at St Louis Mo this 22nd day of August, 1864 Before John C. Cummings Late Justice of the Peace

H Umbing

I CERTIFY, ON HONOR, That I have carefully examined the above-named Volunteer, agreeably to the General Regulations of the Army, and that, in my opinion, he is free from all bodily defects and mental infirmity, which would in any way disqualify him from performing the duties of a soldier.

EXAMINING SURGEON.

I CERTIFY, ON HONOR, That I have minutely inspected the Volunteer Henry Umbing previously to his enlistment, and that he was entirely sober when enlisted; that, to the best of my judgment and belief, he is of lawful age; and that, in accepting him as duly qualified to perform the duties of an able-bodied soldier, I have strictly observed the Regulations which govern the recruiting service. This soldier has Blue eyes, Brown hair, fair complexion, is 5 feet 3 inches high.

MODE OF EXAMINING A RECRUIT.

(From Tripler's Manual.)

"The Room in which this examination is conducted should be well lighted and large enough to admit of the men being walked about freely, that every organ concerned in locomotion may be subjected to inspection. For obvious reasons, none others than they whose presence is absolutely required, should be admitted to the room."

"The person of the Recruit should be washed *clean* before he is presented to the Surgeon for inspection. It is impossible for the medical officer to ascertain the existence of certain defects that *absolutely disqualify*, when concealed, as they effectually may be, and sometimes are, by incrustations of filth a month old."

"We have remarked that certain defects can be ascertained only by questioning the man himself, and that, in order to avoid all subsequent evasions, the answers to these questions should be recorded on the spot. We shall now suggest a method of effecting this object as well as of making it sure that no important part shall escape inspection through any slip of the memory."

"The Questions should be asked and the man's answers recorded before he is stripped."

"He is then to be divested of *all* his clothing and the examination proceeded with systematically, in the order of regions as indicated in the 'Form.'"

"The Surgeon is to note every peculiarity or deviation from the normal Standard in each particular region. For example: If the man has received at any time a blow upon the head with a resulting cicatrix or slight depression, let it be noted thus: 'Cicatrix and slight depression upon the right parietal protuberance.'"

"Scars upon any part of the person should be noted, and the cause assigned by the man, recorded. It is not uncommon to find marks of free cupping upon the chests of Germans, without there being any indication of disease. These however should be noted."

"If, upon inspection, the man be found to have a Circocele, though not sufficient to disqualify, let it be noted under the proper head; and so of Hæmorrhoids or any other affection. The vaccine scar and its position should be noted, and whether vaccination has been practised at the rendezvous or depot."

"Under the head of 'Remarks,' Constitutional Syphilis, or other Cachexia, will find a place. If an interpreter is required during the inspection, that fact should be recorded. Men sometimes speak English very well when first examined, who, from after considerations, are entirely ignorant of the language when re-examined, and sometimes succeed in obtaining a discharge in this way."

"By this means an accurate description of the whole person [illegible] sufficient to settle questions of identity, should such be subsequently raised; and if there be any defects about which a difference of opinion may exist, the fact that such defects were not overlooked by the first inspecting Surgeon, will be apparent."

"It will frequently happen that an 'absolute disqualification' will be discovered before completing the examination. Such a defect may be detected at any stage of the inspection. In such case it will of course be unnecessary to proceed any further."

"The above Form, when filled up, should be sent with the Recruit to the Depot where he is to be finally inspected, and thence transmitted to the Regiment to which he may be assigned."

"Defects discovered at the Depot upon reinspection should be endorsed upon the Form, and signed by the Surgeon; in case of Rejection, the document thus completed should be transmitted with the proceedings of the Board of Inspection to the Adjutant General of the Army."

2d enlistment; last served in Company (T)

Por Reg't of Lazarus Dodds Light Art.

Discharged July 5th, 1862

NOTE 1.—This blank will be used for both enlistments and re-enlistments—enlistment of veterans, &c., &c., in the volunteer service. They will be made out in duplicate in all cases—one to accompany the recruiting return of the superintendent (not the recruiting officer) to the Adjutant General, and one to accompany the accounts of the officer who pays bounty, &c. The Regiment and Company in which the soldier has served last should be given on the back.

NOTE 2.—An enlistment holds to service. An enlistment cannot be set aside after payment of pay, bounty, pension, &c. A muster-in roll must, in all cases, be filed in the Adjutant General's Office as evidence of muster. A muster-in roll is necessary, or assistant commissary of musters, as the case may be, will countersign both enlistments as having mustered the soldier into the service of the United States. Before either of them is given to the disbursing officer.

VOLUNTEER ENLISTMENT.

STATE OF Missouri TOWN OF St Louis

I, Oscar M. Smith, born in Connecticut in the State of New York, aged twenty eight years, and by occupation a School teacher. Do HEREBY ACKNOWLEDGE to have volunteered this twenty fifth day of August, 1864, to serve as a **Soldier** in the **Army of the United States of America**, for the period of ~~THREE~~ ONE YEAR, unless sooner discharged by proper authority: Do also agree to accept such bounty, pay, rations, and clothing, as are, or may be, established by law for volunteers. And I, Oscar M. Smith, do solemnly swear, that I will bear true faith and allegiance to the ***United States of America***, and that I will serve them honestly and faithfully against all their enemies or opposers whomsoever; and that I will observe and obey the orders of the President of the United States, and the orders of the officers appointed over me, according to the Rules and Articles of War.

Sworn and subscribed to at St Louis, Mo this 25th day of August, 1864, BEFORE M. Rans 2nd Lieut. & Recruiting Officer.

Oscar M. Smith

I CERTIFY, ON HONOR, That I have carefully examined the above-named Volunteer, agreeably to the General Regulations of the Army, and that, in my opinion, he is free from all bodily defects and mental infirmity, which would in any way disqualify him from performing the duties of a soldier.

H. Judd Asst. Surg. 40th Mo. Vols.

EXAMINING SURGEON.

I CERTIFY, ON HONOR, That I have minutely inspected the Volunteer O. M. Smith previously to his enlistment, and that he was entirely sober when enlisted; that, to the best of my judgment and belief, he is of lawful age; and that, in accepting him as duly qualified to perform the duties of an able-bodied soldier, I have strictly observed the Regulations which govern the recruiting service. This soldier has blue eyes, dark hair, dark complexion, is 5 feet 10 inches high.

M. Rans 2nd Lieut.

RECRUITING OFFICER.

(A. G. O. No. 74 & 76.)

MODE OF EXAMINING A RECRUIT.

(From Tripler's Manual.)

"The Room in which this examination is conducted should be well lighted and large enough to admit of the men being walked about freely, that every organ concerned in locomotion may be subjected to inspection. For obvious reasons, none others than they whose presence is absolutely required, should be admitted to the room."

"The person of the Recruit should be washed *clean* before he is presented to the Surgeon for inspection. It is impossible for the medical officer to ascertain the existence of certain defects that *absolutely disqualify*, when concealed, as they effectually may be, and sometimes are, by incrustations of filth a month old."

"We have remarked that certain defects can be ascertained only by questioning the man himself, and that, in order to avoid all subsequent evasions, the answers to these questions should be recorded on the spot. We shall now suggest a method of effecting this object as well as of making it sure that no important part shall escape inspection through any slip of the memory."

"The Questions should be asked and the man's answers recorded before he is stripped."

"He is then to be divested of *all* his clothing and the examination proceeded with systematically, in the order of regions as indicated in the 'Form.'"

"The Surgeon is to note every peculiarity or deviation from the normal Standard in each particular region. For example: If the man has received at any time a blow upon the head with a resulting cicatrix or slight depression, let it be noted thus: 'Cicatrix and slight depression upon the right parietal protuberance.'"

"Scars upon any part of the person should be noted, and the cause assigned by the man, recorded. It is not uncommon to find marks of free cupping upon the chests of Germans, without there being any indication of disease. These however should be noted."

"If, upon inspection, the man be found to have a Circocele, though not sufficient to disqualify, let it be noted under the proper head; and so of Hæmorrhoids or any other affection. The vaccine scar and its position should be noted, and whether vaccination has been practised at the rendezvous or depot."

"Under the head of 'Remarks,' Constitutional Syphilis, or other Cachexia, will find a place. If an interpreter is required during the inspection, that fact should be recorded. Men sometimes speak English very well when first examined, who, from after considerations, are entirely ignorant of the language when re-examined, and sometimes succeed in obtaining a discharge in this way."

"By this means an accurate description of the whole person is obtained, sufficient to settle questions of identity, should such be subsequently raised; and if there be any defects about which a difference of opinion may exist, the fact that such defects were not overlooked by the first inspecting Surgeon, will be apparent."

"It will frequently happen that an 'absolute disqualification' will be discovered before completing the examination. Such a defect may be detected at any stage of the inspection. In such cases it will of course be unnecessary to proceed any further."

"The above Form, when filled up, should be sent with the Recruit to the Depot where he is to be finally inspected, and thence transmitted to the Regiment to which he may be assigned."

"Defects discovered at the Depot upon reinspection should be endorsed upon the Form, and signed by the Surgeon; in case of Rejection, the documents thus completed should be transmitted with the proceedings of the Board of Inspection to the Adjutant General of the Army."

MODE OF EXAMINING A RECRUIT.

(From Tripler's Manual.)

"The Room in which this examination is conducted should be well lighted and large enough to admit of the men being walked about freely, that every organ concerned in locomotion may be subjected to inspection. For obvious reasons, none others than they whose presence is absolutely required, should be admitted to the room."

"The person of the Recruit should be washed *clean* before he is presented to the Surgeon for inspection. It is impossible for the medical officer to ascertain the existence of certain defects that *absolutely disqualify*, when concealed, as they effectually may be, and sometimes are, by incrustations of filth a month old."

"We have remarked that certain defects can be ascertained only by questioning the man himself, and that, in order to avoid all subsequent evasions, the answers to these questions should be recorded on the spot. We shall now suggest a method of effecting this object as well as of making it sure that no important part shall escape inspection through any slip of the memory."

"The Questions should be asked and the man's answers recorded before he is stripped."

"He is then to be divested of *all* his clothing and the examination proceeded with systematically, in the order of regions as indicated in the 'Form.'"

"The Surgeon is to note every peculiarity or deviation from the normal Standard in each particular region. For example: If the man has received at any time a blow upon the head with a resulting cicatrix or slight depression, let it be noted thus: 'Cicatrix and slight depression upon the right parietal protuberance.'"

"Scars upon any part of the person should be noted, and the cause assigned by the man, recorded. It is not uncommon to find marks of free cupping upon the chests of Germans, without there being any indication of disease. These however should be noted."

"If, upon inspection, the man be found to have a Circocele, though not sufficient to disqualify, let it be noted under the proper head; and so of Hæmorrhoids or any other affection. The vaccine scar and its position should be noted, and whether vaccination has been practised at the rendezvous or depot."

"Under the head of 'Remarks,' Constitutional Syphilis, or other Cachexia, will find a place. If an interpreter is required during the inspection, that fact should be recorded. Men sometimes speak English very well when first examined, who, from after considerations, are entirely ignorant of the language when re-examined, and sometimes succeed in obtaining a discharge in this way."

"By this means an accurate description of the whole person is obtained, sufficient to settle questions of identity, should such be subsequently raised; and if there be any defects about which a difference of opinion may exist, the fact that such defects were not overlooked by the first inspecting Surgeon, will be apparent."

"It will frequently happen that an 'absolute disqualification' will be discovered before completing the examination. Such a defect may be detected at any stage of the inspection. In such cases it will of course be unnecessary to proceed any further."

"The above Form, when filled up, should be sent with the Recruit to the Depot where he is to be finally inspected, and thence transmitted to the Regiment to which he may be assigned."

"Defects discovered at the Depot upon reinspection should be endorsed upon the Form, and signed by the Surgeon; in case of Rejection, the document thus completed should be transmitted with the proceedings of the Board of Inspection to the Adjutant General of the Army."

MODE OF EXAMINING A RECRUIT.

(From Tripler's Manual.)

"The Room in which this examination is conducted should be well lighted and large enough to admit of the men being walked about freely, that every organ concerned in locomotion may be subjected to inspection. For obvious reasons, none others than they whose presence is absolutely required, should be admitted to the room."

"The person of the Recruit should be washed *clean* before he is presented to the Surgeon for inspection. It is impossible for the medical officer to ascertain the existence of certain defects that *absolutely disqualify*, when concealed, as they effectually may be, and sometimes are, by incrustations of filth a month old."

"We have remarked that certain defects can be ascertained only by questioning the man himself, and that, in order to avoid all subsequent evasions, the answers to these questions should be recorded on the spot. We shall now suggest a method of effecting this object as well as of making it sure that no important part shall escape inspection through any slip of the memory."

"The Questions should be asked and the man's answers recorded before he is stripped."

"He is then to be divested of *all* his clothing and the examination proceeded with systematically, in the order of regions as indicated in the 'Form.'"

"The Surgeon is to note every peculiarity or deviation from the normal Standard in each particular region. For example: If the man has received at any time a blow upon the head with a resulting cicatrix or slight depression, let it be noted thus: 'Cicatrix and slight depression upon the right parietal protuberance.'"

"Scars upon any part of the person should be noted, and the cause assigned by the man, recorded. It is not uncommon to find marks of free cupping upon the chests of Germans, without there being any indication of disease. These however should be noted."

"If, upon inspection, the man be found to have a Circocele, though not sufficient to disqualify, let it be noted under the proper head; and so of Hæmorrhoids or any other affection. The vaccine scar and its position should be noted, and whether vaccination has been practised at the rendezvous or depot."

"Under the head of 'Remarks,' Constitutional Syphilis, or other Cachexia, will find a place. If an interpreter is required during the inspection, that fact should be recorded. Men sometimes speak English very well when first examined, who, from after considerations, are entirely ignorant of the language when re-examined, and sometimes succeed in obtaining a discharge in this way."

"By this means an accurate description of the whole person is obtained, sufficient to settle questions of identity, should such be subsequently raised; and if there be any defects about which a difference of opinion may exist, the fact that such defects were not overlooked by the first inspecting Surgeon, will be apparent."

"It will frequently happen that an 'absolute disqualification' will be discovered before completing the examination. Such a defect may be detected at any stage of the inspection. In such cases it will of course be unnecessary to proceed any further."

"The above Form, when filled up, should be sent with the Recruit to the Depot where he is to be finally inspected, and thence transmitted to the Regiment to which he may be assigned."

"Defects discovered at the Depot upon reinspection should be endorsed upon the Form, and signed by the Surgeon; in case of Rejection, the document thus completed should be transmitted with the proceedings of the Board of Inspection to the Adjutant General of the Army."

MODE OF EXAMINING A RECRUIT

(From Tripler's Manual.)

"The Room in which this examination is conducted should be well lighted and large enough to accept of the man being viewed at a short distance. The surgeon engaged in the examination may be requested to suppress, as far as circumstances, more severe than they whose presence is absolutely required, shall not be admitted to the room."

"The person of the Recruit should be washed clean before he is presented to the Surgeon for inspection. It is impossible that the medical officer can ascertain the existence of certain defects upon examination, however superficial as they essentially may be, and sometimes are, by considerations of decency."

"We have remarked that certain defects can be ascertained only by questioning the man himself and that, in order to avoid all unnecessary omissions, the answers to these questions should be recorded on the report. We shall now suggest a method of effecting this object as well as of making it sure, that no important part shall escape inspection through any slip of the memory."

"The questions should be asked and the man's answers recorded before he is stripped."

"He is then to be divested of *all* his clothing and the examination proceeded with systematically, in the order of regions as indicated in the 'Form.'"

"The Surgeon is to note every peculiarity or deviation from the normal Standard in each particular region. For example: if the man has received at any time a blow upon the head with a resulting cicatrix or slight depression, let it be noted thus: 'Cicatrix and slight depression upon the right parietal protuberance.'"

"Scars upon any part of the person should be noted, and the cause assigned by the man, recorded. It is not uncommon to find marks of free suppuration upon the chests of Germans, without there being any indication of disease. These however should be noted."

"If, upon inspection, the man be found to have a Cicocele, though not sufficient to disqualify, let it be noted under the proper head, and so with Hemorrhoids or any other affection. The varicine vein and its position should be noted, and whether vaccination has been practised at the respective or depot."

"Under the head of 'Remarks,' Constitutional Syphilis, or other Cachexia will find a place. If an interpreter is required during the inspection, the fact should be recorded. Men sometimes speak English very well when first examined, who, from after considerations, are entirely ignorant of the language when re-examined, and sometimes succeed in obtaining a discharge in this way."

"By this means an accurate description of the whole person is obtained sufficient to settle questions of identity, should such be subsequently raised, and if there be any defects about which a difference of opinion may exist, the fact that such defects were not overlooked by the first inspecting Surgeon will be apparent."

"It will frequently happen that an 'absolute disqualification' will be discovered before completing the examination. Such a defect may be decisive at any stage of the inspection. In such cases it will of course be unnecessary to proceed any further."

"The all-wise Form, when filled up, should be sent with the Recruit to the Depot where he is to be finally inspected, and thence transmitted to the Regiment to which he may be assigned."

"Defects discovered at the Depot upon re-inspection should be entered upon the Form, and signed by the Surgeon; in case of Rejection, the document thus completed should be transmitted with the proceedings of the Board of Inspection to the Adjutant General of the Army."

MODE OF EXAMINING A RECRUIT.

(From Tripler's Manual.)

"The Room in which this examination is conducted should be well lighted and large enough to admit of the men being walked about freely, that every organ concerned in locomotion may be subjected to inspection. For obvious reasons, none others than they whose presence is absolutely required, should be admitted to the room."

"The person of the Recruit should be washed *clean* before he is presented to the Surgeon for inspection. It is impossible for the medical officer to ascertain the existence of certain defects that *absolutely disqualify*, when concealed, as they effectually may be, and sometimes are, by incrustations of filth a month old."

"We have remarked that certain defects can be ascertained only by questioning the man himself, and that, in order to avoid all subsequent evasions, the answers to these questions should be recorded on the spot. We shall now suggest a method of effecting this object as well as of making it sure that no important part shall escape inspection through any slip of the memory."

"The Questions should be asked and the man's answers recorded before he is stripped."

"He is then to be divested of *all* his clothing and the examination proceeded with systematically, in the order of regions as indicated in the 'Form.'"

"The Surgeon is to note every peculiarity or deviation from the normal Standard in each particular region. For example: "..he man has received at any time a blow upon the head with a resulting cicatrix or slight depression, let it be noted thus: 'Cicatrix and slight depression upon the right parietal protuberance.'"

"Scars upon any part of the person should be noted, and the cause assigned by the man, recorded. It is not uncommon to find marks of free cupping upon the chests of Germans, without there being any indication of disease. These however should be noted."

"If, upon inspection, the man be found to have a Cirocoele, though not sufficient to disqualify, let it be noted under the proper head; and so of Hæmorrhoids or any other affection. The vaccine scar and its position should be noted, and whether vaccination has been practised at the rendezvous or depot."

"Under the head of 'Remarks,' Constitutional Syphilis, or other Cachexia, will find a place. If an interpreter is required during the inspection, that fact should be recorded. Men sometimes speak English very well when first examined, who, from after considerations, are entirely ignorant of the language when re-examined, and sometimes succeed in obtaining a discharge in this way."

"By this means an accurate description of the whole person is obtained, sufficient to settle questions of identity, should such be subsequently raised; and if there be any defects about which a difference of opinion may exist, the fact that such defects were not overlooked by the first inspecting Surgeon, will be apparent."

"It will frequently happen that an 'absolute disqualification' will be discovered before completing the examination. Such a defect may be detected at any stage of the inspection. In such cases it will of course be unnecessary to proceed any further."

"The above Form, when filled up, should be sent with the Recruit to the Depot where he is to be finally inspected, and thence transmitted to the Regiment to which he may be assigned."

"Defects discovered at the Depot upon reinspection should be endorsed upon the Form, and signed by the Surgeon; in case of Rejection, the document thus completed should be transmitted with the proceedings of the Board of Inspection to the Adjutant General of the Army."

VOLUNTEER ENLISTMENT.

STATE OF Missouri TOWN OF City of St Louis

I, William Armstrong, born in Jefferson in the State of Missouri, aged Eighteen years, and by occupation a Farmer, Do HEREBY ACKNOWLEDGE to have volunteered this Twenty Sixth day of August, 1864 to serve as a **Soldier** in the **Army of the United States of America**, for the period of ~~THREE~~ ONE YEAR, unless sooner discharged by proper authority: Do also agree to accept such bounty, pay, rations, and clothing, as are, or may be, established by law for volunteers. And I, William Armstrong do solemnly swear, that I will bear true faith and allegiance to the ***United States of America***, and that I will serve them honestly and faithfully against all their enemies or opposers whomsoever; and that I will observe and obey the orders of the President of the United States, and the orders of the officers appointed over me, according to the Rules and Articles of War.

Sworn and subscribed to, at St Louis Mo this 29th day of August 1864 before me, Lt Col Ellis Mo Vols

William Armstrong Recruit

I CERTIFY, ON HONOR, That I have carefully examined the abovenamed Volunteer, agreeably to the General Regulations of the Army, and that, in my opinion, he is free from all bodily defects and mental infirmity, which would in any way disqualify him from performing the duties of a soldier.

Chas. Ludwig M.D.

EXAMINING SURGEON.

I CERTIFY, ON HONOR, That I have minutely inspected the Volunteer William Armstrong previously to his enlistment, and that he was entirely sober when enlisted; that, to the best of my judgment and belief, he is of lawful age; and that, in accepting him as duly qualified to perform the duties of an able-bodied soldier, I have strictly observed the Regulations which govern the recruiting service. This soldier has Grey eyes, dark hair, Fair complexion, is five feet 7 inches high.

REMARKS.

The above named man has received no pay & drawn no clothing while in this Hospital

NOTES.

1...The amount of any extra pay for which the soldier may be mustered, as, *e.g.* as *Acting Hospital Steward*, or *Saddler*, &c., and which may be *still due* him, must be carefully noted.

2...In the column headed "BOUNTY PAID," must be entered the *whole* amount *hitherto paid* him; in that of "BOUNTY DUE," the *whole* amount *yet due* him. Bounty paid by State authorities, and not by the United States, will not be entered on this statement.

3...Stoppages for *loss or damage done to arms*, or other *public property*, must be noted, and the *articles and particular damage* to each, specified. When stoppages are due, under sentence of a Court Martial, a *transcript of the same* must be entered here; and the amount *already stopped*, must be *carefully* stated.

4...In *every case of desertion*, the *date* and that of *delivery*, or *apprehension*, must be given, together with a correct transcript of the order of *sentence or pardon*.

5...*A careful settlement of the man's* CLOTHING ACCOUNT must be made, *to date*, and the amount DUE TO, or FROM *him must be prominently stated*.

6...Should the man have been engaged in any *action or skirmish*, it must be mentioned, together with *date and place*. *A full and particular* mention will be made of any *wounds* he may have received in action, or other injury, whilst in the *line of his duty*.

7...If the soldier is entitled to pay for the use of his horse, the company commander will certify to that fact on this list, and also to the time he has pay due for having been so mounted on his own horse.

8...When a soldier is furnished with final statements, his descriptive list, if he has one, should be taken up by the officer who gives the soldier these statements, and endorsed with a statement to this effect by the officer. This endorsement should exhibit a full statement of the time for which the soldier was allowed pay on his final statements, the clothing account, and all other charges against him or in his favor, so as to comprise a complete exhibit of his account. It will then be transmitted to the company commander of the soldier who will enter all the data necessary to a full understanding of the soldier's account on the muster roll upon which the soldier's discharge is reported. The descriptive list will then be destroyed. The object of this is, that the remaining portion of the soldier's account may be settled upon the receipt of these muster rolls, and the soldier receive any pay or allowances that may be due him at the time of his discharge, and which may not appear on his final statements from the fact that his descriptive list is incomplete. These accounts for back pay, &c., are settled by the 2d Auditor of the Treasury Dep't.

9...Where a soldier dies in Hospital or on detached service, his descriptive list, if he has one, should be sent with his final statements, in duplicate, to the Adjutant General, Washington, D. C.

10...Men drafted will be considered as mustered in from the date of their draft, and will be mustered for pay on the usual rolls for Volunteers. Their pay commences on the day they report for duty under their summons from the Provost Marshal, which date should be noted on the first Muster Roll, under the heading of "Remarks." On the same line as the soldier's name, under the heading "Joined for Duty and Enrolled.—Commencement of First Payment by Time," will be written the word *drafted*, or *substitute*, as the case may be; and under the heading "When Mustered In," will be given the date when the soldier was drafted, or, if a *substitute*, has been enlisted, (substitutes, under the Enrollment Act, are mustered in by enlistment;) under "Where Mustered In," will be given the place from which drafted, (or if a substitute, where enlisted,) under the heading "By whom Mustered In," will be given the No. of the Enrollment District from which he was drafted, and the State to which it belongs, thus, *4th D. Mass.*; (meaning 4th Enrollment District, Provost Marshal of the Enrollment District.) Or if a substitute, the name of the officer by Board of Enrollment, the name of the State of Massachusetts. enlisting him. (When *enlisted* by Board of Enrollment, the name of the

11...A separate descriptive list should, as a general rule, be given for each man.

12...Descriptive lists must, in all cases, be signed by COMMISSIONED officers; not by enlisted men acting as such.

MODE OF EXAMINING A RECRUIT.

(From Tripler's Manual.)

"The Room in which this examination is conducted should be well lighted and large enough to admit of the men being walked about freely, that every organ concerned in locomotion may be subjected to inspection. For obvious reasons, none others than they whose presence is absolutely required, should be admitted to the room."

"The person of the Recruit should be washed *clean* before he is presented to the Surgeon for inspection. It is impossible for the medical officer to ascertain the existence of certain defects that *absolutely disqualify*, when concealed, as they effectually may be, and sometimes are, by incrustations of filth a month old."

"We have remarked that certain defects can be ascertained only by questioning the man himself, and that, in order to avoid all subsequent evasions, the answers to these questions should be recorded on the spot. We shall now suggest a method of effecting this object as well as of making it sure that no important part shall escape inspection through any slip of the memory."

"The Questions should be asked and the man's answers recorded before he is stripped."

"He is then to be divested of *all* his clothing and the examination proceeded with systematically, in the order of regions as indicated in the 'Form.'"

"The Surgeon is to note every peculiarity or deviation from the normal Standard in each particular region. For example: If the man has received at any time a blow upon the head with a resulting cicatrix or slight depression, let it be noted thus: 'Cicatrix and slight depression upon the right parietal protuberance.'"

"Scars upon any part of the person should be noted, and the cause assigned by the man, recorded. It is not uncommon to find marks of free cupping upon the chests of Germans, without there being any indication of disease. These however should be noted."

"If, upon inspection, the man be found to have a Chrocele, though not sufficient to disqualify, let it be noted under the proper head; and so of Hæmorrhoids or any other affection. The vaccine scar and its position should be noted, and whether vaccination has been practised at the rendezvous or depot."

"Under the head of 'Remarks,' Constitutional Syphilis, or other Cachexia, will find a place. If an interpreter is required during the inspection, that fact should be recorded. Men sometimes speak English very well when first examined, who, from after considerations, are entirely ignorant of the language when re-examined, and sometimes succeed in obtaining a discharge in this way."

"By this means an accurate description of the whole person is obtained, sufficient to settle questions of identity, should such be subsequently raised; and if there be any defects about which a difference of opinion may exist, the fact that such defects were not overlooked by the first inspecting Surgeon, will be apparent."

"It will frequently happen that an 'absolute disqualification' will be discovered before completing the examination. Such a defect may be detected at any stage of the inspection. In such cases it will of course be unnecessary to proceed any further."

"The above Form, when filled up, should be sent with the Recruit to the Depot where he is to be finally inspected, and thence transmitted to the Regiment to which he may be assigned."

"Defects discovered at the Depot upon reinspection should be endorsed upon the Form, and signed by the Surgeon; in case of Rejection, the document thus completed should be transmitted with the proceedings of the Board of Inspection to the Adjutant General of the Army."

MODE OF EXAMINING A RECRUIT.

(From Tripler's Manual.)

"The Room in which this examination is conducted should be well lighted and large enough to admit of the men being walked about freely, that every organ concerned in locomotion may be subjected to inspection. For obvious reasons none others than they whose presence is absolutely required, should be admitted to the room."

"The person of the Recruit should be washed *clean* before he is presented to the Surgeon for inspection. It is impossible for the medical officer to ascertain the existence of certain defects that *absolutely disqualify*, when concealed, as they effectually may be, and sometimes are, by incrustations of filth a month old."

"We have remarked that certain defects can be ascertained only by questioning the man himself, and that, in order to avoid all subsequent evasions, the answers to these questions should be recorded on the spot. We shall now suggest a method of effecting this object as well as of making it sure that no important part shall escape inspection through any slip of the memory."

"The Questions should be asked and the man's answers recorded before he is stripped."

"He is then to be divested of *all* his clothing and the examination proceeded with systematically, in the order of regions as indicated in the 'Form.'"

"The Surgeon is to note every peculiarity or deviation from the normal Standard in each particular region. For example: If the man has received at any time a blow upon the head with a resulting cicatrix or slight depression, let it be noted thus: 'Cicatrix and slight depression upon the right parietal protuberance.'"

"Scars upon any part of the person should be noted, and the cause assigned by the man, recorded. It is not uncommon to find marks of free cupping upon the chests of Germans, without there being any indication of disease. These however should be noted."

"If, upon inspection, the man be found to have a Circocele, though not sufficient to disqualify, let it be noted under the *proper* head; and so of Hæmorrhoids or any other affection. The vaccine scar and its position should be noted, and whether vaccination has been practised at the rendezvous or depot."

"Under the head of 'Remarks,' Constitutional Syphilis, or other Cachexia, will find a place. If an Interpreter is required during the inspection, that fact should be recorded. Men sometimes speak English very well when first examined, who, from after considerations, are entirely ignorant of the language when re-examined, and sometimes succeed in obtaining a discharge in this way."

"By this means an accurate description of the whole person is obtained sufficient to settle questions of identity, should such be subsequently raised; and if there be any defects about which a difference of opinion may exist, the fact that such defects were not overlooked by the first inspecting Surgeon, will be apparent."

"It will frequently happen that an 'absolute disqualification' will be discovered before completing the examination. Such a defect may be detected at any stage of the inspection. In such cases it will of course be unnecessary to proceed any further."

"The above Form, when filled up, should be sent with the Recruit to the Depot where he is to be finally inspected, and thence transmitted to the Regiment to which he may be assigned."

"Defects discovered at the Depot upon reinspection should be endorsed upon the Form, and signed by the Surgeon; in case of Rejection, the document thus completed should be transmitted with the proceedings of the Board of Inspection to the Adjutant General of the Army."

MODE OF EXAMINING A RECRUIT.

(From Tripler's Manual.)

"The Room in which this examination is conducted should be well lighted and large enough to admit of the men being walked about freely, that every organ concerned in locomotion may be subjected to inspection. For obvious reasons, none others than they whose presence is absolutely required, should be admitted to the room."

"The person of the Recruit should be washed *clean* before he is presented to the Surgeon for inspection. It is impossible for the medical officer to ascertain the existence of certain defects that *absolutely disqualify*, when concealed, as they effectually may be, and sometimes are, by incrustations of filth a month old."

"We have remarked that certain defects can be ascertained only by questioning the man himself, and that, in order to avoid all subsequent evasions, the answers to these questions should be recorded on the spot. We shall now suggest a method of effecting this object as well as of making it sure that no important part shall escape inspection through any slip of the memory."

"The Questions should be asked and the man's answers recorded before he is stripped."

"He is then to be divested of *all* his clothing and the examination proceeded with systematically, in the order of regions as indicated in the 'Form.'"

"The Surgeon is to note every peculiarity or deviation from the normal Standard in each particular region. For example: If the man has received at any time a blow upon the head with a resulting cicatrix or slight depression, let it be noted thus: 'Cicatrix and slight depression upon the right parietal protuberance.'"

"Scars upon any part of the person should be noted, and the cause assigned by the man, recorded. It is not uncommon to find marks of free cupping upon the chests of Germans, without there being any indication of disease. These however should be noted."

"If, upon inspection, the man be found to have a Circocele, though not sufficient to disqualify, let it be noted under the proper head; and so of Hæmorrhoids or any other affection. The vaccine scar and its position should be noted, and whether vaccination has been practised at the rendezvous or depot."

"Under the head of 'Remarks,' Constitutional Syphilis, or other Cachexiæ, will find a place. If an interpreter is required during the inspection, that fact should be recorded. Men sometimes speak English very well when first examined, who, from after considerations, are entirely ignorant of the language when re-examined, and sometimes [illegible]sed in obtaining a discharge in this way."

"By this means an accurate description of the whole person is obtained, sufficient to settle questions of identity, should such be subsequently raised; and if there be any defects about which a difference of opinion may exist, the fact that such defects were not overlooked by the first inspecting Surgeon, will be apparent."

"It will frequently happen that an 'absolute disqualification' will be discovered before completing the examination. Such a defect may be detected at any stage of the inspection. In such case it will of course be unnecessary to proceed any further."

"The above Form, when filled up, should be sent with the Recruit to the Depot where he is to be finally inspected, and thence transmitted to the Regiment to which he may be assigned."

"Defects discovered at the Depot upon reinspection should be endorsed upon the Form, and signed by the Surgeon; in case of Rejection, the document thus completed should be transmitted with the proceedings of the Board of Inspection to the Adjutant General of the Army."

MODE OF EXAMINING A RECRUIT.

(From Tripler's Manual.)

"The Room in which this examination is conducted should be well lighted and large enough to admit of the men being walked about freely, that every organ concerned in locomotion may be subjected to inspection. For obvious reasons, none others than they whose presence is absolutely required, should be admitted to the room."

"The person of the Recruit should be washed *clean* before he is presented to the Surgeon for inspection. It is impossible for the medical officer to ascertain the existence of certain defects that *absolutely disqualify*, when concealed, as they effectually may be, and sometimes are, by incrustations of filth a month old."

"We have remarked that certain defects can be ascertained only by questioning the man himself, and that, in order to avoid all subsequent evasions, the answers to these questions should be recorded on the spot. We shall now suggest a method of effecting this object as well as of making it sure that no important part shall escape inspection through any slip of the memory."

"The Questions should be asked and the man's answers recorded before he is stripped."

"He is then to be divested of *all* his clothing and the examination proceeded with systematically, in the order of regions as indicated in the 'Form.'"

"The Surgeon is to note every peculiarity or deviation from the normal Standard in each particular region. For example: If the man has received at any time a blow upon the head with a resulting cicatrix or slight depression, let it be noted thus: 'Cicatrix and slight depression upon the right parietal protuberance.'"

"Scars upon any part of the person shou l be noted, and the cause assigned by the man, recorded. It is not uncommon to find marks of free cupping upon the chests of Germans, without there being any indication of disease. These however should be noted."

"If, upon inspection, the man be found to have a Circocele, though not sufficient to disqualify, let it be noted under the proper head; and so of Hemorrhoids or any other affection. The vaccine scar and its position should be noted, and whether vaccination has been practised at the rendezvous or depot."

"Under the head of 'Remarks,' Constitutional Syphilis, or other Cachexia, will find a place. If an interpreter is required during the inspection, that fact should be recorded. Men sometimes speak English very well when first examined, who, from after considerations, are entirely ignorant of the language when re-examined, and sometimes succeed in obtaining a discharge in this way."

"By this means an accurate description of the whole person is obtained, sufficient to settle questions of identity, should such be subsequently raised; and if there be any defects about which a difference of opinion may exist, the fact that such defects were not overlooked by the first inspecting Surgeon, will be apparent."

"It will frequently happen that an 'absolute disqualification,' will be discovered before completing the examination. Such a defect may be detected at any stage of the inspection. In such cases it will of course be unnecessary to proceed any further."

"The above Form, when filled up, should be sent with the Recruit to the Depot where he is to be finally inspected, and thence transmitted to the Regiment to which he may be assigned."

"Defects discovered at the Depot upon reinspection should be endorsed upon the Form, and signed by the Surgeon; in case of Rejection, the documents thus completed should be transmitted with the proceedings of the Board of Inspection to the Adjutant General of the Army."

We shall now suggest a method of effecting this object as well as of making it sure that no important part shall escape inspection through any slip of the memory."

"The Questions should be asked and the man's answers recorded before he is stripped."

"He is then to be divested of *all* his clothing and the examination proceeded with systematically, in the order of regions as indicated in the 'Form.'"

"The Surgeon is to note every peculiarity or deviation from the normal Standard in each particular region. For example: If the man has received at any time a blow upon the head with a resulting cicatrix or slight depression, let it be noted thus: 'Cicatrix and slight depression upon the right parietal protuberance.'"

"Scars upon any part of the person should be noted, and the cause assigned by the man, recorded. It is not uncommon to find marks of free cupping upon the chests of Germans, without there being any indication of disease. These however should be noted."

"If, upon inspection, the man be found to have a Circocele, though not sufficient to disqualify, let it be noted under the proper head; and so of Hæmorrhoids or any other affection. The vaccine scar and its position should be noted, and whether vaccination has been practised at the rendezvous or depot."

"Under the head of 'Remarks,' Constitutional Syphilis, or other Cachexia, will find a place. If an interpreter is required during the inspection, that fact should be recorded. Men sometimes speak English very well when first examined, who, from after considerations, are entirely ignorant of the language when re-examined, and sometimes succeed in obtaining a discharge in this way."

"By this means an accurate description of the whole person is obtained, sufficient to settle questions of identity, should such be subsequently raised; and if there be any defects about which a difference of opinion may exist, the fact that such defects were not overlooked by the first inspecting Surgeon, will be apparent."

"It will frequently happen that an 'absolute disqualification' will be discovered before completing the examination. Such a defect may be detected at any stage of the inspection. In such cases it will of course be unnecessary to proceed any further."

"The above Form, when filled up, should be sent with the Recruit to the Depot where he is to be finally inspected, and thence transmitted to the Regiment to which he may be assigned."

"Defects discovered at the Depot upon reinspection should be endorsed upon the Form, and signed by the Surgeon; in case of Rejection, the document thus completed should be transmitted with the proceedings of the Board of Inspection to the Adjutant General of the Army."

MODE OF EXAMINING A RECRUIT.

(From Tripler's Manual.)

"The Room in which this examination is conducted should be well lighted and large enough to admit of the men being walked about freely, that every organ concerned in locomotion may be subjected to inspection. For obvious reasons, none others than they whose presence is absolutely required, should be admitted to the room."

"The person of the Recruit should be washed *clean* before he is presented to the Surgeon for inspection. It is impossible for the medical officer to ascertain the existence of certain defects that *absolutely disqualify*, when concealed, as they effectually may be, and sometimes are, by incrustations of filth a month old."

"We have remarked that certain defects can be ascertained only by questioning the man himself, and that, in order to avoid all subsequent evasions, the answers to these questions should be recorded on the spot. We shall now suggest a method of effecting this object as well as of making it sure that no important part shall escape inspection through any slip of the memory."

"The Questions should be asked and the man's answers recorded before he is stripped."

"He is then to be divested of *all* his clothing and the examination proceeded with systematically, in the order of regions as indicated in the 'Form.'"

"The Surgeon is to note every peculiarity or deviation from the normal Standard in each particular region. For example: If the man has received at any time a blow upon the head with a resulting cicatrix or slight depression, let it be noted thus: 'Cicatrix and slight depression upon the right parietal protuberance.'"

"Scars upon any part of the person should be noted, and the cause assigned by the man, recorded. It is not uncommon to find marks of free cupping upon the chests of Germans, without there being any indication of disease. These however should be noted."

"If, upon inspection, the man be found to have a Circocele, though not sufficient to disqualify, let it be noted under the proper head; and so of Hæmorrhoids or any other affection. The vaccine scar and its position should be noted, and whether vaccination has been practised at the rendezvous or depot."

"Under the head of 'Remarks,' Constitutional Syphilis, or other Cachexia, will find a place. If an interpreter is required during the inspection, that fact should be recorded. Men sometimes speak English very well when first examined, who, from after considerations, are entirely ignorant of the language when re-examined, and sometimes succeed in obtaining a discharge in this way."

"By this means an accurate description of the whole person is obtained, sufficient to settle questions of identity, should such be subsequently raised; and if there be any defects about which a difference of opinion may exist, the fact that such defects were not overlooked by the first inspecting Surgeon, will be apparent."

"It will frequently happen that an 'absolute disqualification' will be discovered before completing the examination. Such a defect may be detected at any stage of the inspection. In such cases it will of course be unnecessary to proceed any further."

"The above Form, when filled up, should be sent with the Recruit to the Depot where he is to be finally inspected, and thence transmitted to the Regiment to which he may be assigned."

"Defects discovered at the Depot upon reinspection should be entered upon the Form, and signed by the Surgeon; in case of Rejection, the documents thus completed should be transmitted with the proceedings of the Board of Inspection to the Adjutant General of the Army."

ARTICLES OF WAR.

ART. 93. When any non-commissioned officer or soldier shall die, or be killed in the service of the United States, the then commanding officer of the troop or company shall, in the presence of two other commissioned officers, take an account of what effects he died possessed of, above his arms and accoutrements, and transmit the same to the office of the Department of War, to which said effects are to be accounted for, and paid to the representatives of such deceased non-commissioned officer or soldier. And in case any of the officers so authorized to take care of the effects of deceased officers and soldiers, should, before they have accounted to their representatives for the same, have occasion to leave the regiment or post, by preferment or otherwise, they shall, before they be permitted to quit the same, deposit in the hands of the commanding officer, or of the assistant military agent, all the effects of such deceased non-commissioned officers and soldiers, in order that the same may be secured for, and paid to, their respective representatives.

ARMY REGULATIONS—EDITION OF 1863.

DECEASED SOLDIERS.

PAR. 152. Inventories of the effects of deceased non-commissioned officers and soldiers, required by the 90th Article of War, will be forwarded to the Adjutant General, by the commander of the company to which the deceased belonged, and a duplicate of the same to the colonel of the regiment. Final statements of pay, clothing, &c., in duplicate, will be sent to the Adjutant General with one copy of the inventory. When a soldier dies at a post or station absent from his company, it will be the duty of his immediate commander to furnish the required inventory and final statements, and, at the same time, to forward to the commanding officer of the company to which the soldier belonged, a report of his death, specifying the date, place, and cause; to what time he was last paid, and the money or other effects in his possession at the time of his decease; which report will be noted on the next muster roll of the company to which the man belonged. Each inventory will be endorsed, "Inventory of the effects of ——— ———, late of company (—,) ——— regiment of ———, who died at ———, the —— day of ———, 186–." If a legal representative receive the effects, it will be stated in the report. If the soldier leave no effects, the fact will be reported.

PAR. 153. Should the effects of a deceased non-commissioned officer or soldier not be administered upon within a short period after his decease, they shall be disposed of by a Council of Administration, under the authority of the commanding officer of the post, and the proceeds deposited with the Paymaster, to the credit of the United States, until they shall be claimed by the legal representatives of the deceased.

PAR. 154. In all such cases of sales by the Council of Administration, a statement in detail, or account of the proceeds, duly certified by the Council and commanding officer, accompanied by the Paymaster's receipt for the proceeds, will be forwarded by the commanding officer to the Adjutant General. The statement will be endorsed, "Report of the proceeds of the effects of ——— ———, late of company (—,) ——— regiment of ———, who died at ———, the —— day of ———, 186–."

NOTE 1.—The effects in all cases, when called for, should be turned over to the legal representative, without further authority from the Adjutant General. When the effects are turned over to the relatives of the deceased before these inventories are sent to the Adjutant General, their receipts therefor should be attached to the inventories. In all other cases, one copy will be sent with a letter of transmittal direct to the Adjutant General and a duplicate retained by the officer.

NOTE 2.—Particular care should be taken to take receipts in duplicate from the Paymaster for any funds turned over to him; one copy should be sent direct to the Adjutant General and one retained by the officer.

VOLUNTEERS.

Dis't Oct 10th 1864

NOTE 1.—Two of these certificates (or duplicates) are to be given to each Volunteer Soldier or drafted man who may be discharged previously to the discharge of his company, that he may at once receive from the Paymaster the pay, &c., due him, and the captain or other COMMISSIONED officer commanding the company will certify to the act of the delivery of the duplicate certificates; on these certificates the Soldier is "entitled to" his *discharge*, and should also present his discharge to the Paymaster to have the payment endorsed on it. The discharge is to be given back to the Soldier by the Paymaster; the latter only retaining as his voucher the duplicate certificates.

NOTE 2.—If the Soldier is entitled to pay for the use of his horse, the Company Commander will certify to that fact on the back of both these final statements, and also to the time he has pay due for having been so mounted on his own horse.

NOTE 3.—When a Soldier is furnished with final statements, his descriptive list, if he must die, should be taken up by the officer who gives the Soldier these statements, and endorsed with a statement to this effect by the officer. This endorsement should exhibit a full statement of the time for which the Soldier was allowed pay on his final statements, the clothing account, and all other charges against him or in his favor, so as to comprise a complete exhibit of his account. It will then be transmitted to the company commander of the Soldier, who will enter all the data necessary to a full understanding of the Soldier's account on the muster roll upon which the Soldier's discharge is reported. The descriptive list will then be destroyed. The object of this is, that the remaining portion of the Soldier's account may be settled upon the receipt of these muster rolls, and the Soldier receive any pay or allowances that may be due him at the time of his discharge, and which may not appear on his final statements from the fact that his descriptive list is incomplete. These accounts for back pay, &c., are settled by the 2d Auditor of the Treasury Department.

NOTE 4.—Charges for loss or injury to ordnance, horse equipments, and other miscellaneous charges, should appear under the heading of "Other Stoppages."

NOTE 5.—Bounty paid by State authorities, and not by the United States, will not be entered on this statement.

NOTE 6.—Amounts due the Sutler and Laundress must be entered on the muster roll on which the discharge, death, desertion, &c., is reported, as well as on the final statement, otherwise the amount cannot be collected from the United States.

NOTE 7.—This blank will be used for deceased volunteers and drafted men, as well as for others.

NOTE 8.—Where a Soldier dies in Hospital or on detached service, his descriptive list, if he has one, should be sent with his final statements, in duplicate, to the Adjutant General, Washington, D. C.

MODE OF EXAMINING A RECRUIT.

(From Tripler's Manual.)

"The Room in which this examination is conducted should be well lighted and large enough to admit of the men being walked about freely, that every organ concerned in locomotion may be subjected to inspection. For obvious reasons, none others than they whose presence is absolutely required, should be admitted to the room."

"The person of the Recruit should be washed *clean* before he is presented to the Surgeon for inspection. It is impossible for the medical officer to ascertain the existence of certain defects that *absolutely disqualify*, when concealed, as they effectually may be, and sometimes are, by incrustations of filth a month old."

"We have remarked that certain defects can be ascertained only by questioning the man himself, and that, in order to avoid all subsequent evasions, the answers to these questions should be recorded on the spot. We shall now suggest a method of effecting this object as well as of making it sure that no important part shall escape inspection through any slip of the memory."

"The Questions should be asked and the man's answers recorded before he is stripped."

"He is then to be divested of *all* his clothing and the examination proceeded with systematically, in the order of regions as indicated in the 'Form.'"

"The Surgeon is to note every peculiarity or deviation from the normal Standard in each particular region. For example: If the man has received at any time a blow upon the head with a resulting cicatrix or slight depression, let it be noted thus: 'Cicatrix and slight depression upon the right parietal protuberance.'"

"Scars upon any part of the person should be noted, and the cause assigned by the man, recorded. It is not uncommon to find marks of free cupping upon the chest of Germans, without there being any indication of disease. These however should be noted."

"If, upon inspection, the man be found to have a Circocele, though not sufficient to disqualify, let it be noted under the proper head; and so of Hæmorrhoids or any other affection. The vaccine scar and its position should be noted, and whether vaccination has been practised at the rendezvous or depot."

"Under the head of 'Remarks,' Constitutional Syphilis, or other Cachexia, will find a place. If an Interpreter is required during the inspection, that fact should be recorded. Men sometimes speak English very well when first examined, who, from after considerations, are entirely ignorant of the language when re-examined, and sometimes succeed in obtaining a discharge in this way."

"By this means an accurate description of the whole person is obtained, sufficient to settle questions of identity, should such be subsequently raised; and if there be any defects about which a difference of opinion may exist, the fact that such defects were not overlooked by the first inspecting Surgeon will be apparent."

"It will frequently happen that an 'absolute disqualification' will be discovered before completing the examination. Such a defect may be detected at any stage of the inspection. In such cases it will of course be unnecessary to proceed any further."

"The above Form, when filled up, should be sent with the Recruit to the Depot where he is to be finally inspected, and thence transmitted to the Regiment to which he may be assigned."

"Defects discovered at the Depot upon reinspection should be endorsed upon the Form, and signed by the Surgeon; in case of Rejection, the document thus completed should be transmitted with the proceedings of the Board of Inspection to the Adjutant General of the Army."

MODE OF EXAMINING A RECRUIT.

(From Tripler's Manual.)

"The Room in which this examination is conducted should be well lighted and large enough to admit of the men being walked about freely, that every organ concerned in locomotion may be subjected to inspection. For obvious reasons, none others than they whose presence is absolutely required, should be admitted to the room."

"The person of the Recruit should be washed *clean* before he is presented to the Surgeon for inspection. It is impossible for the medical officer to ascertain the existence of certain defects that *absolutely disqualify*, when concealed, as they effectually may be, and sometimes are, by incrustations of filth a month old."

"We have remarked that certain defects can be ascertained only by questioning the man himself, and that, in order to avoid all subsequent evasions, the answers to these questions should be recorded on the spot. We shall now suggest a method of effecting this object as well as of making it sure that no important part shall escape inspection through any slip of the memory."

"The Questions should be asked and the man's answers recorded before he is stripped."

"He is then to be divested of *all* his clothing and the examination proceeded with systematically, in the order of regions as indicated in the 'Form.'"

"The Surgeon is to note every peculiarity or deviation from the normal Standard in each particular region. For example: If the man has received at any time a blow upon the head with a resulting cicatrix or slight depression, let it be noted thus: 'Cicatrix and slight depression upon the right parietal protuberance.'"

"Scars upon any part of the person should be noted, and the cause assigned by the man, recorded. It is not uncommon to find marks of free cupping upon the cheeks of Germans, without there being any indication of disease. These however should be noted."

"If, upon inspection, the man be found to have a Circocele, though not sufficient to disqualify, let it be noted under the proper head; and so of Varicocèle or any other affection. The vaccine scar and its position should be noted, and whether vaccination has been practised at the rendezvous or depot."

"Under the head of 'Remarks,' Constitutional Syphilis, or other Cachexia, will find a place. If an interpreter is required during the inspection, that fact should be recorded. Men sometimes speak English very well when first enlisted, who, from other considerations, are entirely ignorant of the language when re-examined, and sometimes succeed in obtaining a discharge in this way."

"By the means an accurate description of the whole person is obtained, sufficient to settle questions of identity, should such be subsequently raised; and if there be any defects about which a difference of opinion may exist, the fact that such points were not overlooked by the first inspecting Surgeon, will be apparent."

"It will frequently happen that an 'absolute disqualification' will be discovered before completing the examination. Such a defect may be detected at any stage of the inspection. In such cases it will of course be unnecessary to proceed any further."

"The above Form, when filled up, should be sent with the Recruit to the [illegible] where it is to be finally inspected, and thence transmitted to the [illegible] as may be assigned."

"The decision of the Depot upon reinspection should be endorsed upon the [illegible] signed by the Surgeon; in case of Rejection, the descriptive [illegible] to be transmitted with the proceedings of the Board of Inspection to the Adjutant General of the Army."

VOLUNTEER ENLISTMENT.

STATE OF Missouri TOWN OF St. Louis

I, Rudolph Backer, born in Prussia in the State of Germany, aged 37 years, and by occupation a Confectioner Do HEREBY ACKNOWLEDGE to have volunteered this 27 day of Aug., 1864 to serve as a Soldier in the Army of the United States of America, for the period of ~~THREE YEARS~~ one, unless sooner discharged by proper authority: Do also agree to accept such bounty, pay, rations, and clothing, as are, or may be, established by law for volunteers. And I, Rudolph Backer, do solemnly swear, that I will bear true faith and allegiance to the *United States of America*, and that I will serve them honestly and faithfully against all their enemies or opposers whomsoever; and that I will observe and obey the orders of the President of the United States, and the orders of the officers appointed over me, according to the Rules and Articles of War.

Sworn and subscribed to, at St Louis Mo. this 27 day of Aug, 1864, Before [redacted} Rud Backer

I CERTIFY, ON HONOR, That I have carefully examined the above-named Volunteer, agreeably to the General Regulations of the Army, and that, in my opinion, he is free from all bodily defects and mental infirmity, which would in any way disqualify him from performing the duties of a soldier.

I CERTIFY, ON HONOR, That I have minutely inspected the Volunteer R. MODE OF EXAMINING A RECRUIT.

(From Tripler's Manual.)

"The Room in which this examination is conducted should be well lighted and large enough to admit of the men being walked about freely, that every organ concerned in locomotion may be subjected to inspection. For obvious reasons, none others than they whose presence is absolutely required, should be admitted to the room."

"The person of the Recruit should be washed *clean* before he is presented to the Surgeon for inspection. It is impossible for the medical officer to ascertain the existence of certain defects that *absolutely disqualify*, when concealed, as they effectually may be, and sometimes are, by incrustations of filth a month old."

"We have remarked that certain defects can be ascertained only by questioning the man himself, and that, in order to avoid all subsequent evasions, the answers to these questions should be recorded on the spot. We shall now suggest a method of effecting this object as well as of making it sure that no important part shall escape inspection through any slip of the memory."

"The Questions should be asked and the man's answers recorded before he is stripped."

"He is then to be divested of *all* his clothing, and the examination proceeded with systematically, in the order of organs indicated in the 'Form.'"

"The Surgeon is to note every peculiarity or deviation from the normal Standard in each particular region. For example: If the man has received at any time a blow upon the head with a resulting cicatrix or slight depression, let it be noted thus: 'Cicatrix and slight depression upon the right parietal protuberance.'"

"Scars upon any part of the person should be noted, and the cause assigned by the man, recorded. It is not uncommon to find marks of free cupping upon the chests of Germans, without there being any indication of disease. These however should be noted."

"If, upon inspection, the man be found to have a Circocele, though not sufficient to disqualify, let it be noted under the proper head; and so of Hæmorrhoids or any other affection. The vaccine scar and its position should be noted, and whether vaccination has been practised at the rendezvous or depot."

"Under the head of 'Remarks,' Constitutional Syphilis, or other Cachexia, will find a place. If an interpreter is required during the inspection, that fact should be recorded. Men sometimes speak English very well when first examined, who, from after considerations, are entirely ignorant of the language when re-examined, and sometimes succeed in obtaining a discharge in this way."

"By this means an accurate description of the whole person is obtained, sufficient to settle questions of identity, should such be subsequently raised; and if there be any defects about which a difference of opinion may exist, the fact that such defects were not overlooked by the first inspecting Surgeon, will be apparent."

"It will frequently happen that an 'absolute disqualification' will be discovered before completing the examination. Such a defect may be detected at any stage of the inspection. In such cases it will of course be unnecessary to proceed any further."

"The above Form, when filled up, should be sent with the Recruit to the Depot where he is to be finally inspected, and thence transmitted to the Regiment to which he may be assigned."

"Defects discovered at the Depot upon reinspection should be endorsed upon the Form, and signed by the Surgeon; in case of Rejection, the document thus completed should be transmitted with the proceedings of the Board of Inspection to the Adjutant General of the Army."

NOTE 1.—This blank will be used for both enlistments and re-enlistments—enlistment of veterans, &c., &c., in the volunteer service. They will be made out in duplicate in all cases—one to accompany the recruiting return of the superintendent (not the recruiting officer) to the Adjutant General, and one to accompany the accounts of the officer who pays bounty, &c. The Regiment and Company in which the soldier last served should be given on the back.

NOTE 2.—An enlistment holds to service. A muster-in must, in all cases, precede payment of pay, bounty, pension, &c. A muster-in roll must, in all cases, be filed in the Adjutant General's Office as evidence of muster-in. The mustering officer, commissary, or assistant commissary of musters, as the case may be, will countersign both enlistments as having mustered the soldier into the service of the United States before either of them is given to the disbursing officer.

MODE OF EXAMINING A RECRUIT.

(From Tripler's Manual.)

"The Room in which this examination is conducted should be well lighted and large enough to admit of the men being walked about freely, that every organ concerned in locomotion may be subjected to inspection. For obvious reasons, none others than they whose presence is absolutely required, should be admitted to the room."

"The person of the Recruit should be washed *clean* before he is presented to the Surgeon for inspection. It is impossible for the medical officer to ascertain the existence of certain defects that *absolutely disqualify*, when concealed, as they effectually may be, and sometimes are, by incrustations of filth a month old."

"We have remarked that certain defects can be ascertained only by questioning the man himself, and that, in order to avoid all subsequent evasions, the answers to these questions should be recorded on the spot. We shall now suggest a method of effecting this object as well as of making it sure that no important part shall escape inspection through any slip of the memory."

"The Questions should be asked and the man's answers recorded before he is stripped."

"He is then to be divested of *all* his clothing and the examination proceeded with systematically, in the order of regions as indicated in the 'Form.'"

"The Surgeon is to note every peculiarity or deviation from the normal Standard in each particular region. For example: If the man has received at any time a blow upon the head with a resulting cicatrix or slight depression, let it be noted thus: 'Cicatrix and slight depression upon the right parietal protuberance.'"

"Scars upon any part of the person should be noted, and the cause assigned by the man, recorded. It is not uncommon to find marks of free cupping upon the chests of Germans, without there being any indication of disease. These however should be noted."

"If, upon inspection, the man be found to have a Circocele, though not sufficient to disqualify, let it be noted under the proper head; and so of Hæmorrhoids or any other affection. The vaccine scar and its condition should be noted, and whether vaccination has been practised at the rendezvous or depot."

"Under the head of 'Remarks,' Constitutional Syphilis or other Cachexia, will find a place. If an interpreter is required during the inspection, that fact should be recorded. Men sometimes speak English very well when first examined, who, from after considerations, are entirely ignorant of the language when re-examined, and sometimes succeed in obtaining a discharge in this way."

"By this means an accurate description of the whole person is obtained, sufficient to settle questions of identity, should such be subsequently raised; and if there be any defects about which a difference of opinion may exist, the fact that such defects were not overlooked by the first inspecting Surgeon, will be apparent."

"It will frequently happen that an 'absolute disqualification' will be discovered before completing the examination. Such a defect may be detected at any stage of the inspection. In such cases it will of course be unnecessary to proceed any further."

"The above Form, when filled up, should be sent with the Recruit to the Depot where he is to be finally inspected, and thence transmitted to the Regiment to which he may be assigned."

"Defects discovered at the Depot upon reinspection should be endorsed upon the Form, and signed by the Surgeon; in case of Rejection, the document thus completed should be transmitted with the proceedings of the Board of Inspection to the Adjutant General of the Army."

MODE OF EXAMINING A RECRUIT.

(From Tripler's Manual.)

"The Room in which this examination is conducted should be well lighted and large enough to admit of the men being walked about freely, that every organ concerned in locomotion may be subjected to inspection. For obvious reasons, none others than they whose presence is absolutely required, should be admitted to the room."

"The person of the Recruit should be washed *clean* before he is presented to the Surgeon for inspection. It is impossible for the medical officer to ascertain the existence of certain defects that *absolutely disqualify*, when concealed, as they effectually may be, and sometimes are, by incrustations of filth a month old."

"We have remarked that certain defects can be ascertained only by questioning the man himself, and that, in order to avoid all subsequent evasions, the answers to these questions should be recorded on the spot. We shall now suggest a method of effecting this object as well as of making it sure that no important part shall escape inspection through any slip of the memory."

"The Questions should be asked and the man's answers recorded before he is stripped."

"He is then to be divested of *all* his clothing and the examination proceeded with systematically, in the order of regions as indicated in the 'Form.'"

"The Surgeon is to note every peculiarity or deviation from the normal Standard in each particular region. For example: If the man has received at any time a blow upon the head with a resulting cicatrix or slight depression, let it be noted thus: 'Cicatrix and slight depression upon the right parietal protuberance.'"

"Scars upon any part of the person should be noted, and the cause assigned by the man, recorded. It is not uncommon to find marks of free cupping upon the chests of Germans, without there being any indication of disease. These however should be noted."

"If, upon inspection, the man be found to have a Circocele, that is not sufficient to disqualify, let it be noted under the proper head; and so of Hæmorrhoids or any other affection. The vaccine scar and its position should be noted, and whether vaccination has been practised at the rendezvous or depot."

"Under the head of 'Remarks,' Constitutional Syphilis, or other Cachexia, will find a place. If an interpreter is required during the inspection, that fact should be recorded. Men sometimes speak English very well when first examined, who, from after considerations, are entirely ignorant of the language when re-examined, and sometimes succeed in obtaining a discharge in this way."

"By this means an accurate description of the whole person is obtained, sufficient to settle questions of identity, should such be subsequently raised; and if there be any defects about which a difference of opinion may exist, the fact that such defects were not overlooked by the first inspecting Surgeon, will be apparent."

"It will frequently happen that an 'absolute disqualification' will be discovered before completing the examination. Such a defect may be detected at any stage of the inspection, in such cases it will of course be unnecessary to proceed any further."

"The above Form, when filled up, should be sent with the Recruit to the Depot where he is to be finally inspected, and thence transmitted to the Regiment to which he may be assigned."

"Defects discovered at the Depot upon reinspection should be endorsed upon the Form, and signed by the Surgeon; in case of Rejection, the document thus completed should be transmitted with the proceedings of the Board of Inspection to the Adjutant General of the Army."

War Department,

Adjutant General's Office,

Washington, June 28, 1865.

Sir:

In reply to your letter requesting a Descriptive List of Silas J. Clark, a Private in Company "D," 11th Regiment Mo. Volunteers, I have the honor to furnish the following "Descriptive List," obtained from the records of this Office: which, from the want of the necessary data, (which is in the possession of the Company Commander,) is only "partial."

NAME, RANK AND REGIMENT, DESCRIPTION, &c.

Silas J. Bane, a Private in Company "D" 11th Regiment of Mo. Volunteers, is 44 years of age; but no further "description" can be obtained from the files of this Office.

He was enrolled on the 19th day of Aug, 1864, at the town of St. Louis in the State of Mo. by Geo. H. Gibson, and mustered into the service of the United States on the 19th day of Aug, 1864, at the town of St. Louis in the State of Mo. by Lt. McFarland to serve for the period of One years, or "during the war."

ACCOUNT OF PAY

It is stated on the Muster Rolls of his Company for the months of March & April 1865 that he ~~was last paid by~~ has Pay due from Enlistment to the ____ day of ____ 186

ACCOUNT OF CLOTHING.

The files of this Office furnish no account of clothing: it must be obtained, if obtained at all, from his Company Commander.

REMARKS.

On Last Muster Roll reported a Private "Absent sick" since Feb 16/65. Amount of Clothing drawn since Enlistment $61.56.

Very respectfully,

Your obedient servant,

Assistant Adjutant General.

To Bvt. C. B. Alexander

St. Louis Mo.

This "Partial Descriptive List" is given in order that the soldier may be discharged at once, without waiting for a descriptive list from his company commander; and, having been used by the proper officer to make out the soldier's final statements, should be endorsed with a statement to that effect by this officer. This endorsement should exhibit a full statement of the time for which the soldier was allowed pay on his final statements, the clothing account, and all other charges against him or in his favor, so as to comprise a complete exhibit of his account. It will then be transmitted to the company commander of the soldier, who will enter all the data necessary to a full understanding of the soldier's account on the muster roll upon which the soldier's discharge is reported. This list will then be destroyed. The object of this is, that the remaining portion of the soldier's account may be settled upon the receipt of these muster rolls, and the soldier receive any pay or allowances that may be due him at the time of his discharge, and which may not appear on his final statements from the fact that this list is incomplete or "partial."

MODE OF EXAMINING A RECRUIT

(From Tripler's Manual)

"The Room in which this examination is conducted should be well lighted large enough to admit of the man being walked about freely, that every part of the surface and information may be suggested to inspection. For obvious reasons, no more than they whose presence is absolutely required, should be admitted to the room."

"The person of the Recruit should be washed *clean* before he is presented to Surgeon for inspection. It is impossible for the medical officer to state the existence of certain defects that *absolutely disqualify*, when *concealed*, as they effectually may be, and sometimes are, by incrustations of a month old."

"We have remarked that certain defects can be ascertained only by questioning the man himself, and that, in order to avoid all subsequent evasions, answers to these questions should be recorded on the spot. We shall now suggest a method of effecting this object as well as of making it sure that no important part shall escape inspection through any slip of the memory."

"The Questions should be asked and the man's answers recorded before he is stripped."

"He is then to be divested of *all* his clothing and the examination proceeded with systematically, in the order of regions as indicated in the 'Form.'"

"The Surgeon is to note every peculiarity or deviation from the normal standard in each particular region. For example: If the man has received any time a blow upon the head with a resulting cicatrix or slight depression, let it be noted thus: 'Cicatrix and slight depression upon the right parietal protuberance.'"

"Scars upon any part of the person should be noted, and the cause assigned by the man, recorded. It is not uncommon to find marks of free cupping upon the chests of Germans, without there being any indication of disease. These however should be noted."

"If, upon inspection, the man be found to have a Circocele, though not sufficient to disqualify, let it be noted under the proper head; and so of Hæmorrhoids or any other affection. The vaccine scar and its position should be noted, and whether vaccination has been practised at the rendezvous or depot."

"Under the head of 'Remarks,' Constitutional Syphilis, or other Cachexia, will find a place. If an interpreter is required during the inspection, that fact should be recorded. Men sometimes speak English very well when first examined, who, from after considerations, are entirely ignorant of the language when re-examined, and sometimes succeed in obtaining a discharge in this way."

"By this means an accurate description of the whole person is obtained, sufficient to settle questions of identity, should such be subsequently raised; and if there be any defects about which a difference of opinion may exist, the fact that such defects were not overlooked by the first inspecting Surgeon, will be apparent."

"It will frequently happen that an 'absolute disqualification' will be discovered before completing the examination. Such a defect may be detected at any stage of the inspection. In such cases it will of course be unnecessary to proceed any further."

"The above Form, when filled up, should be sent with the Recruit to the Depot where he is to be finally inspected, and thence transmitted to the Regiment to which he may be assigned."

"Defects discovered at the Depot upon reinspection should be endorsed upon the Form, and signed by the Surgeon. In case of Rejection, the document thus completed should be transmitted with the proceedings of the Board of Inspection to the Adjutant General of the Army."

MODE OF EXAMINING A RECRUIT.

(From Tripler's Manual.)

"The Room in which this examination is conducted should be well lighted and large enough to admit of the men being walked about freely, that every organ concerned in locomotion may be subjected to inspection. For obvious reasons, none others than they whose presence is absolutely required, should be admitted to the room."

"The person of the Recruit should be washed *clean* before he is presented to the Surgeon for inspection. It is impossible for the medical officer to ascertain the existence of certain defects that *absolutely disqualify*, when concealed, as they effectually may be, and sometimes are, by incrustations of filth a month old."

"We have remarked that certain defects cannot be ascertained only by questioning the man himself, and that, in order to avoid all subsequent evasions, the answers to these questions should be recorded on the spot. We shall now suggest a method of effecting this object as well as of making it sure that no important part shall escape inspection through any slip of the memory."

"The Questions should be asked and the man's answers recorded before he is stripped."

"He is then to be divested of *all* his clothing and the examination proceeded with systematically, in the order of regions as indicated in the 'Form.'"

"The Surgeon is to note every peculiarity or deviation from the normal Standard in each particular region. For example: If the man has received at any time a blow upon the head with a resulting cicatrix or slight depression, let it be noted thus: 'Cicatrix and slight depression upon the right parietal protuberance.'"

"Scars upon any part of the person should be noted, and the cause assigned by the man, recorded. It is not uncommon to find marks of free cupping upon the chests of Germans, without there being any indication of disease. These however should be noted."

"If, upon inspection, the man be found to have a Circocele, though not sufficient to disqualify, let it be noted under the proper head: and so of Haemorrhoids or any other affection. The vaccine scar and its position should be noted, and whether vaccination has been practised at the rendezvous or depot."

"Under the head of 'Remarks,' Constitutional Syphilis, or other Cachexia, will find a place. If an interpreter is required during the inspection, that fact should be recorded. Men sometimes speak English very well when first examined, who, from after considerations, are entirely ignorant of the language when re-examined, and sometimes succeed in obtaining a discharge in this way."

"By this means an accurate description of the whole person is obtained, sufficient to settle questions of identity, should such be subsequently raised; and if there be any defects about which a difference of opinion may exist, the fact that such defects were not overlooked by the first inspecting Surgeon, will be apparent."

"It will frequently happen that an "absolute disqualification" will be discovered before completing the examination. Such a defect may be detected at any stage of the inspection. In such cases it will of course be unnecessary to proceed any further."

"The above Form, when filled up, should be sent with the Recruit to the Depot where he is to be finally inspected, and thence transmitted to the Regiment to which he may be assigned."

"Defects discovered at the Depot upon reinspection should be endorsed upon the Form, and signed by the Surgeon; in case of Rejection, the document thus completed should be transmitted with the proceedings of the Board of Inspection to the Adjutant General of the Army."

MODE OF EXAMINING A RECRUIT.

(From Tripler's Manual.)

"The Room in which this examination is conducted should be well lighted and large enough to admit of the men being walked about freely, that every organ concerned in locomotion may be subjected to inspection. For obvious reasons, none others than they whose presence is absolutely required, should be admitted to the room."

"The person of the Recruit should be washed clean before he is presented to the Surgeon for inspection. It is impossible for the medical officer to ascertain the existence of certain defects that *absolutely disqualify*, when concealed, as they effectually may be, and sometimes are, by incrustations of filth a month old."

"We have remarked that certain defects can be ascertained only by questioning the man himself, and that, in order to avoid all subsequent evasions, the answers to these questions should be recorded on the spot. We shall now suggest a method of effecting this object as well as of making it sure that no important part shall escape inspection through any slip of the memory."

"The Questions should be asked and the man's answers recorded before he is stripped."

"He is then to be divested of all his clothing and the examination proceeded with systematically, in the order of regions as indicated in the 'Form.'"

"The Surgeon is to note every peculiarity or deviation from the normal Standard in each particular region. For example: If the man has received at any time a blow upon the head with a resulting cicatrix or slight depression, let it be noted thus: 'Cicatrix and slight depression upon the right parietal protuberance.'"

"Scars upon any part of the person should be noted, and the cause assigned by the man, recorded. It is not unusual to find marks of free cupping upon the chests of Germans, without there being any indication of disease. These however should be noted."

"If, upon inspection, the man be found to have a Circocele, though not sufficient to disqualify, let it be noted under the proper head; and so of Hemorrhoids or any other affection. The vaccine scar and its position should be noted, and whether vaccination has been practised at the rendezvous or depot."

"Under the head of 'Remarks,' Constitutional Syphilis, or other Cachexia, will find its place. If an interpreter is required during the inspection, that fact should be recorded. Men sometimes speak English very well when first examined, who, from after considerations are entirely ignorant of the language when re-examined, and sometimes succeed in obtaining a discharge in this way."

"By this means an accurate description of the whole person is obtained, sufficient to settle questions of identity that may subsequently raise; and if there be any defects about which a difference of opinion may exist, the fact that such defects were not considered by the first Surgeon, will be apparent."

"It will frequently happen that valuable Recruits, [illegible] will be discovered before completing the examination. Such a deficiency be detected in any stage of the inspection. It again gives it will of course be unnecessary to proceed any further."

"The Descriptive Form, when filled out, should be sent with the Recruit to the depot where he is to be finally inspected, and those instructed to the Surgeon to which he may be assigned."

"Should a disapproval of the Recruit upon inspection should be entered upon the Form, and signed by the Surgeon; in lieu of Requisition, the descriptive Form should be transmitted with the proceedings of the Board of Inspection to the Adjutant General of the Army."

MODE OF EXAMINING A RECRUIT.

(From Tripler's Manual.)

"The Room in which this examination is conducted should be well lighted and large enough to admit of the men being walked about freely, that every organ concerned in locomotion may be subjected to inspection. For obvious reasons none others than they whose presence is absolutely required, should be admitted to the room."

"The person of the Recruit should be washed *clean before* he is presented to the Surgeon for inspection. It is impossible for the medical officer to ascertain the existence of certain defects that *absolutely disqualify*, when concealed, as they effectually may be, and sometimes are, by incrustations of filth a month old."

"We have remarked that certain defects can be ascertained only by questioning the man himself, and that, in order to avoid all subsequent evasions, the answers to these questions should be recorded on the spot. We shall now suggest a method of effecting this object as well as of making it sure that no important part shall escape inspection through any slip of the memory."

"The Questions should be asked and the man's answers recorded before he is stripped."

"He is then to be divested of *all* his clothing and the examination proceeded with systematically, in the order of regions as indicated in the 'Form.'"

"The Surgeon is to note every peculiarity or deviation from the normal standard in each particular region. For example: If the man has received at any time a blow upon the head with a resulting cicatrix or slight depression, let it be noted thus: 'Cicatrix and slight depression upon the right parietal protuberance.'"

"Whatever upon any part of the person should be noted, and the cause assigned by the man, recorded. It is not uncommon to find marks of free cupping upon the chests of Germans, without there being any indication of disease. These however should be noted."

"If upon inspection, the man be found to have a Circocele, though not sufficient to disqualify, let it be noted under the proper head; and so of Varicocele or any other affection. The vaccine scar and its position should be noted, and whether vaccination has been practised at the rendezvous."

"Under the head of 'Remarks,' Constitutional Syphilis, or other Cachexia, should find a place. If an interpreter is required during the inspection, that fact should be recorded. Men sometimes speak English very well when first enlisted, who, from after considerations, are entirely ignorant of the language when re-examined, and sometimes succeed in obtaining a discharge in consequence."

"By this means an accurate description of the whole person is obtained, and to settle questions of identity should such be subsequently raised; for if there be any defects about which no difference of opinion may exist, the fact that such defects were not overlooked by the first inspecting Surgeon, is apparent."

"It will frequently happen that an 'absolute disqualification' will be discovered before completing the examination. Such a defect may be detected at any stage of the inspection. In such cases it will of course be unnecessary to proceed any further."

"The above Form, when filled up, should be sent with the Recruit to the Depot where he is to be finally inspected, and thence transmitted to the Regiment to which he may be assigned."

"Defects discovered at the Depot upon reinspection should be entered upon the Form, and signed by the Surgeons. In case of Rejection, the documents completed should be transmitted with the proceedings of the Board direct to the Adjutant General of the Army."

MODE OF EXAMINING A RECRUIT.

(From Tripler's Manual.)

"The Room in which this examination is conducted should be well lighted and large enough to admit of the men being walked about freely, that every organ concerned in locomotion may be subjected to inspection. For obvious reasons, none others than they whose presence is absolutely required, should be admitted to the room."

"The person of the Recruit should be washed *clean* before he is presented to the Surgeon for inspection. It is impossible for the medical officer to ascertain the existence of certain defects that *absolutely disqualify*, when concealed, as they effectually may be, and sometimes are, by incrustations of filth a month old."

"We have remarked that certain defects can be ascertained only by questioning the man himself, and that, in order to avoid all subsequent evasions, the answers to these questions should be recorded on the spot. We shall now suggest a method of effecting this object as well as of making it sure that no important part shall escape inspection through any slip of the memory."

"The Questions should be asked and the man's answers recorded before he is stripped."

"He is then to be divested of *all* his clothing and the examination proceeded with systematically, in the order of regions as indicated in the 'Form.'"

"The Surgeon is to note every peculiarity or deviation from the normal standard in each particular region. For example: If the man has received at any time a blow upon the head with a resulting cicatrix or slight depression, let it be noted thus: 'Cicatrix and slight depression upon the right parietal protuberance.'"

"Scars upon any part of the person should be noted, and the cause assigned by the man, recorded. It is not uncommon to find marks of free cupping upon the chests of Germans, without there being any indication of disease. These however should be noted."

"If, upon inspection, the man be found to have a Circocele, though not sufficient to disqualify, let it be noted under the proper head; and so of Hæmorrhoids or any other affection. The vaccine scar and its position should be noted, and whether vaccination has been practised at the rendezvous or depot."

"Under the head of 'Remarks,' Constitutional Syphilis, or other Cachexiæ, will find a place. If an interpreter is required during the inspection, that fact should be recorded. Men sometimes speak English very well when first examined, who, from after considerations, are entirely ignorant of the language when re-examined, and sometimes succeed in obtaining a discharge in this way."

"By this means an accurate description of the whole person is obtained, sufficient to settle questions of identity, should such be subsequently raised; and if there be any defects about which a difference of opinion may exist, the fact that such defects were not overlooked by the first inspecting Surgeon, will be apparent."

"It will frequently happen that an 'absolute disqualification' will be discovered before completing the examination. Such a defect may be detected at any stage of the inspection. In such cases it will of course be unnecessary to proceed any further."

"The above Form, when filled up, should be sent with the Recruit to the Depot where he is to be finally inspected, and thence transmitted to the Regiment to which he may be assigned."

"Defects discovered at the Depot upon reinspection should be endorsed upon the Form, and signed by the Surgeon; in case of Rejection, the document thus completed should be transmitted with the proceedings of the Board of Inspection to the Adjutant General of the Army."

VOLUNTEERS.

Enl'd Apr 5 '65

NOTE 1.—*Two* of these certificates (or duplicates) are to be given to each Volunteer Soldier or drafted man who may be discharged without being mustered out (Final Statements are never given to men mustered out of service,) that he may at once receive from the Paymaster the pay, &c., due him, and the captain or other COMMISSIONED officer commanding the company will certify to the act of the delivery of the duplicate certificates; with these certificates the Soldier is "entitled to" his *discharge*, and should also present his discharge to the Paymaster to have the payment endorsed on it. The discharge is to be given back to the Soldier by the Paymaster; the latter only retaining as his vouchers the duplicate certificates.

NOTE 2.—If the Soldier is entitled to pay for the use of his horse, the Company Commander will certify to that fact on the back of both these final statements, and also to the time he has pay due for having been so mounted on his own horse.

NOTE 3.—When a Soldier is furnished with final statements, his descriptive list, if he has one, should be taken up by the officer who gives the Soldier these statements, and endorsed with a statement to this effect by the officer. The endorsement should exhibit a full statement of the time for which the Soldier was allowed pay on his final statements, the clothing account, and all other charges against him or in his favor, so as to comprise a complete exhibit of his account. It will then be transmitted to the Company Commander of the Soldier, who will enter all the data necessary to a full understanding of the Soldier's account on the muster roll upon which the Soldier's discharge is reported. The descriptive list will then be destroyed. The object of this is, that the remaining portion of the Soldier's account may be settled upon the receipt of these muster rolls, and the Soldier receive any pay or allowances that may be due him at the time of his discharge, and which may not appear on his last final statements from the fact that his descriptive list is incomplete. These accounts for back pay, &c., are settled by the 2d Auditor of the Treasury Department.

NOTE 4.—Charges for loss or injury to clothing, horse equipments, and other miscellaneous charges, should appear under this heading of "Other Stoppages."

NOTE 5.—Bounty paid by State authorities, and not by the United States, will not be entered on this statement.

NOTE 6.—Amounts due the Sutler and Laundress must be entered on the muster roll on which the discharge, death, desertion, &c., is reported, as well as on the final statement, otherwise the amount cannot be collected from the United States.

NOTE 7.—This blank will be used for deceased volunteers and drafted men, as well as for others.

NOTE 8.—Where a Soldier dies in Hospital or on detached service, his descriptive list, if he has one, should be sent with his final statements, in duplicate, to the Adjutant General, Washington, D. C.

NOTE 9.—If the soldier is a drafted man or substitute, the space for time, &c., of enrolled, should contain only the word *drafted* or *substitute*, as the case may be. If the Soldier is a "VETERAN," (or RECRUIT,) the words *as a veteran*, (or *recruit*,) as the case may be, should be interlined after the words *mustered into the service of the U. S.* A statement of all the installments of *Veteran or Recruit bounty* RECEIVED by the Soldier must be made on the back of each final statement.

NOTE 1.—This blank will be used for both enlistment and reenlistment of volunteers, &c., in the volunteer force. They will be made out in duplicate and carefully compared before signature. The original (to be retained by the recruiting officer) to the Adjutant General of the State, and the duplicate (to accompany the accounts of the recruiting officer) to the Adjutant General of the United States.

NOTE 2.—An enlistment holds to service. A minor, in all cases, must, in all cases, be filed with the Adjutant General of the State, and the duplicate (to accompany the accounts of the recruiting officer) to the Adjutant General of the United States.

NOTE 3.—The Regiment and Company in which the soldier last served should be given on the back.

NOTE 4.—The enlistment, &c., of pay, bounty, pension, &c. A muster-in roll must, in all cases, be filed with the Adjutant General of the State, and the duplicate (to accompany the accounts of the recruiting officer) to the Adjutant General of the United States.

NOTE 5.—The recruiting officer is required to explain the terms of enlistment to the recruit, and to certify to the fact on the muster-in roll. A muster-in roll must, in all cases, be filed with the Adjutant General of the State, and the duplicate (to accompany the accounts of the recruiting officer) to the Adjutant General of the United States.

NOTE 6.—Any assistant commissary of musters, as the case may be, will countersign each enlistment as having mustered the soldier into the United States service, when such duty is given to the disbursing officer.

MODE OF EXAMINING A RECRUIT.

(From Tripler's Manual.)

"The Room in which this examination is conducted should be well lighted and large enough to admit of the men being walked about freely, that every organ concerned in locomotion may be subjected to inspection. For obvious reasons, none others than they whose presence is absolutely required, should be admitted to the room."

"The person of the Recruit should be washed *clean* before he is presented to the Surgeon for inspection. It is impossible for the medical officer to ascertain the existence of certain defects that *absolutely disqualify*, when concealed, as they effectually may be, and sometimes are, by incrustations of filth a month old."

"We have remarked that certain defects can be ascertained only by questioning the man himself, and that, in order to avoid all subsequent evasions, the answers to these questions should be recorded on the spot. We shall now suggest a method of effecting this object as well as of making it sure that no important part shall escape inspection through any slip of the memory."

"The Questions should be asked and the man's answers recorded before he is stripped."

"He is then to be diverted of all his clothing and the examination proceeded with systematically, in the order of regions as indicated in the 'Form.'"

"The Surgeon is to note every peculiarity or deviation from the normal Standard in each particular region. For example: If the man has received at any time a blow upon the head with a resulting cicatrix or slight depression, let it be noted thus: 'Cicatrix and slight depression upon the right parietal protuberance.'"

"Scars upon any part of the person should be noted, and the cause assigned by the man, recorded. It is not uncommon to find marks of free cupping upon the chests of Germans, without there being any indication of disease. These however should be noted."

"If, upon inspection, the man be found to have a Circocele, though not sufficient to disqualify, let it be noted under the proper head; and so of Hæmorrhoids or any other affection. The vaccine scar and its position should be noted, and whether vaccination has been practised at the rendezvous or depot."

"Under the head of 'Remarks,' Constitutional Syphilis, or other Cachexia, will find a place. If an interpreter is required during the inspection, that fact should be recorded. Men sometimes speak English very well when first examined, who, from after considerations, are entirely ignorant of the language when re-examined, and sometimes succeed in obtaining a discharge in this way."

"By this means an accurate description of the whole person is obtained, sufficient to settle questions of identity, should such be subsequently raised; and if there be any defects about which a difference of opinion may exist, the fact that such defects were not overlooked by the first inspecting Surgeon will be apparent."

"It will frequently happen that an 'absolute disqualification' will be discovered before completing the examination. Such a defect may be detected at any stage of the inspection. In such cases it will of course be unnecessary to proceed any further."

"The above Form, when filled up, should be sent with the Recruit to the Depot where he is to be finally inspected, and thence transmitted to the Regiment to which he may be assigned."

"Defects discovered at the Depot upon reinspection should be endorsed upon the Form, and signed by the Surgeon; in case of Rejection, the document thus completed should be transmitted with the proceedings of the Board of Inspection to the Adjutant General of the Army."

NOTE 1.—This blank will be used for both enlistments and reenlistments—enlistment of veterans, &c., &c., in the volunteer service. They will be made out in duplicate in all cases—one to accompany the recruiting return of the superintendent (not the recruiting officer) to the Adjutant General, and one to accompany the accounts of the officer who pays bounty, &c. The Regiment and Company in which the soldier last served should be given on the back.

NOTE 2.—An enlistment holds to service. A muster-in must; in all cases, precede payment of pay, bounty, pension, &c. A muster-in roll must, in all cases, be filed in the Adjutant General's Office as evidence of muster-in. The mustering, commissary, or regimental commissary of muster, as the case may be, will countersign both enlistments as having mustered the soldier into the service of the United States. A duplicate of each of them is given to the disbursing officer.

MODE OF EXAMINING A RECRUIT.

(From Tripler's Manual.)

"The Room in which this examination is conducted should be well lighted and large enough to admit of the men being walked about freely, that every organ concerned in locomotion may be subjected to inspection. For obvious reasons, none others than they whose presence is absolutely required, should be admitted to the room."

"The person of the Recruit should be washed *clean* before he is presented to the Surgeon for inspection. It is impossible for the medical officer to ascertain the existence of certain defects that *absolutely disqualify*, when concealed, as they effectually may be, and sometimes are, by incrustations of filth a month old."

"We have remarked that certain defects can be ascertained only by questioning the man himself, and that, in order to avoid all subsequent evasions, the answers to these questions should be recorded on the spot. We shall now suggest a method of effecting this object as well as of making it sure that no important part shall escape inspection through any slip of the memory."

"The Questions should be asked and the man's answers recorded before he is stripped."

"He is then to be divested of *all* his clothing and the examination proceeded with systematically, in the order of regions as indicated in the 'Form.'"

"The Surgeon is to note every peculiarity or deviation from the normal standard in each particular region. For example: If the man has received at any time a blow upon the head with a resulting cicatrix or slight depression, let it be noted thus: 'Cicatrix and slight depression upon the right parietal protuberance.'"

"Scars upon any part of the person should be noted, and the cause assigned by the man, recorded. It is not uncommon to find marks of free cupping upon the chests of Germans, without there being any indication of disease. These however should be noted."

"If, upon inspection, the man be found to have a Circocele, though not sufficient to disqualify, let it be noted under the proper head; and so of Hæmorrhoids or any other affection. The vaccine scar and its position should be noted, and whether vaccination has been practised at the rendezvous or depot."

"Under the head of 'Remarks,' Constitutional Syphilis, or other Cachexia, will find a place. If an interpreter is required during the inspection, that fact should be recorded. Men sometimes speak English very well when first examined, who, from after considerations, are entirely ignorant of the language when re-examined, and sometimes succeed in obtaining a discharge in this way."

"By this means an accurate description of the whole person is obtained, sufficient to settle questions of identity, should such be subsequently raised; and if there be any defects about which a difference of opinion may exist, the fact that such defects were not overlooked by the first inspecting Surgeon, will be apparent."

"It will frequently happen that an 'absolute disqualification' will be discovered before completing the examination. Such a defect may be detected at any stage of the inspection. In such cases it will of course be unnecessary to proceed any further."

"The above Form, when filled up, should be sent with the Recruit to the Depot where he is to be finally inspected, and thence transmitted to the Regiment to which he may be assigned."

"Defects discovered at the Depot upon reinspection should be endorsed upon the Form, and signed by the Surgeon; in case of Rejection, the document thus completed should be transmitted with the proceedings of the Board of Inspection to the Adjutant General of the Army."

NOTE 1.—This blank will be used for both enlistments and re-enlistments—enlistment of veterans &c., &c., in the volunteer service. They will be made out in duplicate in all cases—one to accompany the recruiting return of the superintendent (not the recruiting officer) to the Adjutant General, and one to accompany the accounts of the officer who pays bounty, &c. The Regiment and Company in which the soldier last served should be given on the back.

NOTE 2.—An enlistment holds to service. A muster-in must, in all cases, precede payment of pay, bounty, pension, &c. A muster-in roll must, in all cases, be filed in the Adjutant General's Office as evidence of muster-in. The mustering officer, commissary, or assistant commissary of musters, as the case may be, will countersign both enlistments as having mustered the soldier into the service of the United States before either of them is given to the deserting officer.

MODE OF EXAMINING A RECRUIT.

(From Tripler's Manual.)

"The Room in which this examination is conducted should be well lighted and large enough to admit of the men being walked about freely, that every organ concerned in locomotion may be subjected to inspection. For obvious reasons, none others than they whose presence is absolutely required, should be admitted to the room."

"The person of the Recruit should be washed *clean* before he is presented to the Surgeon for inspection. It is impossible for the medical officer to ascertain the existence of certain defects that *absolutely disqualify*, when concealed, as they effectually may be, and sometimes are, by incrustations of but a month old."

"We have remarked that certain defects can be ascertained only by questioning the man himself, and that, in order to avoid all subsequent evasions, the answers to these questions should be recorded on the spot. We shall now suggest a method of effecting this object as well as of making it sure that no important part shall escape inspection through any slip of the memory."

"The Questions should be asked and the man's answers recorded before he is stripped."

"He is then to be divested of *all* his clothing and the examination proceeded with systematically, in the order of regions as indicated in the 'Form.'"

"The Surgeon is to note every peculiarity or deviation from the normal Standard in each particular region. For example: If the man has received at any time a blow upon the head with a resulting cicatrix or slight depression, let it be noted thus: 'Cicatrix and slight depression upon the right parietal protuberance.'"

"Scars upon any part of the person should be noted, and the cause assigned by the man, recorded. It is not uncommon to find marks of free cupping upon the chests of Germans, without there being any indication of disease. These however should be noted."

"If, upon inspection, the man be found to have a Circocele, though not sufficient to disqualify, let it be noted under the proper head; and so of Hæmorrhoids or any other affection. The vaccine scar and its position should be noted, and whether vaccination has been practised at the rendezvous or depot."

"Under the head of 'Remarks,' Constitutional Syphilis, or other Cachexia, will find a place. If an interpreter is required during the inspection, that fact should be recorded. Men sometimes speak English very well when first examined, who, from after considerations, are entirely ignorant of the language when re-examined, and sometimes succeed in obtaining a discharge in this way."

"By this means an accurate description of the whole person is obtained, sufficient to settle questions of identity, should such be subsequently raised; and if there be any defects about which a difference of opinion may exist, the fact that such defects were not overlooked by the first inspecting Surgeon, will be apparent."

"It will frequently happen that an 'absolute disqualification' will be discovered before completing the examination. Such a defect may be detected at any stage of the inspection. In such cases it will of course be unnecessary to proceed any further."

"The above Form, when filled up, should be sent with the Recruit to the Depot where he is to be finally inspected, and thence transmitted to the Regiment to which he may be assigned."

"Defects discovered at the Depot upon reinspection should be endorsed upon the Form, and signed by the Surgeon; in case of Rejection, the document thus completed should be transmitted with the proceedings of the Board of Inspection to the Adjutant General of the Army."

Lieut. Isaac Gannett.

J. H. Baker
Col. and Provost Marshal General.

NOTE 1.

The company commander will here add a statement of all the *facts* known to him concerning the disease or wound, or cause of disability of the soldier; the time, place, manner, and all the circumstances under which the injury occurred, or disease originated or appeared; the duty, or service, or situation of the soldier at the time the injury was received or disease contracted, stating particularly whether the injury was received or the disease contracted in the line of his duty; and whatever other facts may aid a judgment as to the cause, immediate or remote, of the disability, and the circumstances attending it.

When the *facts* are not known to the company commander, the certificate of any officer, or affidavit of other person having such knowledge, will be appended—as the surgeon in charge of a hospital, the officer commanding a detachment of recruits, &c., &c.

NOTE 2.

When a *probable* case for *pension, special care* must be taken to state the *degree* of disability—as ¼, ½, &c., &c.; to describe particularly the disability, wound, or disease; the extent to which it deprives him of the use of any limb or faculty, or affects his health, strength, activity, constitution, or capacity to labor or earn his subsistence. The surgeon will add, from his knowledge of the facts and circumstances, and from the evidence in the case, his professional opinion of the cause or origin of the disability. In the case of discharges by Medical Inspectors, the last paragraph will state that the "discharge was given by consent of the soldier, after a personal examination, and for disability, the nature, degree, and origin of which are correctly described in the within certificate."

Par. 1260 Regulations, Edit. 1861.

Medical officers, in giving certificates of disability, are to take particular care in all cases that have not been under their charge; and especially in epilepsy, convulsions, chronic rheumatism, derangement of the urinary organs, ophthalmia, ulcers, or any obscure disease liable to be feigned or purposely produced; and in no case shall such certificate be given until after sufficient time and examination to detect any attempt at deception.

DIRECTIONS.

This certificate will be made out in duplicate by the soldier's company commander, or other officer commanding the separate detachment to which he belongs, and sent by him to the surgeon who has charge of the hospital where the soldier is sick. The surgeon will then fill out and sign the surgeon's certificate, and forward these papers to the regimental, detachment, or post commander, who will forward them, with his action endorsed thereon, through the proper channel, to his division commander; or, if the troops are not attached to a division, to his corps, department, or other commander or officer to whom the authority to discharge enlisted men may be specially delegated.

These certificates, after having received the action of the highest authority to which they are required to be sent, will be returned through the same channel to the regimental, post, or detachment commander, who will, if the discharge is authorized by the endorsement of the proper authority, sign the soldier's discharge, and the last certificate on this paper; see that the soldier is furnished with the proper final statements in duplicate, and forward BOTH of these certificates direct to the Adjutant General United States Army, at Washington, D. C.; they will not, under any circumstances, be given into the hands of the soldier.

Sir:

In reply to your letter requesting a Descriptive List of William Beckham, a Private in Company "G", 40th Regiment Mo Volunteers, I have the honor to furnish the following "Descriptive List," obtained from the records of this Office: which, from the ~~want of the necessary data, (which is in the possession of the Company Commander,)~~ is only "partial."

NAME, RANK AND REGIMENT, DESCRIPTION, &c.

William L Beckham, a Private in Company "G" 40th Regiment of Mo. Volunteers, is 18 years of age; but no further "description" can be obtained from the files of this Office.

He was enrolled on the 2d day of Sept., 1864, at the town of St Louis in the State of Mo. by Lieut. I Whitwell, and mustered into the service of the United States on the 2d day of Sept., 1864, at the town of Benton Barracks, in the State of Mo. by Lieut. McFarland, to serve for the period of one years, or "during the war."

No ACCOUNT OF PAY.

~~It is stated on the Muster Rolls of his Company for the months of~~ ~~that he was last paid by Paymaster~~ ~~to the day of~~ ~~, 186 ,~~

ACCOUNT OF CLOTHING.

The files of this Office furnish no account of clothing: it must be obtained, if obtained at all, from his Company Commander.

REMARKS.

On the Muster Roll of Co. "G" for Nov. & Dec. 1864 (latest on file) reported a Private Present for duty, with the remark "Joined one months pay per Regtl. Sp. O. No 43."

Very respectfully,
Your obedient servant,

Saml Breck

Assistant Adjutant General.

This "Partial Descriptive List" is given in order that the soldier may be discharged at once, without waiting for a descriptive list from his company commander; and, having been used by the proper officer to make out the soldier's final statements, should be endorsed with a statement to that effect by this officer. This endorsement should exhibit a full statement of the time for which the soldier was allowed pay on his final statements, the clothing account, and all other charges against him or in his favor so as to comprise a complete exhibit of his account. It will then be transmitted to the company commander of the soldier, who will enter all the data necessary to a full understanding of the soldier's account on the muster roll upon which the soldier's discharge is reported. This list will then be destroyed. The object of this is, that the remaining portion of the soldier's account may be settled upon the receipt of these muster rolls, and the soldier receive any pay or allowances that may be due him at the time of his discharge, and which may not appear on his final statements from the fact that this list is incomplete or "partial."

MODE OF EXAMINING A RECRUIT.

(From Tripler's Manual.)

"The Room in which this examination is conducted should be well lighted and large enough to admit of the men being walked about freely, that every organ concerned in locomotion may be subjected to inspection. For obvious reasons, none others than they whose presence is absolutely required, should be admitted to the room."

"The person of the Recruit should be washed *clean* before he is presented to the Surgeon for inspection. It is impossible for the medical officer to ascertain the existence of certain defects that *absolutely disqualify*, when concealed, as they effectually may be, and sometimes are, by incrustations of filth a month old."

"We have remarked that certain defects can be ascertained only by questioning the man himself, and that, in order to avoid all subsequent evasions, the answers to these questions should be recorded on the spot. We shall now suggest a method of effecting this object as well as of making it sure that no important part shall escape inspection through any slip of the memory."

"The Questions should be asked and the man's answers recorded before he is stripped."

"He is then to be divested of *all* his clothing and the examination proceeded with systematically, in the order of regions as indicated in the 'Form.'"

"The Surgeon is to note every peculiarity or deviation from the normal Standard in each particular region. For example: If the man has received at any time a blow upon the head with a resulting cicatrix or slight depression, let it be noted thus: 'Cicatrix and slight depression upon the right parietal protuberance.'"

"Scars upon any part of the person should be noted, and the cause assigned by the man, recorded. It is not uncommon to find marks of free cupping upon the chests of Germans, without there being any indication of disease. These however should be noted."

"If, upon inspection, the man be found to have a Cirrocele, though not sufficient to disqualify, let it be noted under the proper head; and so of Hæmorrhoids or any other affection. The vaccine scar and its position should be noted, and whether vaccination has been practised at the rendezvous or depot."

"Under the head of 'Remarks,' Constitutional Syphilis, or other Cachexia, will find a place. If an interpreter is required during the inspection, that fact should be recorded. Men sometimes speak English very well when first examined, who, from after considerations, are entirely ignorant of the language when re-examined, and sometimes succeed in obtaining a discharge in this way."

"By this means an accurate description of the whole person is obtained, sufficient to settle questions of identity, should such be subsequently raised; and if there be any defects about which a difference of opinion may exist, the fact that such defects were not overlooked by the first inspecting Surgeon, will be apparent."

"It will frequently happen that an 'absolute disqualification' will be discovered before completing the examination. Such a defect may be detected at any stage of the inspection. In such cases it will of course be unnecessary to proceed any further."

"The above Form, when filled up, should be sent with the Recruit to the Depot where he is to be finally inspected, and thence transmitted to the Regiment to which he may be assigned."

"Defects discovered at the Depot upon reinspection should be endorsed upon the Form, and signed by the Surgeon; in case of Rejection, the document thus completed should be transmitted with the proceedings of the Board of Inspection to the Adjutant General of the Army."

VOLUNTEERS.

Cert 2 March 7, 1865

NOTE 1.—*Two* of these certificates (or duplicates) are to be given to each Volunteer Soldier or drafted man who may be discharged previously to the discharge of his company, that he may at once receive from the Paymaster the pay, &c., due him, and the captain or other COMMISSIONED officer commanding the company will certify to the act of the delivery of the duplicate certificates; on these certificates the Soldier is "entitled to" his *discharge*, and should also present his discharge to the Paymaster to have the payment endorsed on it. The discharge is to be given back to the Soldier by the Paymaster; the latter only retaining as his voucher the duplicate certificates.

NOTE 2.—If the Soldier is entitled to pay for the use of his horse, the Company Commander will certify to that fact on the back of both these final statements, and also to the time he was pay due for having been so mounted on his own horse.

NOTE 3.—When a Soldier is furnished with final statements, his descriptive list, if he has one, should be taken up by the officer who gives the Soldier these statements, and endorsed with a statement to this effect by the officer. This endorsement should exhibit a full statement of the time for which the Soldier was allowed pay on his final statements, the clothing account, and all other charges against him or in his favor, so as to comprise a complete exhibit of his account. It will then be transmitted to the company commander of the Soldier, who will enter all the data necessary to a full understanding of the Soldier's account on the muster roll upon which the Soldier's discharge is reported. The descriptive list will then be destroyed. The object of this is, that the remaining portion of the Soldier's account may be settled upon the receipt of the muster rolls, and the Soldier receive any pay or allowances that may be due him at the time of his discharge, and which would not appear on his final statements from the fact that his descriptive list is incomplete. These accounts for back pay, &c., are settled by the Second Auditor of the Treasury Department.

NOTE 4.—Charges for loss or injury to ordnance, ordnance equipments, and other miscellaneous charges, should appear under the heading of "Other Stoppages."

NOTE 5.—Bounty paid by State authorities, and not by the United States, will not be entered on this statement.

NOTE 6.—Amounts due the Sutler and Laundress must be entered on the muster roll on which the discharge, desth, desertion, &c., is reported, as well as on the final statement, otherwise the amount cannot be collected from the United States.

NOTE 7.—This blank will be used for deceased volunteers and drafted men, as well as for others.

NOTE 8.—Where a Soldier dies in Hospital or on detached service, his descriptive list, if he has one, should be sent with his final statements, in duplicate, to the Adjutant General, Washington, D. C.

ARTICLES OF WAR.

ART. 95. When any non-commissioned officer or soldier shall die, or be killed in the service of the United States, the then commanding officer of the troop or company shall, in the presence of two other commissioned officers, take an account of what effects he died possessed of, above his arms and accoutrements, and transmit the same to the office of the Department of War, which said effects are to be accounted for, and paid to the representatives of such deceased non-commissioned officer or soldier. And in case any of the officers, so authorized to take care of the effects of deceased officers and soldiers, should, before they have accounted to their representatives for the same, have occasion to leave the regiment or post, by preferment or otherwise, they shall, before they be permitted to quit the same, deposit in the hands of the commanding officer, or of the assistant military agent, all the effects of such deceased non-commissioned officers and soldiers, in order that the same may be secured for, and paid to, their respective representatives.

ARMY REGULATIONS—EDITION OF 1863.

DECEASED SOLDIERS.

PAR. 152. Inventories of the effects of deceased non-commissioned officers and soldiers, required by the 95th Article of War, will be forwarded to the Adjutant General, by the commander of the company to which the deceased belonged, and a duplicate of the same to the colonel of the regiment. Final statements of pay, clothing, &c., in duplicate, will be sent to the Adjutant General with one copy of the inventory. When a soldier dies at a post or station absent from his company, it will be the duty of his immediate commander to furnish the required inventory and final statements, and, at the same time, to forward to the commanding officer of the company to which the soldier belonged, a report of his death, specifying the date, place, and cause; to what time he was last paid, and the money or other effects in his possession at the time of his decease; which report will be noted on the next muster roll of the company to which the man belonged. Each inventory will be endorsed, "Inventory of the effects of ——— ———, late of company (—,) ——— regiment of ———, who died at ———, the —— day of ———, 186–." If a legal representative receive the effects, it will be stated in the report. If the soldier leave no effects, the fact will be reported.

PAR. 153. Should the effects of a deceased non-commissioned officer or soldier not be administered upon within a short period after his decease, they shall be disposed of by a Council of Administration, under the authority of the commanding officer of the post, and the proceeds deposited with the Paymaster, to the credit of the United States, until they shall be claimed by the legal representatives of the deceased.

PAR. 154. In all such cases of sales by the Council of Administration, a statement in detail, or account of the proceeds, duly certified by the Council and commanding officer, accompanied by the Paymaster's receipt for the proceeds, will be forwarded by the commanding officer to the Adjutant General. The statement will be endorsed, "Report of the proceeds of the effects of ——— ———, late of company (—,) ——— regiment of ———, who died at ———, the —— day of ———, 186–."

NOTE 1.—The effects in all cases, when called for, should be turned over to the legal representative, without further authority from the Adjutant General. When the effects are turned over to the relatives of the deceased before these inventories are sent to the Adjutant General, their receipts therefor should be attached to the inventories. In all other cases, one copy will be sent with a letter of transmittal direct to the Adjutant General, and a duplicate retained by the officer.

NOTE 2.—Particular care should be taken to take receipts in duplicate from the Paymaster for any funds turned over to him; one copy should be sent direct to the Adjutant General and one retained by the officer.

NOTE 1.—This blank will be used for both enlistments and re-enlistments of veterans, &c., &c., in the volunteer service. They will be made out in duplicate in all cases—one to accompany the recruiting return of the superintendent (not the recruiting officer) to the Adjutant General, and one to accompany the accounts of the officer who pays bounty, &c. The Regiment and Company in which the soldier last served should be stated on the back.

NOTE 2.—An enlistment holds to service. A muster-in must, in all cases, precede payment of pay, bounty, pension, &c. A muster-in is all evidence in the Adjutant General's Office as evidence of muster-in. The muster-in officer, commissary, or assistant commissary of musters, at the time of muster, is authorized to administer to each enlisted man the oath required by law, and to certify on the muster-in roll that the enlistments so having mustered the soldier into the service of the United States before either of them is given to the disbursing officer.

MODE OF EXAMINING A RECRUIT.

(From Tripler's Manual.)

"The Room in which this examination is conducted should be well lighted and large enough to admit of the men being walked about freely, that every organ concerned in locomotion may be subjected to inspection. For obvious reasons, none others than they whose presence is absolutely required, should be admitted to the room."

"The person of the Recruit should be washed *clean* before he is presented to the Surgeon for inspection. It is impossible for the medical officer to ascertain the existence of certain defects that *absolutely disqualify*, when concealed, as they effectually may be, and sometimes are, by incrustations of filth a month old."

"We have remarked that certain defects can be ascertained only by questioning the man himself, and that, in order to avoid all subsequent evasions, the answers to these questions should be recorded on the spot. We shall now suggest a method of effecting this object as well as of making it sure that no important part shall escape inspection through any slip of the memory."

"The Questions should be asked and the man's answers recorded before he is stripped."

"He is then to be divested of *all* his clothing and the examination proceeded with systematically, in the order of regions as indicated in the 'Form.'"

"The Surgeon is to note every peculiarity or deviation from the normal Standard in each particular region. For example: If the man has received at any time a blow upon the head with a resulting cicatrix or slight depression, let it be noted thus: 'Cicatrix and slight depression upon the right parietal protuberance.'"

"Scars upon any part of the person should be noted, and the cause assigned by the man, recorded. It is not uncommon to find marks of free cupping upon the chests of Germans, without there being any indication of disease. These however should be noted."

"If, upon inspection, the man be found to have a Circocele, though not sufficient to disqualify, let it be noted under the proper head; and so of Hæmorrhoids or any other affection. The vaccine scar and its position should be noted, and whether vaccination has been practised at the rendezvous or depot."

"Under the head of 'Remarks,' Constitutional Syphilis, or other Cachexiæ, will find a place. If an interpreter is required during the inspection, that fact should be recorded. Men sometimes speak English very well when first examined, who, from after considerations, are entirely ignorant of the language when re-examined, and sometimes succeed in obtaining a discharge in this way."

"By this means an accurate description of the whole person is obtained, sufficient to settle questions of identity, should such be subsequently raised; and if there be any defects about which a difference of opinion may exist, the fact that such defects were not overlooked by the first inspecting Surgeon, will be apparent."

"It will frequently happen that an 'absolute disqualification' will be discovered before completing the examination. Such a defect may be detected at any stage of the inspection. In such cases it will of course be unnecessary to proceed any further."

"The above Form, when filled up, should be sent with the Recruit to the Depot where he is to be finally inspected, and thence transmitted to the Regiment to which he may be assigned."

"Defects discovered at the Depot upon reinspection should be endorsed upon the Form, and signed by the Surgeon; in case of Rejection, the document thus completed should be transmitted with the proceedings of the Board of Inspection to the Adjutant General of the Army."

It is impossible for the medical officer to ascertain the existence of certain defects that *absolutely disqualify*, when concealed, as they effectually may be, and sometimes are, by incrustations of filth and tooth rot."

"We have remarked that certain defects can be ascertained only by questioning the man himself; and that, in order to avoid all subsequent evasions, the answers to these questions should be recorded on the spot. We shall now suggest a method of effecting this object as well as of making it serve as no important part shall escape inspection through any slip of the memory."

"The Questions should be asked and the man's answers recorded before he is stripped."

"He is then to be divested of *all* his clothing and the examination proceeded with systematically, in the order of regions as indicated in the 'Form.'"

"The Surgeon is to note every peculiarity or deviation from the normal standard in each particular region. For example: If the man has received at any time a blow upon the head with a resulting cicatrix or slight depression, let it be noted thus: 'Cicatrix and slight depression upon the right parietal protuberance.'"

"Scars upon any part of the person should be noted, and the cause assigned by the man, recorded. It is not uncommon to find marks of free cupping upon the chests of Germans, without there being any indication of disease. Scars however should be noted."

"If, upon inspection, the man be found to have a Circocele, though not sufficient to disqualify, let it be noted under the proper head; and so of Hemorrhoids or any other affection. The vaccine scar and its position should be noted, and whether vaccination has been practised at the rendezvous or depot."

"Under the head of 'Remarks,' Constitutional Syphilis, or other Cachexia, will find a place. If an interpreter is required during the inspection, that fact should be recorded. Men sometimes speak English very well when first examined, who, from after considerations, are entirely ignorant of the language when re-examined, and sometimes succeed in obtaining a discharge in this way."

"By this means an accurate description of the whole person is obtained, sufficient to settle questions of identity, should such be subsequently raised; and if there be any defects about which a difference of opinion may exist, the fact that such defects were not overlooked by the first inspecting Surgeon will be apparent."

"It will frequently happen that an 'absolute disqualification' will be discovered before completing the examination. Such a defect may be detected any stage of the inspection. In such cases it will of course be unnecessary to proceed any further."

"The above Form, when filled up, should be sent with the Recruit to the depot where he is to be finally inspected, and thence transmitted to the regiment to which he may be assigned."

"Defects discovered at the Depot upon reinspection should be endorsed on the Form, and signed by the Surgeon; in case of Rejection, the document thus completed should be transmitted with the proceedings of the Board of Inspection to the Adjutant General of the Army."

ARTICLES OF WAR.

ART. 95. When any non-commissioned officer or soldier shall die, or be killed in the service of the United States, the then commanding officer of the troop or company shall, in the presence of two other commissioned officers, take an account of what effects he died possessed of, above his arms and accoutrements, and transmit the same to the office of the Department of War, which said effects are to be accounted for, and paid to the representatives of such deceased non-commissioned officer or soldier. And in case any of the officers so authorized to take care of the effects of deceased officers and soldiers, should, before they have accounted to their representatives for the same, have occasion to leave the regiment or post, by preferment or otherwise, they shall, before they be permitted to quit the same, deposit in the hands of the commanding officer, or of the assistant military agent, all the effects of such deceased non-commissioned officers and soldiers, in order that the same may be secured for, and paid to, their respective representatives.

ARMY REGULATIONS—EDITION OF 1863.

DECEASED SOLDIERS.

PAR. 152. Inventories of the effects of deceased non-commissioned officers and soldiers, required by the 95th Article of War, will be forwarded to the Adjutant General, by the commander of the company to which the deceased belonged, and a duplicate of the same to the colonel of the regiment. Final statements of pay, clothing, &c., in duplicate, will be sent to the Adjutant General with one copy of the inventory. When a soldier dies at a post or station absent from his company, it will be the duty of his immediate commander to furnish the required inventory and final statements, and, at the same time, to forward to the commanding officer of the company to which the soldier belonged, a report of his death, specifying the date, place, and cause; to what time he was last paid, and the money or other effects in his possession at the time of his decease; which report will be noted on the next muster roll of the company to which the man belonged. Each inventory will be endorsed. "Inventory of the effects of ——— ———, late of company (—,) ——— regiment of ———, who died at ———, the —— day of ———, 186–." If a legal representative receive the effects, it will be stated in the report. If the soldier leave no effects, the fact will be reported.

PAR. 153. Should the effects of a deceased non-commissioned officer or soldier not be administered upon within a short period after his decease, they shall be disposed of by a Council of Administration, under the authority of the commanding officer of the post, and the proceeds deposited with the Paymaster, to the credit of the United States, until they shall be claimed by the legal representatives of the deceased.

PAR. 154. In all such cases of sales by the Council of Administration, a statement in detail, or account of the proceeds, duly certified by the Council and commanding officer, accompanied by the Paymaster's receipt for the proceeds, will be forwarded by the commanding officer to the Adjutant General. The statement will be endorsed, "Report of the proceeds of the effects of ——— ———, late of company (—,) ——— regiment of ———, who died at ———, the —— day of ———, 186–."

NOTE 1.—The effects in all cases, when called for, should be turned over to the legal representative, without further authority from the Adjutant General. When the effects are turned over to the relatives of the deceased before these inventories are sent to the Adjutant General, their receipts therefor should be attached to the inventories. In all other cases, one copy will be sent with a letter of transmittal direct to the Adjutant General, and a duplicate retained by the officer.

NOTE 2.—Particular care should be taken to take receipts in duplicate from the Paymaster for any funds turned over to him; one copy should be sent direct to the Adjutant General and one retained by the officer.

MODE OF EXAMINING A RECRUIT.

(From Tripler's Manual.)

"The Room in which this examination is conducted should be well lighted and large enough to admit of the men being walked about freely, that every organ concerned in locomotion may be subjected to inspection. For obvious reasons, none others than they whose presence is absolutely required, should be admitted to the room."

"The person of the Recruit should be washed clean before he is presented to the Surgeon for inspection. It is impossible for the medical officer to ascertain the existence of certain defects that *absolutely disqualify*, when concealed, as they effectually may be, and sometimes are, by incrustations of filth a month old."

"We have remarked that certain defects can be ascertained only by questioning the man himself, and that, in order to avoid all subsequent evasions, the answers to these questions should be recorded on the spot. We shall now suggest a method of effecting this object as well as of making it sure that no important part shall escape inspection through any slip of the memory."

"The Questions should be asked and the man's answers recorded before he is stripped."

"He is then to be divested of *all* his clothing and the examination proceeded with systematically, in the order of sections as indicated in the 'Form.'"

"The Surgeon is to note every peculiarity or deviation from the normal Standard in each particular region. For example: If the man has received at any time a blow upon the head with a resulting cicatrix or slight depression, let it be noted thus: 'Cicatrix and slight depression upon the right parietal protuberance.'"

FINAL STATEMENT

OF

Adam Boenger
Comp. I.
40 Reg't of Jeff. Mc. Vols

VOLUNTEERS.

Died Oct 12 1864

NOTE 1.—Two of these certificates (or duplicates) are to be given to each Volunteer Soldier or drafted man who may be discharged previously to the discharge of his company, that he may at once receive from the Paymaster the pay, &c., due him, and the captain or other COMMISSIONED officer commanding the company will certify to the act of the delivery of the duplicate certificates; on these certificates the Soldier is "entitled to" his *discharge*, and should also present his discharge to the Paymaster to have the payment endorsed on it. The discharge is to be given back to the Soldier by the Paymaster; the latter only retaining as his voucher the duplicate certificates.

NOTE 2.—If the Soldier is entitled to pay for the use of his horse, the Company Commander will certify to the fact on the back of both these final statements, and also to the time for which pay due for having been so mounted on his own horse.

NOTE 3.—When a Soldier is discharging these final statements, his descriptive list, if he has one, should be signed by the officer who gives the Soldier these statements, and dated on the day of payment to him effected by the officer. The endorsement should exhibit in full statement of the time for which the Soldier was allowed pay on his final statement, the clothing account, and all other charges against him or in his favor, so as to constitute a complete exhibit of his account. It will then be transmitted to the company commander of the Soldier, who will cause all the items appearing to his full understanding of the Soldier's account on the muster roll upon which the Soldier's discharge is reported. The descriptive list will then be destroyed. The object of this is, that the remaining portion of the Soldier's account may be settled upon the receipt of these muster rolls, and the Soldier receive any pay or allowances that may be due him at the time of his discharge, and which may not appear on his final statement from the fact that his descriptive list is incomplete. Where descriptive lists, bounty, back pay, &c., are settled by the 1st Auditor of the Treasury Department.

NOTE 4.—Charges for loss or injury to ordnance, horse equipments, and other miscellaneous charges, should appear under the heading of "Other Stoppages."

NOTE 5.—Bounty paid by State authorities, and not by the United States, will not be entered on this statement.

NOTE 6.—Accounts due the Sutler and Laundress must be entered on the muster roll on which the discharge, death, desertion, &c., is reported, as well as on this final statement, otherwise the amount cannot be collected from the United States.

NOTE 7.—This blank will be used for deceased volunteers and drafted men, as well as for others.

NOTE 8.—Where a Soldier dies in Hospital or on detached service, his descriptive list, if he has one, should be sent with his final statements, in duplicate, to the Adjutant General, Washington, D. C.

NOTE 1.—This blank will be used for both enlistments and re-enlistments of veterans, &c., &c., in the volunteer service. They will be made out in duplicate in all cases—one to accompany the recruiting rolls of the superintendents (not the recruiting officer) to the Adjutant General, and one to accompany the accounts of the officer who pays bounty, &c. The Regiment and Company to which the soldier last served should be given on the back.

NOTE 2.—An enlistment holds to service. A re-enlistment runs, in all cases, precede payment of pay, bounty, pension, &c. A soldier re-in roll must, in all or ea, be filed in the Adjutant General's Office as evidence of same. The mustering officer, commissary, or assistant commissary of musters, as the case may be, will countersign both enlistments as having mustered the soldier into the service of the United States before either of them is given to the discharging officer.

"The Room in which the examination is conducted should be well lighted, and [illegible] to the Recruit. It is important that the [illegible] should be undressed [illegible] that no part shall escape inspection. [illegible] the examination.

"The questions should be asked and the man's answers recorded before he is measured.

"Upon the completion of the clothing and the examination proceed with the measurement, [illegible] to the [illegible] Standard. [illegible] or example. If the man has measured [illegible] with a receding forehead or slight [illegible] Caution and slight depression upon the right [illegible]

"Before [illegible] of the person should be noted, and the name endorsed by the [illegible]. This is a precaution to find marks of free [illegible] upon the [illegible], in short there being any indication of disease. These [illegible] noted.

"If, upon [illegible] the tongue be found to have a Circocele, through [illegible] to Rheumatism, let it be noted under the proper head, and so of Hæmorrhoids or any other affection. The varicose vein and its position should be noted and whether examination has been practised at the recruiting [illegible].

"Under the head of 'Remarks,' Constitutional Syphilis or other Confirmed Disease, will find a place. If an undersize is required during the inspection, the fact should be noted. Men [illegible] Englishmen, will often [illegible] examined, when [illegible] after examination, are entirely free [illegible] the discharge [illegible] the Board, and [illegible] in granting a discharge [illegible]

"By this means an accurate description of the whole person is obtained sufficient to settle questions of identity, should such be subsequently raised, and if there be any defects upon which a difference of opinion may exist, the fact that such defects were not overlooked by the first inspecting Surgeon, will be apparent.

"It will frequently happen that an 'absolute disqualification' will be discovered before completing the examination. Such a defect may be detected at any stage of the inspection. In such cases it will of course be unnecessary to proceed any further.

"The above Form, when filled up, should be sent with the Recruit to the Depot where he is to be finally inspected, and thence transmitted to the Regiment he may be assigned.

"Defects discovered at the Depot upon reinspection should be endorsed upon the Form and signed by the Surgeon; in case of Rejection, the Assistant Surgeon should be transmitted with the proceedings of the Board of Inspection to the Adjutant General of the Army."

MODE OF EXAMINING A RECRUIT.

(From Tripler's Manual.)

"The Room in which this examination is conducted should be well lighted and large enough to admit of the men being walked about freely, that every organ concerned in locomotion may be subjected to inspection. For obvious reasons, none others than they whose presence is absolutely required, should be admitted to the room."

"The person of the Recruit should be washed *clean* before he is presented to the Surgeon for inspection. It is impossible for the medical officer to ascertain the existence of certain defects that *absolutely disqualify*, when concealed, as they effectually may be, and sometimes are, by incrustations of filth a month old."

"We have remarked that certain defects can be ascertained only by questioning the man himself, and that, in order to avoid all subsequent evasions, the answers to these questions should be recorded on the spot. We shall now suggest a method of effecting this object as well as of making it sure that no important part shall escape inspection through any slip of the memory."

"The Questions should be asked and the man's answers recorded before he is stripped."

"He is then to be divested of *all* his clothing and the examination proceeded with systematically, in the order of regions as indicated in the 'Form.'"

"The Surgeon is to note every peculiarity or deviation from the normal Standard in each particular region. For example: If the man has received at any time a blow upon the head with a resulting cicatrix or slight depression, let it be noted thus: 'Cicatrix and slight depression upon the right parietal protuberance.'"

"Scars upon any part of the person should be noted, and the cause assigned by the man, recorded. It is not uncommon to find marks of free cupping upon the chests of Germans, without there being any indication of disease. These however should be noted."

"If, upon inspection, the man be found to have a Circocele, though not sufficient to disqualify, let it be noted under the proper head; and so of Hemorrhoids or any other affection. The vaccine scar and its position should be noted, and whether vaccination has been practised (.) the rendezvous or depot."

"Under the head of 'Remarks,' Constitutional Syphilis, or other Cachexia, will find a place. If an interpreter is required during the inspection, that fact should be recorded. Men sometimes speak English very well when first examined, who, from after considerations, are entirely ignorant of the language when re-examined, and sometimes succeed in obtaining a discharge in this way."

"By this means an accurate description of the whole person is obtained, [illegible] to settle questions of identity, should such be subsequently raised; and if there be any defects about which a difference of opinion may exist, the fact that such defects were not overlooked by the first inspecting Surgeon, will be apparent."

"It will frequently happen that an 'absolute disqualification' will be discovered before completing the examination. Such a defect may be detected at any stage of the inspection. In such cases it will of course be unnecessary to proceed any further."

"The above Form, when filled up, should be sent with the Recruit to the Depot where he is to be finally inspected, and thence transmitted to the Regiment to which he may be assigned."

"Defects discovered at the Depot upon reinspection should be entered upon the *Form*, and signed by the Surgeon; in case of Rejection, the documents thus completed should be transmitted with the proceedings of the Board of Inspection to the Adjutant General of the Army."

MODE OF EXAMINING A RECRUIT.

(From Tapler's Manual.)

"The Room in which this examination is conducted should be well lighted and large enough to admit of the men being walked about freely, that every organ concerned in locomotion may be subjected to inspection. For obvious reasons, none others than they whose presence is absolutely required, should be admitted to the room."

"The person of the Recruit should be washed *clean* before he is presented to the Surgeon for inspection. It is impossible for the medical officer to ascertain the existence of certain defects that *absolutely disqualify*, when concealed, as they effectually may be, and sometimes are, by incrustations of filth a month old."

"We have remarked that certain defects can be ascertained only by questioning the man himself, and that, in order to avoid all subsequent evasions, the answers to these questions should be recorded on the spot. We shall now suggest a method of effecting this object as well as of making it sure that no important part shall escape inspection through any slip of the memory."

"The Questions should be asked and the man's answers recorded before he is stripped."

"He is then to be divested of *all* his clothing and the examination proceeded with systematically, in the order of regions as indicated in the 'Form.'"

"The Surgeon is to note every peculiarity or deviation from the normal Standard in each particular region. For example: If the man has received at any time a blow upon the head with a resulting cicatrix or slight depression, let it be noted thus: 'Cicatrix and slight depression upon the right parietal protuberance.'"

"Scars upon any part of the person should be noted, and the cause assigned by the man, recorded. It is not uncommon to find marks of free cupping upon the chests of Germans, without there being any indication of disease. These however should be noted."

"If, upon inspection, the man be found to have a Circocele, though not sufficient to disqualify, let it be noted under the proper head; and so of Hæmorrhoids or any other affection. The vaccine scar and its position should be noted, and whether vaccination has been practised at the rendezvous or depot."

"Under the head of 'Remarks,' Constitutional Syphilis, or other Cachexia, will find a place. If an interpreter is required during the inspection, that fact should be recorded. Men sometimes speak English very well when first examined, who, from after considerations, are entirely ignorant of the language when re-examined, and sometimes succeed in obtaining a discharge in this way."

"By this means an accurate description of the whole person is obtained, sufficient to settle questions of identity, should such be subsequently raised; and if there be any defects about which a difference of opinion may exist, the fact that such defects were not overlooked by the first inspecting Surgeon, will be apparent."

"It will frequently happen that an 'absolute disqualification' will be discovered before completing the examination. Such a defect may be detected at any stage of the inspection. In such cases it will of course be unnecessary to proceed any further."

"The above Form, when filled up, should be sent with the Recruit to the Depot where he is to be finally inspected, and thence transmitted to the Regiment to which he may be assigned."

"Defects discovered at the Depot upon reinspection should be endorsed upon the Form, and signed by the Surgeon; in case of Rejection, the document thus completed should be transmitted with the proceedings of the Board of Inspection to the Adjutant General of the Army."

NOTE 1.—This blank will be used for both enlistments and re-enlistments—enlistment of veterans, &c., &c., in the Volunteer service. They will be made out in duplicate in all cases—one to accompany the recruiting return of the superintendent (not the recruiting officer) to the Adjutant General, and one to accompany the account of the officer who pays bounty, &c. The Regiment and Company in which the soldier last served should be given on the back.

NOTE 2.—An enlistment holds to service. A muster-in must, in all cases, precede payment of pay, bounty, pension, &c. A muster-in roll must, in all cases, be filed in the Adjutant General's Office as evidence of muster-in. The mustering officer, (commissary, or assistant commissary of musters, as the case may be, will countersign both enlistments as having mustered the soldier into the service of the United States before either of them is given to the disbursing officer.

MODE OF EXAMINING A RECRUIT.

(From Tripler's Manual.)

"The Room in which this examination is conducted should be well lighted and large enough to admit of the men being walked about freely, that every organ concerned in locomotion may be subjected to inspection. For obvious reasons, none others than they whose presence is absolutely required, should be admitted to the room."

"The person of the Recruit should be washed *clean* before he is presented to the Surgeon for inspection. It is impossible for the medical officer to ascertain the existence of certain defects that *absolutely disqualify*, when concealed, as they effectually may be, and sometimes are, by incrustations of filth a month old."

"We have remarked that certain defects can be ascertained only by questioning the man himself, and that, in order to avoid all subsequent evasions, the answers to these questions should be recorded on the spot. We shall now suggest a method of effecting this object as well as of making it sure that no important part shall escape inspection through any slip of the memory."

"The Questions should be asked and the man's answers recorded before he is stripped."

"He is then to be divested of *all* his clothing and the examination proceeded with systematically, in the order of regions as indicated in the 'Form.'"

"The Surgeon is to note every peculiarity or deviation from the normal standard in each particular region. For example: If the man has received at any time a blow upon the head with a resulting cicatrix or slight depression, let it be noted thus: 'Cicatrix and slight depression upon the right parietal protuberance.'"

"Scars upon any part of the person should be noted, and the cause assigned by the man, recorded. It is not uncommon to find marks of free cupping upon the chests of Germans, without there being any indication of disease. These however should be noted."

"If, upon inspection, the man be found to have a Circocele, though not sufficient to disqualify, let it be noted under the proper head; and so of Hemorrhoids, or any other affection. The vaccine scar and its position should be noted, and whether vaccination has been practised at the recruiting station or depot."

"Under the head of 'Remarks,' Constitutional Syphilis, or other Cachexia, will find a place. If an interpreter is required during the inspection, that fact should be recorded. Men sometimes speak English very well when first examined, who, from after considerations, are entirely ignorant of the language when re-examined, and sometimes succeed in obtaining a discharge in consequence."

"The above means an accurate description of the whole person is obtained, and all possible questions of identity, should such be subsequently raised; and also any defects about which a difference of opinion may arise, the existence of which were not overlooked by the first inspecting Surgeon."

"It will frequently happen that an 'absolute disqualification' will be discovered on completing the examination. Such a defect may be detected in the course of the Inspection. In such cases it will of course be unnecessary to proceed further."

"The above Form, when filled up, should be sent with the Recruit to the Depot where he is to be finally inspected, and thence transmitted to the Regiment to which he may be assigned."

"Any defects discovered at the Depot upon reinspection should be entered on the Form, and signed by the Surgeon; in case of Rejection, the documents received should be transmitted with the proceedings of the Board to the Adjutant General of the Army."

STATE OF Missouri TOWN OF St Louis

I, Peter Berg, born in Prussia, in the State of Missouri, aged Eighteen years, and by occupation a Farmer, Do HEREBY ACKNOWLEDGE to have volunteered this Nineteenth day of August, 1864, to serve as a Soldier in the Army of the United States of America, for the period of ~~THREE~~ ONE YEAR, unless sooner discharged by proper authority: Do also agree to accept such bounty, pay, rations, and clothing, as are, or may be, established by law for volunteers. And I, Peter Berg, do solemnly swear, that I will bear true faith and allegiance to the ***United States of America,*** and that I will serve them honestly and faithfully against all their enemies or opposers whomsoever; and that I will observe and obey the orders of the President of the United States, and the orders of the officers appointed over me, according to the Rules and Articles of War.

MODE OF EXAMINING A RECRUIT.

(From Tripler's Manual.)

"The Room in which this examination is conducted should be well lighted and large enough to admit of the men being walked about freely, that every organ concerned in locomotion may be subjected to inspection. For obvious reasons, none others than they whose presence is absolutely required, should be admitted to the room."

"The person of the Recruit should be washed *clean* before he is presented to the Surgeon for inspection. It is impossible for the medical officer to ascertain the existence of certain defects that *absolutely disqualify*, when concealed, as they effectually may be, and sometimes are, by incrustations of filth a month old."

"We have remarked that certain defects can be ascertained only by questioning the man himself, and that, in order to avoid all subsequent evasions, the answers to these questions should be recorded on the spot. We shall now suggest a method of effecting this object as well as of making it sure that no important part shall escape inspection through any slip of the memory."

"The Questions should be asked and the man's answers recorded before he is stripped."

"He is then to be divested of *all* his clothing and the examination proceeded with systematically, in the order of regions as indicated in the 'Form.'"

"The Surgeon is to note every peculiarity or deviation from the normal Standard in each particular region. For example: If the man has received at any time a blow upon the head with a resulting cicatrix or slight depression, let it be noted thus: 'Cicatrix and slight depression upon the right parietal protuberance.'"

"Scars upon any part of the person should be noted, and the cause assigned by the man, recorded. It is not uncommon to find marks of free cupping upon the chests of Germans, without there being any indication of disease. These however should be noted."

"If, upon inspection, the man be found to have a Circocele, though not sufficient to disqualify, let it be noted under the proper head; and so of Hæmorrhoids or any other affection. The vaccine scar and its position should be noted, and whether vaccination has been practised at the rendezvous or depot."

"Under the head of 'Remarks,' Constitutional Syphilis, or other Cachexia, will find a place. If an interpreter is required during the inspection, that fact should be recorded. Men sometimes speak English very well when first examined, who, from after considerations, are entirely ignorant of the language when re-examined, and sometimes succeed in obtaining a discharge in this way."

"By this means an accurate description of the whole person is obtained sufficient to settle questions of identity, should such be subsequently raised; and if there be any defects about which a difference of opinion may exist, the fact that such defects were not overlooked by the first inspecting Surgeon will be apparent."

"It will frequently happen that an 'absolute disqualification' will be discovered before completing the examination. Such a defect may be detected at any stage of the inspection. In such cases it will of course be unnecessary to proceed any further."

"The above Form, when filled up, should be sent with the Recruit to the Depot where he is to be finally inspected, and thence transmitted to the Regiment to which he may be assigned."

"Defects discovered at the Depot upon reinspection should be endorsed upon the Form, and signed by the Surgeon; in case of Rejection, the document thus completed should be transmitted with the proceedings of the Board of Inspection to the Adjutant General of the Army."

MODE OF EXAMINING A RECRUIT.

(From Tripler's Manual.)

"The Room in which this examination is conducted should be well lighted and large enough to admit of the men being walked about freely, that every organ concerned in locomotion may be subjected to inspection. For obvious reasons, none others than they whose presence is absolutely required, should be admitted to the room."

"The person of the Recruit should be washed clean before he is presented to the Surgeon for inspection. It is impossible for the medical officer to ascertain the existence of certain defects that *absolutely disqualify*, when concealed, as they effectually may be, and sometimes are, by incrustations of filth a month old."

"We have remarked that certain defects can be ascertained only by questioning the man himself, and that, in order to avoid all subsequent evasions, the answers to these questions should be recorded on the spot. We shall now suggest a method of effecting this object as well as of making it sure that no important part shall escape inspection through any slip of the memory."

"The Questions should be asked and the man's answers recorded before he is stripped."

"He is then to be divested of *all* his clothing and the examination proceeded with systematically, in the order of regions as indicated in the 'Form.'"

"The Surgeon is to note every peculiarity or deviation from the normal Standard in each particular region. For example: If the man has received at any time a blow upon the head with a resulting cicatrix or slight depression, let it be noted thus: 'Cicatrix and slight depression upon the right parietal protuberance.'"

"Scars upon any part of the person should be noted, and the cause assigned by the man, recorded. It is not uncommon to find marks of free cupping upon the chests of Germans, without there being any indication of disease. These however should be noted."

"If, upon inspection, the man be found to have a Circocele, though not sufficient to disqualify, let it be noted under the proper head; and so of Hemorrhoids or any other affection. The vaccine scar and its position should be noted, and whether vaccination has been practised at the rendezvous or depot."

"Under the head of 'Remarks,' Constitutional Syphilis, or other Cachexia, will find a place. If an interpreter is required during the inspection, that fact should be recorded. Men sometimes speak English very well when first examined, who, from after considerations, are entirely ignorant of the language when re-examined, and sometimes succeed in obtaining a discharge in this way."

"By this means an accurate description of the whole person is obtained, sufficient to settle questions of identity, should such be subsequently raised; and if there be any defects about which a difference of opinion may exist, the fact that such defects were not overlooked by the first inspecting Surgeon, will be apparent."

"It will frequently happen that an 'absolute disqualification' will be discovered before completing the examination. Such a defect may be detected at any stage of the inspection. In such cases it will of course be unnecessary to proceed any further."

"The above Form, when filled up, should be sent with the Recruit to the Depot where he is to be finally inspected, and thence transmitted to the Regiment to which he may be assigned."

"Defects discovered at the Depot upon reinspection should be endorsed upon the Form, and signed by the Surgeon; in case of Rejection, the document thus completed should be transmitted with the proceedings of the Board of Inspection to the Adjutant General of the Army."

MODE OF EXAMINING A RECRUIT.

(From Tripler's Manual.)

"The Room in which this examination is conducted should be well lighted and large enough to admit of the men being walked about freely, that every organ concerned in locomotion may be subjected to inspection. For obvious reasons, none others than they whose presence is absolutely required, should be admitted to the room."

"The person of the Recruit should be washed clean before he is presented to the Surgeon for inspection. It is impossible for the medical officer to ascertain the existence of certain defects that *absolutely disqualify*, when concealed, as they effectually may be, and sometimes are, by incrustations of dirt a month old."

"We have remarked that certain defects can be ascertained only by questioning the man himself, and that, in order to avoid all subsequent evasions, the answers to these questions should be recorded on the spot. We shall now suggest a method of effecting this object as well as of making it sure that no important part shall escape inspection through any slip of the memory."

"The Questions should be asked and the man's answers recorded before he is stripped."

"He is then to be divested of *all* his clothing and the examination proceeded with systematically, in the order of regions as indicated in the 'Form.'"

"The Surgeon is to note every peculiarity or deviation from the normal Standard in each particular region. For example: If the man has received at any time a blow upon the head with a resulting cicatrix or slight depression, let it be noted thus: 'Cicatrix and slight depression upon the right parietal protuberance.'"

"Scars upon any part of the person should be noted, and the cause assigned by the man, recorded. It is not uncommon to find marks of free cupping upon the chests of Germans, without there being any indication of disease. These however should be noted."

"If, upon inspection, the man be found to have a Circocele, though not sufficient to disqualify, let it be noted under the proper head; and so of Hæmorrhoids or any other affection. The vaccine scar and its position should be noted, and whether vaccination has been practised at the rendezvous or depot."

"Under the head of 'Remarks,' Constitutional Syphilis, or other Cachexia, will find a place. If an interpreter is required during the inspection, that fact should be recorded. Men sometimes speak English very well when first examined, who, from after considerations, are entirely ignornat of the language when re-examined, and sometimes succeed in obtaining a discharge in this way."

"By this means an accurate description of the whole person is obtained sufficient to settle questions of identity, should such be subsequently raised, and if there be any defects about which a difference of opinion may exist, the fact that such defects were not overlooked by the first inspecting Surgeon will be apparent."

"It will frequently happen that an 'absolute disqualification' will be discovered before completing the examination. Such a defect may be detected at any stage of the inspection. In such cases it will of course be unnecessary to proceed any further."

"The above Form, when filled up, should be sent with the Recruit to the Depot where he is to be finally inspected, and thence transmitted to the Regiment to which he may be assigned."

"Defects discovered at the Depot upon reinspection should be endorsed upon the Form, and signed by the Surgeon; in case of Rejection, the document thus completed should be transmitted with the proceedings of the Board of Inspection to the Adjutant General of the Army."

MODE OF EXAMINING A RECRUIT.

(From Tripler's Manual.)

"The Room in which this examination is conducted should be well lighted and large enough to admit of the men being walked about freely, that every organ concerned in locomotion may be subjected to inspection. For obvious reasons, none others than they whose presence is absolutely required, should be admitted to the room."

"The person of the Recruit should be washed *clean* before he is presented to the Surgeon for inspection. It is impossible for the medical officer to ascertain the existence of certain defects that *absolutely disqualify*, when concealed, as they effectually may be, and sometimes are, by incrustations of dirt a month old."

"We have remarked that certain defects can be ascertained only by questioning the man himself, and that, in order to avoid all subsequent evasions, the answers to these questions should be recorded on the spot. We shall now suggest a method of effecting this object as well as ... making it sure that no important part shall escape inspection through any slip of the memory."

"The Questions should be asked and the man's answers recorded before he is stripped."

"He is then to be divested of *all* his clothing and the examination proceeded with systematically, in the order of regions as indicated in the 'Form.'"

"The Surgeon is to note every peculiarity or deviation from the normal Standard in each particular region. For example: If the man has received at any time a blow upon the head with a resulting cicatrix or slight depression, let it be noted thus: 'Cicatrix and slight depression upon the right parietal protuberance.'"

"Scars upon any part of the person should be noted, and the cause assigned by the man, recorded. It is not uncommon to find marks of free cupping upon the chests of Germans, without there being any indication of disease. These however should be noted."

"If, upon inspection, the man be found to have a Circocele, though not sufficient to disqualify, let it be noted under the proper head; and so of Hemorrhoids or any other affection. The vaccine scar and its position should be noted, and whether vaccination has been practised at the rendezvous or depot."

NOTE 1.—This blank will be used for both enlistments and re-enlistments—enlistment of veterans, &c., &c., in the volunteer service. They will be made out in duplicate in all cases—one to accompany the recruiting return of the superintendent (not the recruiting officer) to the Adjutant General, and one to accompany the accounts of the officer who pays bounty, &c. The Regiment and Company in which the soldier last served should be given on the back.

NOTE 2.—An enlistment holds to service. A muster-in must, in all cases, precede payment of pay, bounty, pension, &c. A muster-in roll must, in all cases, be filed in the Adjutant General's Office as evidence of muster-in. The mustering officer's certificate, or enlistment contemporary of muster, as the case may be, will countersign both enlistments on having mustered the soldier into the service of the United States. Each is prior to the deserting officer.

MODE OF EXAMINING A RECRUIT.

(From Tripler's Manual.)

"The Room in which this examination is conducted should be well lighted and large enough to admit of the men being walked about freely, that every organ concerned in locomotion may be subjected to inspection. For obvious reasons, none others than they whose presence is absolutely required, should be admitted to the room."

"The person of the Recruit should be washed *clean* before he is presented to the Surgeon for inspection. It is impossible for the medical officer to ascertain the existence of certain defects that *absolutely disqualify*, when concealed, as they effectually may be, and sometimes are, by incrustations of filth a month old."

"We have remarked that certain defects can be ascertained only by questioning the man himself, and that, in order to avoid all subsequent evasions, the answers to these questions should be recorded on the spot. We shall now suggest a method of effecting this object as well as of making it sure that no important part shall escape inspection through any slip of the memory."

"The Questions should be asked and the man's answers recorded before he is stripped."

"He is then to be divested of *all* his clothing and the examination proceeded with systematically, in the order of regions as indicated in the 'Form.'"

"The Surgeon is to note every peculiarity or deviation from the normal Standard in each particular region. For example: If the man has received at any time a blow upon the head with a resulting cicatrix or slight depression, let it be noted thus: 'Cicatrix and slight depression upon the right parietal protuberance.'"

"Scars upon any part of the person should be noted, and the cause assigned by the man, recorded. It is not uncommon to find marks of free cupping upon the chests of Germans, without there being any indication of disease. These however should be noted."

"If, upon inspection, the man be found to have a Circocele, though not sufficient to disqualify, let it be noted under the proper head; and so of Hæmorrhoids or any other affection. The vaccine scar and its position should be noted, and whether vaccination has been practised at the rendezvous or depot."

"Under the head of 'Remarks,' Constitutional Syphilis, or other Cachexia, will find a place. If an interpreter is required during the inspection, that fact should be recorded. Men sometimes speak English very well when first examined, who, from after considerations, are entirely ignorant of the language when re-examined, and sometimes succeed in obtaining a discharge in this way."

"By this means an accurate description of the whole person is obtained, sufficient to settle questions of identity, should such be subsequently raised; and if there be any defects about which a difference of opinion may exist, the fact that such defects were not overlooked by the first inspecting Surgeon, will be apparent."

"It will frequently happen that an 'absolute disqualification' will be discovered before completing the examination. Such a defect may be detected at any stage of the inspection. In such cases it will of course be unnecessary to proceed any further."

"The above Form, when filled up, should be sent with the Recruit to the Depot where he is to be finally inspected, and thence transmitted to the Regiment to which he may be assigned."

"Defects discovered at the Depot upon reinspection should be endorsed upon the Form, and signed by the Surgeon; in case of Rejection, the document thus completed should be transmitted with the proceedings of the Board of Inspection to the Adjutant General of the Army."

ARTICLES OF WAR.

ART. 93. When any non-commissioned officer or soldier shall die, or be killed in the service of the United States, the then commanding officer of the troop or company shall, in the presence of two other commissioned officers, take an account of what effects he died possessed of, above his arms and accoutrements, and transmit the same to the office of the Department of War, which said effects are to be accounted for, and paid to the representatives of such deceased non-commissioned officer or soldier. And in case any of the officers, so authorized to take care of the effects of deceased officers and soldiers, should, before they have accounted to their representatives for the same, have occasion to leave the regiment or post, by preferment or otherwise, they shall, before they be permitted to quit the same, deposit in the hands of the commanding officer, or of the assistant military agent, all the effects of such deceased non-commissioned officers and soldiers, in order that the same may be secured for, and paid to, their respective representatives.

ARMY REGULATIONS—EDITION OF 1861.

DECEASED SOLDIERS.

PAR. 152. Inventories of the effects of deceased non-commissioned officers and soldiers, required by the 95th Article of War, will be forwarded to the Adjutant General, by the commander of the company to which the deceased belonged, and a duplicate of the same to the colonel of the regiment. Final statements of pay, clothing, &c., will be sent with the inventories. When a soldier dies at a post or station absent from his company, it will be the duty of his immediate commander to furnish the required inventory, and, at the same time, to forward to the commanding officer of the company to which the soldier belonged, a report of his death, specifying the date, place, and cause; to what time he was last paid, and the money or other effects in his possession at the time of his decease; which report will be noted on the next muster roll of the company to which the man belonged. Each inventory will be endorsed, "Inventory of the effects of ——— ———, late of company (—) ——— regiment of ———, who died at ———, the——— day of ———, 186-." If a legal representative receive the effects, it will be stated in the report. If the soldier leave no effects, the fact will be reported.

PAR. 153. Should the effects of a deceased non-commissioned officer or soldier not be administered upon within a short period after his decease, they shall be disposed of by a Council of Administration, under the authority of the commanding officer of the post, and the proceeds deposited with the Paymaster, to the credit of the United States, until they shall be claimed by the legal representatives of the deceased.

PAR. 154. In all such cases of sales by the Council of Administration a statement in detail, or account of the proceeds, duly certified by the Council and commanding officer, accompanied by the Paymaster's receipt for the proceeds, will be forwarded by the commanding officer to the Adjutant General. The statement will be endorsed, "Report of sales of the effects, of ——— ———, late of company (—) ——— regiment of ———, who died at ———, the ——— day of ———, 186-."

NOTE 1.—The effects in all cases, when called for, shall be turned over to the legal representative, without further authority from the Adjutant General. When the effects are turned over to the relatives of the deceased before these inventories are sent in the Adjutant General, a receipt therefor should be attached to the inventories. In all other cases they will be sent with a letter of transmittal direct to the Adjutant General, and a duplicate retained by the officer.

NOTE 2.—Particular care should be taken to take receipts in all cases from the Paymaster for any funds turned over to him; and such receipts should be forwarded to the Adjutant General and not returned by the Auditor.

FINAL STATEMENT

OF

Rudolph Bischoff

4th Reg't of Ind'y Mtn

VOLUNTEERS.

Last Sept 1865

NOTE 1.—*Two* of these certificates (or duplicates) are to be given to each Volunteer Soldier or drafted man who may be discharged without being mustered out (Final Statements are never given to men mustered out of service,) that he may at once receive from the Paymaster the pay, &c., due him, and the captain or other COMMISSIONED officer commanding the company will certify to the act of the delivery of the duplicate certificates; with these certificates the Soldier is "entitled to" his *discharge*, and should also present his discharge to the Paymaster to have the payment endorsed on it. The discharge is to be given back to the Soldier by the Paymaster; the latter only retaining as his vouchers the duplicate certificates.

NOTE 2.—If the Soldier is entitled to pay for the use of his horse, the Company Commander will certify to that fact on the back of both these final statements, and also to the time he has pay due for having been so mounted on his own horse.

NOTE 3.—When a Soldier is furnished with final statements, his descriptive list, if he has one, should be taken up by the officer who gives the Soldier these statements, and endorsed with a statement to this effect by the officer. The endorsement should exhibit a full statement of the time for which the Soldier was allowed pay on his final statements, the clothing account, and all other charges against him or in his favor, so as to comprise a complete exhibit of his account. It will then be transmitted to the Company Commander of the Soldier, who will enter all the data necessary to a full understanding of the Soldier's account on the muster roll upon which the Soldier's discharge is reported. The descriptive list will then be destroyed. The object of this is, that the remaining portion of the Soldier's account may be settled upon the receipt of these muster rolls, and the Soldier receive any pay or allowances that may be due him at the time of his discharge, and which may not appear on his last final statements from the fact that his descriptive list is incomplete. These accounts for back pay, &c., are settled by the 2d Auditor of the Treasury Department.

NOTE 4.—Charges for loss or injury to ordnance, horse equipments, and other miscellaneous charges, should appear under the heading of "Other Stoppages."

NOTE 5.—Bounty paid by State authorities and not by the United States will not be entered on this statement.

NOTE 6.—Amount[illegible] the Sutler and Laundress must be entered on the muster roll on which the discharge, death, desertion, &c., is reported, as well as on the final statements. Others whose account cannot be collected from the United States.

NOTE 7.—This blank will be used for deceased volunteers and drafted men, as well as for others.

NOTE 8.—Where a Soldier dies in Hospital or on detached service, his descriptive list, if he has one, should be sent with his final statements, in duplicate, to the Adjutant General, Washington, D. C.

NOTE 9.—If the soldier is a drafted man or substitute, the space for time, &c., of enrolled, should contain only the word *drafted or substitute*, as the case may be. If the Soldier is a "VETERAN," (or RECRUIT,) the words *as a veteran*, (or recruit,) as the case may be, should be interlined after the words *mustered into the service of the U. S.* A statement of all the installments of *Veteran* or *Recruit Bounty* RECEIVED by the Soldier must be made on the back of each final statement.

MODE OF EXAMINING A RECRUIT.

(From Tripler's Manual.)

"The Room in which this examination is conducted should be well lighted and large enough to admit of the men being walked about freely, that every organ concerned in locomotion may be subjected to inspection. For obvious reasons, none others than they whose presence is absolutely required, should be admitted to the room."

"The person of the Recruit should be washed *clean* before he is presented to the Surgeon for inspection. It is impossible for the medical officer to ascertain the existence of certain defects that *absolutely disqualify*, when concealed, as they effectually may be, and sometimes are, by incrustations of filth a month old."

"We have remarked that certain defects can be ascertained only by questioning the man himself, and that, in order to avoid all subsequent evasions, the answers to these questions should be recorded on the spot. We shall now suggest a method of effecting this object as well as of making it sure that no important part shall escape inspection through any slip of the memory."

"The Questions should be asked and the man's answers recorded before he is stripped."

"He is then to be divested of *all* his clothing and the examination proceeded with systematically, in the order of regions as indicated in the 'Form.'"

"The Surgeon is to note every peculiarity or deviation from the normal standard in each particular region. For example: If the man has received at any time a blow upon the head with a resulting cicatrix or slight depression, let it be noted thus: 'Cicatrix and slight depression upon the right parietal protuberance.'"

"Scars upon any part of the person should be noted, and the cause assigned by the man, recorded. It is not uncommon to find marks of free cupping upon the chests of Germans, without there being any indication of disease. These however should be noted."

"If, upon inspection, the man be found to have a Circocele, though not sufficient to disqualify, let it be noted under the proper head; and so of Hæmorrhoids or any other affection. The vaccine scar and its position should be noted, and whether vaccination has been practised at the rendezvous or depot."

"Under the head of 'Remarks,' Constitutional Syphilis, or other Cachexia, will find a place. If an interpreter is required during the inspection, that fact should be recorded. Men sometimes speak English very well when first examined, who, from after considerations, are entirely ignorant of the language when re-examined, and sometimes succeed in obtaining a discharge in this way."

"By this means an accurate description of the whole person is obtained, sufficient to settle questions of identity, should such be subsequently raised; and if there be any defects about which a difference of opinion may exist, the fact that such defects were not overlooked by the first inspecting Surgeon, will be apparent."

"It will frequently happen that an 'absolute disqualification' will be discovered before completing the examination. Such a defect may be detected at any stage of the inspection. In such cases it will of course be unnecessary to proceed any further."

"The above Form, when filled up, should be sent with the Recruit to the Depot where he is to be finally inspected, and thence transmitted to the Regiment to which he may be assigned."

"All Defects discovered at the Depot upon reinspection should be endorsed upon the Form, and signed by the Surgeon; in case of Rejection, the documents thus completed should be transmitted with the proceedings of the Board of Inspection to the Adjutant General of the Army."

MODE OF EXAMINING A RECRUIT.

(From Tripler's Manual.)

"The Room in which this examination is conducted should be well lighted and large enough to admit of the men being walked about freely, that every organ concerned in locomotion may be subjected to inspection. For obvious reasons, none others than they whose presence is absolutely required, should be admitted to the room."

"The person of the Recruit should be washed clean before he is presented to the Surgeon for inspection. It is impossible for the medical officer to ascertain the existence of certain defects that *absolutely disqualify*, when concealed, as they effectually may be, and sometimes are, by incrustations of filth a month old."

"We have remarked that certain defects can be ascertained only by questioning the man himself, and that, in order to avoid all subsequent evasions, the answers to these questions should be recorded on the spot. We shall now suggest a method of effecting this object as well as of making it sure that no important part shall escape inspection through any slip of the memory."

"The Questions should be asked and the man's answers recorded before he is stripped."

"He is then to be divested of *all* his clothing and the examination proceeded with systematically, in the order of regions as indicated in the 'Form.'"

"The Surgeon is to note every peculiarity or deviation from the normal Standard in each particular region. For example: If the man has received at any time a blow upon the head with a resulting cicatrix or slight depression, let it be noted thus: 'Cicatrix and slight depression upon the right parietal protuberance.'"

"Scars upon any part of the person should be noted, and the cause assigned by the man, recorded. It is not uncommon to find marks of free cupping upon the chests of Germans, without there being any indication of disease. These however should be noted."

"If, upon inspection, the man be found to have a Circocele, though not sufficient to disqualify, let it be noted under the proper head; and so of Hæmorrhoids or any other affection. The vaccine scar and its position should be noted, and whether vaccination has been practised at the rendezvous or depot."

"Under the head of 'Remarks,' Constitutional Syphilis, or other Cachexia, will find a place. If an interpreter is required during the inspection, that fact should be recorded. Men sometimes speak English very well when first examined, who, from after considerations, are entirely ignorant of the language when re-examined, and sometimes succeed in obtaining a discharge in this way."

"By this means an accurate description of the whole person is obtained, sufficient to settle questions of identity, should such be subsequently raised; and if there be any defects about which a difference of opinion may exist, the fact that such defects were not overlooked by the first inspecting Surgeon, will be apparent."

"It will frequently happen that an 'absolute disqualification' will be discovered before completing the examination. Such a defect may be detected at any stage of the inspection. In such cases it will of course be unnecessary to proceed any further."

"The above Form, when filled up, should be sent with the Recruit to the Depot where he is to be finally inspected, and thence transmitted to the Regiment to which he may be assigned."

"Defects discovered at the Depot upon reinspection should be endorsed upon the Form, and signed by the Surgeon; in case of Rejection, the document thus completed should be transmitted with the proceedings of the Board of Inspection to the Adjutant General of the Army."

MODE OF EXAMINING A RECRUIT.

(From Tripler's Manual.)

"The Room in which this examination is conducted should be well lighted and large enough to admit of the men being walked about freely, that every organ concerned in locomotion may be subjected to inspection. For obvious reasons, none others than they whose presence is absolutely required, should be admitted to the room."

"The person of the Recruit should be washed *clean* before he is presented to the Surgeon for inspection. It is impossible for the medical officer to ascertain the existence of certain defects that *absolutely disqualify*, when concealed, as they effectually may be, and sometimes are, by incrustations of filth a month old."

"We have remarked that certain defects can be ascertained only by questioning the man himself, and that, in order to avoid all subsequent evasions, the answers to these questions should be recorded on the spot. We shall now suggest a method of effecting this object as well as of making it sure that no important part shall escape inspection through any slip of the memory."

"The Questions should be asked and the man's answers recorded before he is stripped."

"He is then to be divested of *all* his clothing and the examination proceeded with systematically, in the order of 'regions as indicated in the 'Form.'"

"The Surgeon is to note every peculiarity or deviation from the normal Standard in each particular region. For example: If the man has received at any time a blow upon the head with a resulting cicatrix or slight depression, let it be noted thus: 'Cicatrix and slight depression upon the right parietal protuberance.'"

"Scars upon any part of the person should be noted, and the cause assigned by the man, recorded. It is not uncommon to find marks of free cupping upon the chests of Germans, without there being any indication of disease. These however should be noted."

"If, upon inspection, the man be found to have a Circocele, though not sufficient to disqualify, let it be noted under the proper head; and so of Hæmorrhoids or any other affection. The vaccine scar and its position should be noted, and whether vaccination has been practised at the rendezvous or depot."

"Under the head of 'Remarks,' Constitutional Syphilis, or other Cachexia, will find a place. If an interpreter is required during the inspection, that fact should be recorded. Men sometimes speak English very well when first examined, who, from after considerations, are entirely ignorant of the language when re-examined, and sometimes succeed in obtaining a discharge in this way."

"By this means an accurate description of the whole person is obtained, sufficient to settle questions of identity, should such be subsequently raised; and if there be any defects about which a difference of opinion may exist, the fact that such defects were not overlooked by the first inspecting Surgeon, will be apparent."

"It will frequently happen that an 'absolute disqualification' will be discovered before completing the examination. Such a defect may be detected at any stage of the inspection. In such cases it will of course be unnecessary to proceed any further."

"The above Form, when filled up, should be sent with the Recruit to the Depot where he is to be finally inspected, and thence transmitted to the Regiment to which he may be assigned."

"Defects discovered at the Depot upon reinspection should be endorsed upon the Form, and signed by the Surgeon; in case of Rejection, the document thus completed should be transmitted with the proceedings of the Board of Inspection to the Adjutant General of the Army."

It is impossible for the medical officer to ascertain the existence of certain defects that *absolutely disqualify*, when concealed, as they effectually may be, and sometimes are, by incrustations of but a month old."

"We have remarked that certain defects can be ascertained only by questioning the man himself, and that, in order to avoid all subsequent evasions, the answers to these questions should be recorded on the spot. We shall now suggest a method of effecting this object as well as of making it sure that no important part shall escape inspection through any slip of the memory."

"The Questions should be asked and the man's answers recorded before he is stripped."

"He is then to be divested of *all* his clothing and the examination proceeded with systematically, in the order of regions as indicated in the 'Form.'"

"The Surgeon is to note every peculiarity or deviation from the normal Standard in each particular region. For example: If the man has received at any time a blow upon the head with a requiting cicatrix or slight depression, let it be noted thus: 'Cicatrix and slight depression upon the right parietal protuberance.'"

"Scars upon any part of the person should be noted, and the cause assigned by the man, recorded. It is not uncommon to find marks of free cupping upon the chests of Germans, without there being any indication of disease. These however should be noted."

"If, upon inspection, the man be found to have a Circocele, though not sufficient to disqualify, let it be noted under the proper head; and so of Hæmorrhoids or any other affection. The vaccine scar and its position should be noted, and whether vaccination has been practised at the rendezvous or depot."

"Under the head of 'Remarks,' Constitutional Syphilis, or other Cachexia, will find a place. If an interpreter is required during the inspection, this fact should be recorded. Men sometimes speak English very well when first examined, who, from after considerations, are entirely ignorant of the language when re-examined, and sometimes succeed in obtaining a discharge in this way."

"By this means an accurate description of the whole person is obtained, useful at to settle questions of identity, should such be subsequently raised; and if there be any defects about which a difference of opinion may exist, the fact that such defects were not overlooked by the first inspecting Surgeon, will be apparent."

"It will frequently happen that an 'absolute disqualification' will be discovered before completing the examination. Such a defect may be detected at any stage of the inspection. In such cases it will of course be unnecessary to proceed any further."

"The above Form, when filled up, should be sent with the Recruit to the Depot where he is to be finally inspected, and thence transmitted to the Regiment to which he may be assigned."

"Defects discovered at the Depot upon reinspection should be endorsed upon the Form, and signed by the Surgeon; in case of Rejection, the document thus completed should be transmitted with the proceedings of the Board of Inspection to the Adjutant General of the Army."

Inspecting Surgeon.

[A. G. O. No. 80—First.]

NOTE 1.

The company commander will here add a statement of all the *facts* known to him concerning the disease or wound, or cause of disability of the soldier; the time, place, manner, and all the circumstances under which the injury occurred, or disease originated or appeared; the duty, or service, or situation of the soldier at the time the injury was received or disease contracted, stating particularly whether the injury was received or disease contracted in the line of his duty; and whatever other facts may aid a judgment as to the cause, immediate or remote, of the disability, and the circumstances attending it.

When the *facts* are not known to the company commander, the certificate of any officer, or affidavit of other person having such knowledge will be appended—as the surgeon in charge of a hospital, the officer commanding a detachment of recruits, &c., &c.

NOTE 2.

When a *probable* case for *pension*, *special care* must be taken to describe the *degree* of disability—as ½, ¼, &c., &c.; to describe particularly the disability, wound or disease; the extent to which it deprives him of the use of any limb or faculty, or affects his health, strength, activity, constitution, or capicity to labor or earn his subsistence. The surgeon will add, from his knowledge of the facts and circumstances, and from the evidence in the case, his professional opinion of the cause or origin of the disability. In the case of discharges by Medical Inspectors, the last paragraph will state that the "discharge was given by consent of the soldier, after a personal examination, and for disability, the nature, degree, and origin of which are correctly described in the within certificate."

Par. 1260 Regulations, Edit. 1861.

Medical officers, in giving certificates of disability, are to take particular care in all cases that have not been under their charge; and especially in epilepsy, convulsions, chronic rheumatism, derangement of the urinary organs, ophthalmia, ulcers, or any obscure disease liable to be feigned or purposely produced; and in no case shall such certificate be given until after sufficient time and examination to detect any attempt at deception.

DIRECTIONS.

This certificate will be made out in *duplicate* by the soldier's company commander, or other officer commanding the separate detachment to which he belongs, and sent by him to the surgeon who has charge of the hospital where the soldier is sick. The surgeon will then fill out and sign the surgeon's certificate, and forward these papers to the regimental, detachment, or post commander, who will forward them, with his action endorsed thereon, through the proper channel to his division commander; or if the troops are not attached to a division, to his corps, department, or other commander or officer to whom the authority to discharge enlisted men may be specially delegated.

These certificates, after having received the action of the highest authority to which they are required to be sent, will be returned through the same channel to the regimental, post, or detachment commander, who will, if the discharge is authorized by the endorsement of the proper authority, sign the soldier's discharge, and the last certificate on this paper; see that the soldier is furnished with the proper final statements in duplicate, and forward both of these certificates *direct* to the Adjutant General United States Army, at Washington, D. C.; they will not under any circumstances be given into the hands of the soldier.

"The Room in which this examination is conducted should be well lighted and large enough to admit of the men being walked about freely, that every organ concerned in locomotion may be subjected to inspection. For obvious reasons, none others than they whose presence is absolutely required, should be admitted to the room."

"The person of the Recruit should be *washed clean* before he is presented to the Surgeon for inspection. It is impossible for the medical officer to ascertain the existence of certain defects that *absolutely disqualify*, when concealed, as they effectually may be, and sometimes are, by incrustations of filth a month old."

"We have remarked that certain defects can be ascertained only by questioning the man himself, and that, in order to avoid all subsequent evasions, the answers to these questions should be recorded on the spot. We shall now suggest a method of effecting this object as well as of making it sure that no important part shall escape inspection through any slip of the memory."

"The Questions should be asked and the man's answers recorded before he is stripped."

"He is then to be divested of all his clothing and the examination proceeded with systematically, in the order of regions as indicated in the 'Form.'"

"The Surgeon is to note every peculiarity or deviation from the normal Standard in each particular region. For example: If the man has received at any time a blow upon the head with a resulting cicatrix or slight depression, let it be noted thus: 'Cicatrix and slight depression upon the right parietal protuberance.'"

"Scars upon any part of the person should be noted, and the cause assigned by the man, recorded. It is not uncommon to find marks of free cupping upon the chests of Germans, without there being any indication of disease. These however should be noted."

"If, upon inspection, the man be found to have a Circocele, though not sufficient to disqualify, let it be noted under the proper head; and so of Hæmorrhoids or any other affection. The vaccine scar and its position should be noted, and whether vaccination has been practised at the rendezvous or depot."

"Under the head of 'Remarks,' Constitutional Syphilis, or other Cachexia, will find a place. If an interpreter is required during the inspection, that fact should be recorded. Men sometimes speak English very well when first examined, who, from after considerations, are entirely ignorant of the language when re-examined, and sometimes succeed in obtaining a discharge in this way."

"By this means an accurate description of the whole person is obtained, sufficient to settle questions of identity, should such ever be subsequently raised; and if there be any defects about which a difference of opinion may exist, the fact that such defects were not overlooked by the first Inspecting Surgeon, will be apparent."

"It will frequently happen that an 'absolute disqualification' will be discovered before completing the examination. Such a defect may be detected at any stage of the inspection. In such cases it will of course be unnecessary to proceed any further."

"The above Form, when filled up, should be sent with the Recruit to the Depot where he is to be finally inspected, and thence transmitted to the Regiment to which he may be assigned."

"Defects discovered at the Depot upon reinspection should be endorsed upon the Form, and signed by the Surgeon; in case of Rejection, the documents thus completed should be transmitted with the proceedings of the Board of Inspection to the Adjutant General of the Army."

Note 1.—This blank will be used for both enlistments and reenlistments—enlistment of veterans, &c., in the veteran service. They will be made out in duplicate in all cases—one to accompany the recruiting return of the superintendent (not the recruiting officer) to the Adjutant General, and one to accompany the accounts of the officer who pays bounty, &c. The Regiment and Company in which the soldier last served should be given on the back.

Note 2.—An enlistment holds to service. A muster-in must, in all cases, precede payment in the Adjutant General's Office as evidence of muster-in. The mustering officer, commissary, or assistant commissary of musters, as the case may be, will countersign both enlistments as having mustered the soldier into the service of the United States before either of them is given to the disbursing officer.

CONSENT IN CASE OF MINOR.

I, John H. Bademan, DO CERTIFY, That I am the Father of John Bademan; that the said John Bademan is Seventeen years of age; and I do hereby freely give my CONSENT to his volunteering as a SOLDIER in the ARMY OF THE UNITED STATES for the period of ~~three~~ one YEARS.

MODE OF EXAMINING A RECRUIT.

(From Tripler's Manual.)

"The Room in which this examination is conducted should be well lighted and large enough to admit of the men being walked about freely, that every organ concerned in locomotion may be subjected to inspection. For obvious reasons, none others than they whose presence is absolutely required, should be admitted to the room."

"The person of the Recruit should be washed clean before he is presented to the Surgeon for inspection. It is impossible for the medical officer to ascertain the existence of certain defects that *absolutely disqualify*, when concealed, as they effectually may be, and sometimes are, by incrustations of dirt a month old."

"We have remarked that certain defects can be ascertained only by questioning the man himself, and that, in order to avoid all subsequent evasions, the answers to these questions should be recorded on the spot. We shall now suggest a method of effecting this object as well as of making it sure that no important part shall escape inspection through any slip of the memory."

"The Questions should be asked and the man's answers recorded before he is stripped."

"He is then to be divested of *all* his clothing and the examination proceeded with systematically, in the order of regions as indicated in the 'Form.'"

"The Surgeon is to note every peculiarity or deviation from the normal Standard in each particular region. For example: If the man has received at any time a blow upon the head with a resulting cicatrix or slight depression, let it be noted thus: 'Cicatrix and slight depression upon the right parietal protuberance.'"

"Scars upon any part of the person should be noted, and the cause assigned by the man, recorded. It is not uncommon to find marks of free cupping upon the chests of Germans, without there being any indication of disease. These however should be noted."

"If, upon inspection, the man be found to have a Circocele, though not sufficient to disqualify, let it be noted under the proper head; and so of hæmorrhoids or any other affection. The vaccine scar and its position should be noted, and whether vaccination has been practised at the rendezvous or depot."

"Under the head of 'Remarks,' Constitutional Syphilis, or other Cachexia, will find a place. If an interpreter is required during the inspection, that fact should be recorded. Men sometimes speak English very well when first examined, who, from after considerations, are entirely ignorant of the language when re-examined, and sometimes succeed in obtaining a discharge in this way."

"By this means an accurate description of the whole person is obtained, sufficient to settle questions of identity, should such be subsequently raised; and if there be any defects about which a difference of opinion may exist, the fact that such defects were not overlooked by the first inspecting Surgeon, will be apparent."

"It will frequently happen that an 'absolute disqualification' will be discovered before completing the examination. Such a defect may be detected at any stage of the inspection. In such cases it will of course be unnecessary to proceed any further."

"The above Form, when filled up, should be sent with the Recruit to the Depot where he is to be finally inspected, and thence transmitted to the Regiment to which he may be assigned."

"Defects discovered at the Depot upon reinspection should be endorsed upon the Form, and signed by the Surgeon; in case of Rejection, the document thus completed should be transmitted with the proceedings of the Board of Inspection to the Adjutant General of the Army."

MODE OF EXAMINING A RECRUIT.

(From Tripler's Manual.)

"The Room in which this examination is conducted should be well lighted and large enough to admit of the men being walked about freely, that every organ concerned in locomotion may be subjected to inspection. For obvious reasons, none others than they whose presence is absolutely required, should be admitted to the room."

"The person of the Recruit should be washed clean before he is presented to the Surgeon for inspection. It is impossible for the medical officer to ascertain the existence of certain defects that *absolutely disqualify*, when concealed, as they effectually may be, and sometimes are, by incrustations of filth a month old."

"We have remarked that certain defects can be ascertained only by questioning the man himself, and that, in order to avoid all subsequent evasions, the answers to these questions should be recorded on the spot. We shall here suggest a method of effecting this object as well as of making it sure that no important part shall escape inspection through any slip of the memory."

"The Questions should be asked and the man's answers recorded before he is stripped."

"He is then to be divested of *all* his clothing and the examination proceeded with systematically, in the order of regions as indicated in the 'Form.'"

"The Surgeon is to note every peculiarity or deviation from the normal standard in each particular region. For example: If the man has received at any time a blow upon the head with a resulting cicatrix or slight depression, let it be noted thus: 'Cicatrix and slight depression upon the right parietal protuberance.'"

"Scars upon any part of the person should be noted, and the cause assigned by the man, recorded. It is not uncommon to find marks of free cupping upon the chests of Germans, without there being any indication of disease. These however should be noted."

"If, upon inspection, the man be found to have a Cirrocele, though not sufficient to disqualify, let it be noted under the proper head; and so of Varicocele, or any other affection. The vaccine scar and its position should be noted, and whether vaccination has been practised at the rendezvous or depot."

"Under the head of 'Dyscrasia,' Constitutional Syphilis, or other Cachexia, [illegible] plans. If an Interpreter is required during the inspection, that fact should be recorded. Men sometimes speak English very well when first examined, when from [illegible] examination, are entirely ignorant of the language when re-examined, and sometimes succeed in obtaining a discharge in this way."

"[illegible] an accurate description of the whole person is obtained, [illegible] the questions of identity, should such be subsequently raised; [illegible] defects about which a difference of opinion may exist, the [illegible] should never be overlooked by the first inspecting Surgeon, [illegible]."

"It frequently happens that an 'absolute disqualification' will be discovered before completing the examination. Such a defect may be detected [illegible] beginning of the inspection. In such cases it will of course be unnecessary [illegible] any further."

"[illegible] Force, when filled up, should be sent with the Recruit to the [illegible] he is to be finally inspected, and thence transmitted to the [illegible] to which he may be assigned."

"[illegible] of the Depot upon subsequently should be endorsed [illegible] by the Surgeon; in case of [illegible] the reason [illegible] be transmitted, with the [illegible] of the Recruit [illegible] Adjutant General's Office."

MODE OF EXAMINING A RECRUIT.

(From Tripler's Manual.)

"The Room in which this examination is conducted should be well lighted and large enough to admit of the men being walked about freely, that every organ concerned in locomotion may be subjected to inspection. For obvious reasons, none others than they whose presence is absolutely required, should be admitted to the room."

"The person of the Recruit should be washed *clean* before he is presented to the Surgeon for inspection. It is impossible for the medical officer to ascertain the existence of certain defects that *absolutely disqualify*, when concealed, as they effectually may be and sometimes are, by incrustations of filth a month old."

"We have remarked that certain defects can be ascertained only by questioning the man himself, and that, in order to avoid all subsequent evasions, the answers to these questions should be recorded on the spot. We shall now suggest a method of effecting this object as well as of making it sure that no important part shall escape inspection through any slip of the memory."

"The Questions should be asked and the man's answers recorded before he is stripped."

"He is then to be divested of *all* his clothing and the examination proceeded with systematically, in the order of regions as indicated in the 'Form.'"

"The Surgeon is to note every peculiarity or deviation from the normal Standard in each particular region. For example: If the man has received at any time a blow upon the head, with a resulting cicatrix or slight depression, let it be noted thus: 'Cicatrix and slight depression upon the right parietal protuberance.'"

"Scars upon any part of the person should be noted, and the cause assigned by the man, recorded. It is not uncommon to find marks of free cupping upon the chests of Germans, without there being any indication of disease. These however should be noted."

"If, upon inspection, the man be found to have a Circocele, though not sufficient to disqualify, let it be noted under the proper head; and so of Hæmorrhoids or any other affection. The vaccine scar and its position should be noted, and whether vaccination has been practised at the rendezvous or depot."

"Under the head of 'Remarks,' Constitutional Syphilis, or other Cachexia, will find a place. If an interpreter is required during the inspection, that fact should be recorded. Men sometimes speak English very well when first examined, who, from after considerations, are entirely ignorant of the language when re-examined, and sometimes succeed in obtaining a discharge in consequence."

"By this means an accurate description of the whole person is obtained, sufficient to settle questions of identity, should such be subsequently raised; and if there be any defects about which a difference of opinion may exist, the [illegible] such doubtful defects were not overlooked by the first inspecting Surgeon, or his assistant."

"It will frequently happen that an 'absolute disqualification' will be discovered before completing the examination. Such a defect may be detected at any stage of the inspection. In such cases it will of course be unnecessary to proceed any further."

"The above Form, when filled up, should be sent with the Recruit to the Depot where he is to be finally inspected, and thence transmitted to the Regiment to which he may be assigned."

"Defects discovered at the Depot upon reinspection should be endorsed upon the Form, and signed by the Surgeon; in case of Rejection, the documents thus completed should be transmitted with the proceedings of the Board of Inspection to the Adjutant General of the Army."

MODE OF EXAMINING A RECRUIT.

(From Tripler's Manual.)

"The Room in which this examination is conducted should be well lighted and large enough to admit of the men being walked about freely, that every organ concerned in locomotion may be subjected to inspection. For obvious reasons, none others than they whose presence is absolutely required, should be admitted to the room."

"The person of the Recruit should be washed clean before he is presented to the Surgeon for *inspection*. It is impossible for the medical officer to ascertain the existence of certain defects that *absolutely disqualify*, when concealed, as they effectually may be, and sometimes are, by incrustations of filth a month old."

"We have remarked that certain defects can be ascertained only by questioning the man himself, and that, in order to avoid all subsequent evasions, the answers to these questions should be recorded on the spot. We shall now suggest a method of effecting this object as well as of making it sure that no important part shall escape inspection through any slip of the memory."

"The Questions should be asked and the man's answers recorded before he is stripped."

"He is then to be divested of *all* his clothing and the examination proceeded with systematically, in the order of regions as indicated in the 'Form.'"

"The Surgeon is to note every peculiarity or deviation from the normal standard in each particular region. For example: If the man has received at any time a blow upon the head with a resulting cicatrix or slight depression, [illegible] it be noted thus: 'Cicatrix and slight depression upon the right [illegible] protuberance.'"

"Scars upon any part of the person should be noted, and the cause assigned by the man, recorded. It is not uncommon to find marks of free cupping upon the shoulders of Germans, without there being any indication of disease; [illegible] however should be noted."

"If, upon inspection, the man be found to have a Circocele, through not sufficient to disqualify, let it be noted under the proper head; and so of [illegible]ocele or any other affection. The vaccine scar and its position [illegible] be noted, and whether vaccination has been practised at the [illegible] are absent."

"Under the head of 'Remarks,' Constitutional Syphilis, or other Cachexia, will find a place. If an interpreter is required during the inspection, [illegible] be recorded. Men sometimes speak English very well when [illegible] with, from other considerations, are evidently ignorant of the [illegible] and sometimes resort to it in obtaining a discharge [illegible]."

"[illegible] general description of the whole person is obtained, [illegible] scars, marks of identity, should such be [illegible]. If any [illegible] be any defects about which a difference of opinion may exist, [illegible] such defects were not considered by the [illegible] inspecting Surgeon [illegible] present."

"It will frequently happen that an 'absolute disqualification' will be discovered in completing the examination. Such a defect may be detected [illegible] of the inspection. In such cases it will of course be unnecessary [illegible] further."

"The Form, when filled up, should be sent with the Recruit to the [illegible] to be finally inspected, and duties considered in the [illegible] to his being [illegible]."

[illegible] to be examined should be ordered [illegible] part of the duty of [illegible] to see that [illegible] of the examining Surgeon [illegible] of the Surgeon [illegible] of the Army."

MODE OF EXAMINING A RECRUIT.

(From Tripler's Manual.)

"The Room in which this examination is conducted should be well lighted and large enough to admit of the men being walked about freely, that every organ concerned in locomotion may be subjected to inspection. For obvious reasons, none others than they whose presence is absolutely required, should be admitted to the room."

"The person of the Recruit should be washed clean before he is presented to the Surgeon for inspection. It is impossible for the medical officer to ascertain the existence of certain defects that *absolutely disqualify*, when concealed, as they effectually may be, and sometimes are, by incrustations of filth a month old."

"We have remarked that certain defects can be ascertained only by questioning the man himself, and that, in order to avoid all subsequent evasions, the answers to these questions should be recorded on the spot. We shall now suggest a method of effecting this object as well as of making it sure that no important part shall escape inspection through any slip of the memory."

"The Questions should be asked and the man's answers recorded before he is stripped."

"He is then to be divested of *all* his clothing and the examination proceeded with systematically, in the order of regions as indicated in the 'Form.'"

"The Surgeon is to note every peculiarity or deviation from the normal Standard in each particular region. For example: If the man has received at any time a blow upon the head with a resulting cicatrix or slight depression, let it be noted thus: 'Cicatrix and slight depression upon the right parietal protuberance.'"

"Scars upon any part of the person should be noted, and the cause assigned by the man, recorded. It is not uncommon to find marks of free cupping upon the chests of Germans, without there being any indication of disease. These however should be noted."

"If, upon inspection, the man be found to have a Cirrocele, though not sufficient to disqualify, let it be noted under the proper head; and so of Hæmorrhoids or any other affection. The vaccine scar and its position should be noted, and whether vaccination has been practised at the rendezvous or depot."

"Under the head of 'Remarks,' Constitutional Syphilis, or other Cachexia, will find a place. If an interpreter is required during the inspection, that fact should be recorded. Men sometimes speak English very well when first examined, who, from after considerations, are entirely ignorant of the language when re-examined, and sometimes succeed in obtaining a discharge in this way."

"By this means an accurate description of the whole person is obtained, sufficient to settle questions of identity, should such be subsequently raised; and if there be any defects about which a difference of opinion may exist, the fact that such defects were not overlooked by the first inspecting Surgeon, will be apparent."

"It will frequently happen that an 'absolute disqualification' will be discovered before completing the examination. Such a defect may be detected at any stage of the inspection. In such cases it will of course be unnecessary to proceed any further."

"The above Form, when filled up, should be sent with the Recruit to the Depot where he is to be finally inspected, and thence transmitted to the Regiment to which he may be assigned."

"Defects discovered at the Depot upon reinspection should be endorsed upon the Form, and signed by the Surgeon; in case of Rejection, the document thus completed should be transmitted with the proceedings of the Board of Inspection to the Adjutant General of the Army."

MODE OF EXAMINING A RECRUIT.

(From Tripler's Manual.)

"The Room in which this examination is conducted should be well lighted and large enough to admit of the men being walked about freely, that every organ concerned in locomotion may be subjected to inspection. For obvious reasons, none others than they whose presence is absolutely required, should be admitted to the room."

"The person of the Recruit should be washed clean before he is presented to the Surgeon for inspection. It is impossible for the medical officer to ascertain the existence of certain defects that *absolutely disqualify*, when concealed, as they effectually may be, and sometimes are, by incrustations of filth a month old."

"We have remarked that certain defects can be ascertained only by questioning the man himself, and that, in order to avoid all subsequent evasions, the answers to these questions should be recorded on the spot. We shall now suggest a method of effecting this object as well as of making it sure that no important part shall escape inspection through any slip of the memory."

"The Questions should be asked and the man's answers recorded before he is stripped."

"He is then to be divested of *all* his clothing and the examination proceeded with systematically, in the order of regions as indicated in the 'Form.'"

"The Surgeon is 'to note every peculiarity or deviation from the normal Standard in each particular region. For example: If the man has received at any time a blow upon the head with a resulting cicatrix or slight depression, let it be noted thus: 'Cicatrix and slight depression upon the right parietal protuberance.'"

"Scars upon any part of the person should be noted, and the cause assigned by the man, recorded. It is not uncommon to find marks of free cupping upon the chests of Germans, without there being any indication of disease. These however should be noted."

"If, upon inspection, the man be found to have a Circocele, though not sufficient to disqualify, let it be noted under the proper head; and so of Hæmorrhoids or any other affection. The vaccine scar and its position should be noted, and whether vaccination has been practised at the rendezvous or depot."

"Under the head of 'Remarks' Constitutional Syphilis, or other Cachexia, will find a place. If an interpreter is required during the inspection, that fact should be recorded. Men sometimes speak English very well when first examined, who, from after considerations, are entirely ignorant of the language when re-examined, and sometimes succeed in obtaining a discharge in this way."

"By this means an accurate description of the whole person is obtained, sufficient to settle questions of identity, should such be subsequently raised; and if there be any defects about which a difference of opinion may exist, the fact that such defects were not overlooked by the first inspecting Surgeon, will be apparent."

"It will frequently happen that an 'absolute disqualification' will be discovered before completing the examination. Such a defect may be detected at any stage of the inspection. In such cases it will of course be unnecessary to proceed any further."

"The above Form, when filled up, should be sent with the Recruit to the Depot where he is to be finally inspected, and thence transmitted to the Regiment to which he may be assigned."

"Defects discovered at the Depot upon reinspection should be endorsed upon the Form, and signed by the Surgeon; in case of Rejection, the document thus completed should be transmitted with the proceedings of the Board of Inspection to the Adjutant General of the Army."

Recruiting Rendezvous St. Louis Mo

MODE OF EXAMINING A RECRUIT.

(From Tripler's Manual.)

"The Room in which this examination is conducted should be well lighted and large enough to admit of the men being walked about freely, that every organ concerned in locomotion may be subjected to inspection. For obvious reasons, none others than they whose presence is absolutely required, should be admitted to the room."

"The person of the Recruit should be washed *clean* before he is presented to the Surgeon for inspection. It is impossible for the medical officer to ascertain the existence of certain defects that *absolutely disqualify*, when concealed, as they effectually may be, and sometimes are, by incrustations of filth a month old."

"We have remarked that certain defects can be ascertained only by questioning the man himself, and that, in order to avoid all subsequent evasions, the answers to these questions should be recorded on the spot. We shall now suggest a method of effecting this object as well as of making it sure that no important part shall escape inspection through any slip of the memory."

"The Questions should be asked and the man's answers recorded before he is stripped."

"He is then to be divested of *all* his clothing and the examination proceeded with systematically, in the order of regions as indicated in the 'Form.'"

"The Surgeon is to note every peculiarity or deviation from the normal Standard in each particular region. For example: If the man has received at any time a blow upon the head with a resulting cicatrix or slight depression, let it be noted thus: 'Cicatrix and slight depression upon the right parietal protuberance.'"

"Scars upon any part of the person should be noted, and the cause assigned by the man, recorded. It is not uncommon to find marks of free cupping upon the chests of Germans, without there being any indication of disease. These however should be noted."

"If, upon inspection, the man be found to have a Circocele, though not sufficient to disqualify, let it be noted under the proper head; and so of Hæmorrhoids or any other affection. The vaccine scar and its position should be noted, and whether vaccination has been practised at the rendezvous or depot."

"Under the head of 'Remarks,' Constitutional Syphilis, or other Cachexia, will find a place. If an interpreter is required during the inspection, that fact should be recorded. Men sometimes speak English very well when first examined, who, from after considerations, are entirely ignorant of the language when re-examined, and sometimes succeed in obtaining a discharge in this way."

"By this means an accurate description of the whole person is obtained, sufficient to settle questions of identity, should such be subsequently raised; and if there be any defects about which a difference of opinion may exist, the fact that such defects were not overlooked by the first inspecting Surgeon, will be apparent."

"It will frequently happen that an 'absolute disqualification' will be discovered before completing the examination. Such a defect may be detected at any stage of the inspection. In such cases it will of course be unnecessary to proceed any further."

"The above Form, when filled up, should be sent with the Recruit to the Depot where he is to be finally inspected, and thence transmitted to the Regiment to which he may be assigned."

"Defects discovered at the Depot upon reinspection should be endorsed upon the Form, and signed by the Surgeon; in case of Rejection, the document thus completed should be transmitted with the proceedings of the Board of Inspection to the Adjutant General of the Army."

MODE OF EXAMINING A RECRUIT.

(From Tripler's Manual.)

"The Room in which this examination is conducted should be well lighted and large enough to admit of the men being walked about freely, that every organ concerned in locomotion may be subjected to inspection. For obvious reasons, none others than they whose presence is absolutely required, should be admitted to the room."

"The person of the Recruit should be washed *clean* before he is presented to the Surgeon for inspection. It is impossible for the medical officer to ascertain the existence of certain defects that *absolutely disqualify*, when concealed, as they effectually may be, and sometimes are, by incrustations of filth a month old."

"We have remarked that certain defects can be ascertained only by questioning the man himself, and that, in order to avoid all subsequent evasions, the answers to these questions should be recorded on the spot. We shall now suggest a method of effecting this object as well as of making it sure that no important part shall escape inspection through any slip of the memory."

"The Questions should be asked and the man's answers recorded before he is stripped."

"He is then to be divested of *all* his clothing and the examination proceeded with systematically, in the order of regions as indicated in the 'Form.'"

"The Surgeon is to note every peculiarity or deviation from the normal Standard in each particular region. For example: If the man has received at any time a blow upon the head with a resulting cicatrix or slight depression, let it be noted thus: 'Cicatrix and slight depression upon the right parietal protuberance.'"

"Scars upon any part of the person should be noted, and the cause assigned by the man, recorded; it is not uncommon to find marks of free cupping upon the chests of Germans, without there being any indication of disease. These however should be noted."

"If, upon inspection, the man be found to have a Circocele, though not sufficient to disqualify, let it be noted under the proper head; and so of Hæmorrhoids or any other affection. The vaccine scar and its position should be noted, and whether vaccination has been practised at the rendezvous or depot."

"Under the head of 'Remarks,' Constitutional Syphilis, or other Cachexia, will find a place. If an interpreter is required during the inspection, that fact should be recorded. Men sometimes speak English very well when first examined, who, from after considerations, are entirely ignorant of the language when re-examined, and sometimes succeed in obtaining a discharge in this way."

"By this means an accurate description of the whole person is obtained, sufficient to settle questions of identity, should such be subsequently raised; and if there be any defects about which a difference of opinion may exist, the fact that such defects were not overlooked by the first inspecting Surgeon, will be apparent."

"It will frequently happen that an 'absolute disqualification' will be discovered before completing the examination. Such a defect may be detected at any stage of the inspection. In such cases it will of course be unnecessary to proceed any further."

"The above Form, when filled up, should be sent with the Recruit to the Depot where he is to be finally inspected, and thence transmitted to the Regiment to which he may be assigned."

"Defects discovered at the Depot upon reinspection should be endorsed upon the Form, and signed by the Surgeon; in case of Rejection, the document thus completed should be transmitted with the proceedings of the Board of Inspection to the Adjutant General of the Army."

NOTE 1.—This blank will be used for both enlistments and re-enlistments—enlistment of veterans, &c., &c., in the volunteer service. They will be made out in duplicate in all cases—one to accompany the recruiting returns of the superintendent (not the recruiting officer) to the Adjutant General, and one to accompany the account of the officer who pays bounty, &c. The Regiment and Company in which the soldier last served should be given on the back.

NOTE 2.—An enlistment holds to service. A re-enlistment holds to payment of pay, bounty, pension &c. A muster in roll must, in all cases, be filed in the Adjutant General's Office as evidence of muster-in. The muster-in officer, commissary, or assistant commissary of musters, as the case may be, will countersign both enlistments so having mustered the soldier into the service of the United States before either of them is given to the disbursing officer.

MODE OF EXAMINING A RECRUIT.

(From Tripler's Manual.)

"The Room in which this examination is conducted should be well lighted and large enough to admit of the men being walked about freely, that every organ concerned in locomotion may be subjected to inspection. For obvious reasons, none others than they whose presence is absolutely required, should be admitted to the room."

"The person of the Recruit should be washed *clean* before he is presented to the Surgeon for inspection. It is impossible for the medical officer to ascertain the existence of certain defects that *absolutely disqualify*, when concealed, as they effectually may be, and sometimes are, by incrustations of filth a month old."

"We have remarked that certain defects can be ascertained only by questioning the man himself, and that, in order to avoid all subsequent evasions, the answers to these questions should be recorded on the spot. We shall now suggest a method of effecting this object as well as of making it sure that no important part shall escape inspection through any slip of the memory."

"The Questions should be asked and the man's answers recorded before he is stripped."

"He is then to be divested of *all* his clothing and the examination proceeded with systematically, in the order of regions as indicated in the 'Form.'"

"The Surgeon is to note every peculiarity or deviation from the normal Standard in each particular region. For example: If the man has received at any time a blow upon the head with a resulting cicatrix or slight depression, let it be noted thus: 'Cicatrix and slight depression upon the right parietal protuberance.'"

"Scars upon any part of the person should be noted, and the cause assigned by the man, recorded. It is not uncommon to find marks of free cupping upon the chests of Germans, without there being any indication of disease. These however should be noted."

"If, upon inspection, the man be found to have a Chronocele, though not sufficient to disqualify, let it be noted under the proper head; and so of Hemorrhoids or any other affection. The vaccine scar and its position should be noted, and whether vaccination has been practised at the requisite period or degree."

"Under the head of 'Remarks,' Constitutional Syphilis, or other Cachexias, will find a place. If an interpreter is required during the inspection, that fact should be recorded. Men sometimes speak English very well when first examined, who, from after considerations, are entirely ignorant of the language when re-examined, and sometimes succeed in obtaining a discharge in this way."

"By this means an accurate description of the whole person is obtained, sufficient to settle questions of identity, should such be subsequently raised; and if there be any defects about which a difference of opinion may exist, the fact that such defects were not overlooked by the first inspecting Surgeon, will be apparent."

"It will frequently happen that an 'absolute disqualification' will be discovered before completing the examination. Such a defect may be detected at any stage of the inspection. In such cases it will of course be unnecessary to proceed any further."

"The above Form, when filled up, should be sent with the Recruit to the Depot where he is to be finally inspected, and thence transmitted to the Regiment to which he may be assigned."

"Defects discovered at the Depot upon reinspection should be endorsed upon the Form, and signed by the Surgeon; in case of Rejection, the description completed should be transmitted with the proceedings of the Board of Inspection to the Adjutant General of the Army."

NOTE 1.—This blank will be used for both enlistments and re-enlistments—enlistment of veterans, &c., &c., in the volunteer service. They will be made out in duplicate in all cases—one to accompany the recruiting return of the superintendent (not the recruiting officer) to the Adjutant General, and one to accompany the account of the officer who pays bounty, &c. The Regiment and Company in which the soldier last served should be given on the back.

NOTE 2.—All enlistment holds to service. A muster-in must, in all cases, precede payment of pay, bounty, pension, &c. A muster-in roll must, in all cases, be filed in the Adjutant General's Office as evidence of muster. The mustering officer, commissary, or assistant commissary of musters, as the case may be, will countersign both enlistments as having mustered the soldier into the service of the United States before either of them is given to the disbursing officer.

VOLUNTEER ENLISTMENT.

STATE OF Missouri TOWN OF St Louis

I, Richard S Bradfield, born in _____ in the State of Ohio, aged 24 years, and by occupation a Farmer, Do HEREBY ACKNOWLEDGE to have volunteered this Eighteenth day of August, 1864 to serve as a ~~Soldier~~ Private in the Army of the United States of America, for the period of ~~THREE YEARS~~, unless sooner discharged by proper authority: Do also agree to accept such bounty, pay, rations, and clothing, as are, or may be, established by law for volunteers. And I, R S Bradfield, do solemnly swear, that I will bear true faith and allegiance to the United States of America, and that I will serve them honestly and faithfully against all their enemies or opposers whomsoever; and that I will observe and obey the orders of the President of the United States, and the orders of the officers appointed over me, according to the Rules and Articles of War.

Sir:

I beg leave to state the following facts to you, with the accompanying request. Rev. Charles Peabody has recently resigned the Superintendence of the Soldiers' Home in this city. Rev Wm Bradley, recently in the service of this Commission, has been appointed to the Chaplaincy of the 40th Mo. Inft'y Vols, Col. Holmes, Commanding, and been duly mustered into the service. Col. Holmes has, of his own accord, expressed a perfect willingness that Chaplain Bradley should be placed on detached service, and this Commission would be exceedingly obliged, if he could be detailed as Supt of the Soldiers' Home of this city, to fill the vacancy occasioned by the resignation of Rev. Mr Peabody. Such details have been made in other places, the Soldiers' Homes being solely for the benefit of Soldiers. Painter & Gardner Paint Painting &c

MODE OF EXAMINING A RECRUIT.

(From Tripler's Manual.)

"The Room in which this examination is conducted should be well lighted and large enough to admit of the men being walked about freely, that every organ concerned in locomotion may be subjected to inspection. For obvious reasons, none others than they whose presence is absolutely required, should be admitted to the room."

"The person of the Recruit should be washed *clean* before he is presented to the Surgeon for inspection. It is impossible for the medical officer to ascertain the existence of certain defects that *absolutely disqualify*, when concealed, as they effectually may be, and sometimes are, by incrustations of filth a month old."

"We have remarked that certain defects can be ascertained only by questioning the man himself, and that, in order to avoid all subsequent evasions, the answers to these questions should be recorded on the spot. We shall now suggest a method of effecting this object as well as of making it sure that no important part shall escape inspection through any slip of the memory."

"The Questions should be asked and the man's answers recorded before he is stripped."

"He is then to be divested of *all* his clothing and the examination proceeded with systematically, in the order of regions as indicated in the 'Form.'"

"The Surgeon is to note every peculiarity or deviation from the normal Standard in each particular region. For example: If the man has received at any time a blow upon the head with a resulting cicatrix or slight depression, let it be noted thus: 'Cicatrix and slight depression upon the right parietal protuberance.'"

"Scars upon any part of the person should be noted, and the cause assigned by the man, recorded. It is not uncommon to find marks of free cupping upon the chests of Germans without there being any indication of disease. These however should be noted."

"If, upon inspection, the man be found to have a Circocele, though not sufficient to disqualify, let it be noted under the proper head; and so of Hæmorrhoids or any other affection. The vaccine scar and its position should be noted, and whether vaccination has been practised at the rendezvous or depot."

"Under the head of 'Remarks,' Constitutional Syphilis, or other Cachexia, will find a place. If an interpreter is required during the inspection, that fact should be recorded. Men sometimes speak English very well when first examined, who, from after considerations, are entirely ignorant of the language when re-examined, and sometimes succeed in obtaining a discharge in this way."

"By this means an accurate description of the whole person is obtained sufficient to settle questions of identity, should such be subsequently raised, and if there be any defects about which a difference of opinion may exist, the fact that such defects were not ascertained by the first inspecting Surgeon, will be apparent."

"It will frequently happen that an 'absolute disqualification' will be discovered before completing the examination. Such a defect may be detected at any stage of the inspection. In such cases it will of course be unnecessary to proceed any further."

"The above Form, when filled out, should be sent with the Recruit to the Depot where he is to be finally inspected, and thence transmitted to the Regiment to which he may be assigned."

"Defects discovered at the Depot upon inspection should be endorsed upon the Form, and signed by the Surgeon; in case of Rejection, the document thus completed should be transmitted with the proceedings of the Board of Inspection to the Adjutant General of the Army."

MODE OF EXAMINING A RECRUIT.

(From Tripler's Manual.)

"The Room in which this examination is conducted should be well lighted and large enough to admit of the men being walked about freely, that every organ concerned in locomotion may be subjected to inspection. For obvious reasons, none others than they whose presence is absolutely required, should be admitted to the room."

"The person of the Recruit should be washed *clean* before he is presented to the Surgeon for inspection. It is impossible for the medical officer to ascertain the existence of certain defects that *absolutely disqualify*, when concealed, as they effectually may be, and sometimes are, by incrustations of filth a month old."

"We have remarked that certain defects can be ascertained only by questioning the man himself, and that, in order to avoid all subsequent evasions, the answers to these questions should be recorded on the spot. We shall now suggest a method of effecting this object as well as of making it sure that no important part shall escape inspection through any slip of the memory."

"The Questions should be asked and the man's answers recorded before he is stripped."

"He is then to be divested of *all* his clothing and the examination proceeded with systematically, in the order of regions as indicated in the 'Form.'"

"The Surgeon is to note every peculiarity or deviation from the normal standard in each particular region. For example: If the man has received at any time a blow upon the head with a resulting cicatrix or slight depression, let it be noted thus: 'Cicatrix and slight depression upon the right parietal protuberance.'"

"Scars upon any part of the person should be noted, and the cause assigned by the man, recorded. It is not uncommon to find marks of free cupping upon the chests of Germans, without there being any indication of disease. These however should be noted."

"If, upon inspection, the man be found to have a Circocele, though not sufficient to disqualify, let it be noted under the proper head; and so of Hæmorrhoids or any other affection. The vaccine scar and its position should be noted, and whether vaccination has been practised at the rendezvous or depot."

"Under the head of 'Remarks,' Constitutional Syphilis, or other Cachexia, will find a place. If an interpreter is required during the inspection, that fact should be recorded. Men sometimes speak English very well when first examined, who, from after considerations, are entirely ignorant of the language when re-examined, and sometimes succeed in obtaining a discharge in this way."

"By this means an accurate description of the whole person is obtained, sufficient to settle questions of identity, should such be subsequently raised; and if there be any defects about which a difference of opinion may exist, the fact that such defects were not overlooked by the first inspecting Surgeon, will be apparent."

"It will frequently happen that an 'absolute disqualification' will be discovered before completing the examination. Such a defect may be detected at any stage of the inspection. In such cases it will of course be unnecessary to proceed any farther."

"The above Form, when filled up, should be sent with the Recruit to the Depot where he is to be finally inspected, and thence transmitted to the Regiment to which he may be assigned."

"Defects discovered at the Depot upon reinspection should be endorsed upon the Form, and signed by the Surgeon; in case of Rejection, the documents thus completed should be transmitted with the proceedings of the Board of Inspection to the Adjutant General of the Army."

"The Room in which this examination is conducted should be well lighted and large enough to admit of the man being walked about freely, that every organ concerned in locomotion may be subjected to inspection. For obvious reasons, none others than they whose presence is absolutely required, should be admitted to the room."

"The person of the Recruit should be washed *clean* before he is presented to the Surgeon for inspection. It is impossible for the medical officer to ascertain the existence of certain defects that *absolutely disqualify*, when concealed, as they effectually may be, and sometimes are, by incrustations of filth a month old."

"We have remarked that certain defects can be ascertained only by questioning the man himself, and that, in order to avoid all subsequent evasions, the answers to these questions should be recorded on the spot. We shall now suggest a method of effecting this object as well as of making it sure that no important part shall escape inspection through any slip of the memory."

"The Questions should be asked and the men's answers recorded before he is stripped."

"He is then to be divested of *all* his clothing and the examination proceeded with systematically, in the order of regions as indicated in the 'Form.'"

"The Surgeon is to note every peculiarity or deviation from the normal Standard in each particular region. For example: If the man has received at any time a blow upon the head with a resulting cicatrix or slight depression, let it be noted thus: 'Cicatrix and slight depression upon the right parietal protuberance.'"

"Scars upon any part of the person should be noted, and the cause assigned by the man, recorded. It is not uncommon to find marks of free cupping upon the chests of Germans, without there being any indication of disease. These however should be noted."

"If, upon inspection, the man be found to have a Circocele, though not sufficient to disqualify, let it be noted under the proper head, and so of Hæmorrhoids or any other affection. The vaccine scar and its position should be noted, and whether vaccination has been practised at the rendezvous or depot."

"Under the head of 'Remarks,' Constitutional Syphilis, or other Cachexia, will find a place. If an interpreter is required during the examination, that fact should be recorded. Men sometimes speak English very well when first examined, who, from after considerations, are entirely ignorant of the language when re-examined, and sometimes succeed in obtaining a discharge in this way."

"By this means an accurate description of the whole person is obtained, sufficient to settle questions of identity, should such be subsequently raised; and if there be any defects about which a difference of opinion may exist, the fact that such defects were not overlooked by the first inspecting Surgeon, will be apparent."

"It will frequently happen that an 'absolute disqualification' will be discovered before completing the examination. Such a defect may be detected at any stage of the inspection. In such cases it will of course be unnecessary to proceed any further."

MODE OF EXAMINING A RECRUIT.

(From Tripler's Manual.)

"The Room in which this examination is conducted should be well lighted and large enough to admit of the men being walked about freely, that every organ concerned in locomotion may be subjected to inspection. For obvious reasons, none others than they whose presence is absolutely required, should be admitted to the room."

"The person of the Recruit should be washed *clean* before he is presented to the Surgeon for inspection. It is impossible for the medical officer to ascertain the existence of certain defects that *absolutely disqualify*, when concealed, as they effectually may be, and sometimes are, by incrustations of filth a month old."

"We have remarked that certain defects can be ascertained only by questioning the man himself, and that, in order to avoid all subsequent evasions, the answers to these questions should be recorded on the spot. We shall now suggest a method of effecting this object as well as of making it sure that no important part shall escape inspection through any slip of the memory."

"The Questions should be asked and the man's answers recorded before he is stripped."

"He is then to be divested of *all* his clothing and the examination proceeded with systematically, in the order of regions as indicated in the 'Form.'"

"The Surgeon is to note every peculiarity or deviation from the normal Standard in each particular region. For example: If the man has received at any time a blow upon the head with a resulting cicatrix or slight depression, let it be noted thus: 'Cicatrix and slight depression upon the right parietal protuberance.'"

"Scars upon any part of the person should be noted, and the cause assigned by the man, recorded. It is not uncommon to find marks of free cupping upon the chests of Germans, without there being any indication of disease. These however should be noted."

"If, upon inspection, the man be found to have a Circocele, though not sufficient to disqualify, let it be noted under the proper head; and so of Hæmorrhoids or any other affection. The vaccine scar and its position should be noted, and whether vaccination has been practised at the rendezvous or depot."

"Under the head of 'Remarks,' Constitutional Syphilis, or other Cachexia, will find a place. If an interpreter is required during the inspection, that fact should be recorded. Men sometimes speak English very well when first examined, who, from after considerations, are entirely ignorant of the language when re-examined, and sometimes succeed in obtaining a discharge in this way."

"By this means an accurate description of the whole person is obtained, sufficient to settle questions of identity, should such be subsequently raised; and if there be any defects about which a difference of opinion may exist, the fact that such defects were not overlooked by the first inspecting Surgeon, will be apparent."

"It will frequently happen that an 'absolute disqualification' will be discovered before completing the examination. Such a defect may be detected at any stage of the inspection. In such cases it will of course be unnecessary to proceed any further."

"The above Form, when filled up, should be sent with the Recruit to the Depot where he is to be finally inspected, and thence transmitted to the Regiment to which he may be assigned."

"Defects discovered at the Depot upon reinspection should be endorsed upon the Form, and signed by the Surgeon; in case of Rejection, the document thus completed should be transmitted with the proceedings of the Board of Inspection to the Adjutant General of the Army."

MODE OF EXAMINING A RECRUIT.

(From Tripler's Manual.)

"The Room in which this examination is conducted should be well lighted and large enough to admit of the men being walked about freely, that every organ concerned in locomotion may be subjected to inspection. For obvious reasons, none others than they whose presence is absolutely required, should be admitted to the room."

"The person of the Recruit should be washed *clean* before he is presented to the Surgeon for inspection. It is impossible for the medical officer to ascertain the existence of certain defects that *absolutely disqualify*, when concealed, as they effectually may be, and sometimes are, by incrustations of but a month old."

"We have remarked that certain defects can be ascertained only by questioning the man himself, and that, in order to avoid all subsequent evasions, the answers to these questions should be recorded on the spot. We shall now suggest a method of effecting this object as well as of making it sure that no important part shall escape inspection through any slip of the memory."

"The Questions should be asked and the man's answers recorded before he is stripped."

"He is then to be divested of *all* his clothing and the examination proceeded with systematically, in the order of regions as indicated in the 'Form.'"

"The Surgeon is to note every peculiarity or deviation from the normal Standard in each particular region. For example: If the man has received at any time a blow upon the head with a resulting cicatrix or slight depression, let it be noted thus: 'Cicatrix and slight depression upon the right parietal protuberance.'"

"Scars upon any part of the person should be noted, and the cause assigned by the man recorded. It is not uncommon to find marks of free cupping upon the chests of Germans, without there being any indication of disease. These however should be noted."

"If, upon examination, the man be found to have a Circocele, though not sufficient to disqualify, let it be noted under the proper head; and so of Hemorrhoids or any other affection. The vaccine scar and its position should be noted, and whether vaccination has been practised at the rendezvous or depot."

"Under the head of 'Remarks,' Constitutional Syphilis, or other Cachexia, will find a place. If an interpreter is required during the inspection, that fact should be recorded. Men sometimes speak English very well when first examined, who, from after considerations, are entirely ignorant of the language when re-examined, and sometimes succeed in obtaining a discharge in this way."

"By these means an accurate description of the whole person is obtained, sufficient to settle questions of identity, should such be subsequently raised; and if there be any defects about which a difference of opinion may exist, the fact that such defects were not overlooked by the first inspecting Surgeon, will be apparent."

"It will frequently happen that an 'absolute disqualification' will be discovered before completing the examination. Such a defect may be detected at any stage of the inspection. In such cases it will of course be unnecessary to proceed any further."

"The above Form, when filled up, should be sent with the Recruit to the Depot where he is to be finally inspected, and thence transmitted to the Regiment to which he may be assigned."

"Defects discovered at the Depot upon reinspection should be endorsed upon the Form, and signed by the Surgeon; in case of Rejection, the document thus completed should be transmitted with the proceedings of the Board of Inspection to the Adjutant General of the Army."

Head Quarters, St. Louis District, Mo.

Medical Director's Office.

St. Louis, Mo., March 8th 1863.

This is to certify that I have carefully examined Sergeant James D. Brown of Co. G. 40th Missouri Inft. Vols. Now on duty at these Head Quarters as a Clerk, and find him unfit for field service.

At the battle of Stone River Tenn. on Dec. 31st 1862. he received a gun shot wound of the right leg, injuring, but not fracturing the tibia, about four inches above the ankle joint. Disease of the bone, with continued ulceration has followed, which totally unfits him for marching.

He is a fit subject for, and ought to be transferred to the Veteran Reserve Corps.

VOLUNTEER ENLISTMENT.

STATE OF Missouri TOWN OF St Louis

I, James D Brown, born in Mecklenburg in the State of North Carolina, aged 23 years, and by occupation a Miller, Do HEREBY ACKNOWLEDGE to have volunteered this Twenty seventh day of August, 1864; to serve as a **Soldier** in the **Army of the United States of America**, for the period of ~~Three~~ ONE YEAR, unless sooner discharged by proper authority: Do also agree to accept such bounty, pay, rations, and clothing, as are, or may be, established by law for volunteers. And I, James D Brown, do solemnly swear, that I will bear true faith and allegiance to the ***United States of America***, and that I will serve them honestly and faithfully against all their enemies or opposers whomsoever; and that I will observe and obey the orders of the President of the United States, and the orders of the officers appointed over me, according to the Rules and Articles of War.

MODE OF EXAMINING A RECRUIT.

(From Tripler's Manual.)

"The Room in which this examination is conducted should be well lighted and large enough to admit of the men being walked about freely, that every organ concerned in locomotion may be subjected to inspection. For obvious reasons, none others than they whose presence is absolutely required, should be admitted to the room."

"The person of the Recruit should be washed *clean* before he is presented to the Surgeon for inspection. It is impossible for the medical officer to ascertain the existence of certain defects that *absolutely disqualify*, when concealed, as they effectually may be, and sometimes are, by incrustations of filth a month old."

"We have remarked that certain defects can be ascertained only by questioning the man himself, and that, in order to avoid all subsequent evasions, the answers to these questions should be recorded on the spot. We shall now suggest a method of effecting this object as well as of making it sure that no important part shall escape inspection through any slip of the memory."

"The Questions should be asked and the man's answers recorded before he is stripped."

"He is then to be divested of *all* his clothing and the examination proceeded with systematically, in the order of regions as indicated in the 'Form.'"

"The Surgeon is to note every peculiarity or deviation from the normal Standard in each particular region. For example: If the man has received at any time a blow upon the head with a resulting cicatrix or slight depression, let it be noted thus: 'Cicatrix and slight depression upon the right parietal protuberance.'"

"Scars upon any part of the person should be noted, and the cause assigned by the man, recorded. It is not uncommon to find marks of free cupping upon the chests of Germans, without there being any indication of disease. These however should be noted."

"If, upon inspection, the man be found to have a Circocele, though not sufficient to disqualify, let it be noted under the proper head; and so of Hæmorrhoids or any other affection. The vaccine scar and its position should be noted, and whether vaccination has been practised at the rendezvous or depot."

"Under the head of 'Remarks,' Constitutional Syphilis, or other Cachexia, will find a place. If an interpreter is required during the inspection, that fact should be recorded. Men sometimes speak English very well when first examined, who, from after considerations, are entirely ignorant of the language when re-examined, and sometimes succeed in obtaining a discharge in this way."

"By this means an accurate description of the whole person is obtained, sufficient to settle questions of identity, should such be subsequently raised; and if there be any defects about which a difference of opinion may exist, the fact that such defects were not overlooked by the first inspecting Surgeon, will be apparent."

"It will frequently happen that an 'absolute disqualification' will be discovered before completing the examination. Such a defect may be detected at any stage of the inspection. In such cases it will of course be unnecessary to proceed any further."

"The above Form, when filled up, should be sent with the Recruit to the Depot where he is to be finally inspected, and thence transmitted to the Regiment to which he may be assigned."

"Defects discovered at the Depot upon reinspection should be endorsed upon the Form, and signed by the Surgeon; in case of Rejection, the document thus completed should be transmitted with the proceedings of the Board of Inspection to the Adjutant General of the Army."

VOLUNTEER ENLISTMENT.

STATE OF Missouri TOWN OF St Louis

I, John Brown, born in St Louis in the State of Missouri, aged 20 years, and by occupation a Carpenter, Do HEREBY ACKNOWLEDGE to have volunteered this 20th day of August 1864 to serve as a **Soldier** in the **Army of the United States of America**, for the period of ONE YEAR, unless sooner discharged by proper authority: Do also agree to accept such bounty, pay, rations, and clothing, as are, or may be, established by law for volunteers. And I John Brown, do solemnly swear, that I will bear true faith and allegiance to the ***United States of America***, and that I will serve them honestly and faithfully against all their enemies or opposers whomsoever; and that I will observe and obey the orders of the President of the United States, and the orders of the officers appointed over me, according to the Rules and Articles of War.

Sworn and subscribed to, at St Louis Mo } John Brown
this 20 day of August, 1864,
BEFORE William Keplin
Clerk of the Peace

I CERTIFY, ON HONOR, That I have carefully examined the above-named Volunteer, agreeably to the General Regulations of the Army, and that, in my opinion, he is free from all bodily defects and mental infirmity, which would in any way disqualify him from performing the duties of a soldier.

EXAMINING SURGEON.

I CERTIFY, ON HONOR, That I have minutely inspected the Volunteer John Brown previously to his enlistment, and that he was entirely sober when enlisted; that, to the best of my judgment and belief, he is of lawful age; and that, in accepting him as duly qualified to perform the duties of an able-bodied soldier, I have strictly observed the Regulations which govern the recruiting service. This soldier has blue eyes, light hair, fair complexion, is five feet six inches high.

MODE OF EXAMINING A RECRUIT.

(From Tripler's Manual.)

"The Room in which this examination is conducted should be well lighted and large enough to admit of the men being walked about freely, that every organ concerned in locomotion may be subjected to inspection. For obvious reasons, none others than they whose presence is absolutely required, should be admitted to the room."

"The person of the Recruit should be washed clean before he is presented to the Surgeon for inspection. It is impossible for the medical officer to ascertain the existence of certain defects that *absolutely disqualify*, when concealed, as they effectually may be, and sometimes are, by incrustations of filth a month old."

"We have remarked that certain defects can be ascertained only by questioning the man himself, and that, in order to avoid all subsequent evasions, the answers to these questions should be recorded on the spot. We shall now suggest a method of effecting this object as well as of making it sure that no important part shall escape inspection through any slip of the memory."

"The Questions should be [illegible] and the man's answers recorded before he is stripped."

"He is then to be divested of all his clothing and the examination proceeded with systematically, in the [illegible] regions as indicated in the 'Form.'"

"The Surgeon is to note every peculiarity or deviation from the normal Standard in each particular region. For example: If the man has received at any time a blow upon the head with a resulting cicatrix or slight depression, let it be noted thus: 'Cicatrix and slight depression upon the right parietal protuberance.'"

"Scars upon any part of the person should be noted, and the cause assigned by the man, recorded. It is not uncommon to find marks of free cupping upon the chests of Germans, without there being any indication of disease. These however should be noted."

"If, upon inspection, the man be found to have a Circocele, though not sufficient to disqualify, let it be noted under the proper head; and so of Hæmorrhoids or any other affection. The vaccine scar and its position should be noted, and whether vaccination has been practised at the rendezvous or depot."

"Under the head of 'Remarks,' Constitutional Syphilis, or other Cachexia, will find a place. If an interpreter is required during the inspection, that fact should be recorded. Men sometimes speak English very well when first examined, who, from after considerations, are entirely ignorant of the language when re-examined, and sometimes succeed in obtaining a discharge in this way."

"By this means an accurate description of the whole person is obtained, sufficient to settle questions of identity, should such be subsequently raised; and if there be any defects about which a difference of opinion may exist, the fact that such defects were not overlooked by the first inspecting Surgeon, will be apparent."

"It will frequently happen that an 'absolute disqualification' will be discovered before completing the examination. Such a defect may be detected at any stage of the inspection. In such cases it will of course be unnecessary to proceed any further."

"The above Form, when filled up, should be sent with the Recruit to the Depot where he is to be finally inspected, and thence transmitted to the Regiment to which he may be assigned."

"Defects discovered at the Depot upon reinspection should be endorsed upon the Form, and signed by the Surgeon; in case of Rejection, the document thus completed should be transmitted with the proceedings of the Board of Inspection to the Adjutant General of the Army."

MODE OF EXAMINING A RECRUIT.

(From Tripler's Manual.)

"The Room in which this examination is conducted should be well lighted and large enough to admit of the men being walked about freely, that every organ concerned in locomotion may be subjected to inspection. For obvious reasons, none others than they whose presence is absolutely required, should be admitted to the room."

"The person of the Recruit should be washed *clean* before he is presented to the Surgeon for inspection. It is impossible for the medical officer to ascertain the existence of certain defects that *absolutely disqualify*, when concealed, as they effectually may be, and sometimes are, by incrustations of filth a month old."

"We have remarked that certain defects can be ascertained only by questioning the man himself, and that, in order to avoid all subsequent evasions, the answers to these questions should be recorded on the spot. We shall now suggest a method of effecting this object as well as of making it sure that no important part shall escape inspection through any slip of the memory."

"The Questions should be asked and the man's answers recorded before he is stripped."

"He is then to be divested of *all* his clothing and the examination proceeded with systematically, in the order of regions as indicated in the 'Form.'"

"The Surgeon is to note every peculiarity or deviation from the normal Standard in each particular region. For example: If the man has received at any time a blow upon the head with a resulting cicatrix or slight depression, let it be noted thus: 'Cicatrix and slight depression upon the right parietal protuberance.'"

"Scars upon any part of the person should be noted, and the cause assigned by the man, recorded. It is not uncommon to find marks of free cupping upon the chests of Germans, without there being any indication of disease. These however should be noted."

"If, upon inspection, the man be found to have a Circocele, though not sufficient to disqualify, let it be noted under the proper head; and so of Hæmorrhoids or any other affection. The vaccine scar and its position should be noted, and whether vaccination has been practised at the rendezvous or depot."

"Under the head of 'Remarks,' Constitutional Syphilis, or other Cachexia, will find a place. If an interpreter is required during the inspection, that fact should be recorded. Men sometimes speak English very well when first examined, who, from after considerations, are entirely ignorant of the language when re-examined, and sometimes succeed in obtaining a discharge in this way."

"By this means an accurate description of the whole person is obtained, sufficient to settle questions of identity, should such be subsequently raised; and if there be any defects about which a difference of opinion may exist, the fact that such defects were not overlooked by the first inspecting Surgeon, will be apparent."

"It will frequently happen that an 'absolute disqualification' will be discovered before completing the examination. Such a defect may be detected at any stage of the inspection. In such cases it will of course be unnecessary to proceed any further."

"The above Form, when filled up, should be sent with the Recruit to the Depot where he is to be finally inspected, and thence transmitted to the Regiment to which he may be assigned."

"Defects discovered at the Depot upon reinspection should be endorsed upon the Form, and signed by the Surgeon; in case of Rejection, the document thus completed should be transmitted with the proceedings of the Board of Inspection to the Adjutant General of the Army."

MODE OF EXAMINING A RECRUIT.

(From Tripler's Manual.)

"The Room in which this examination is conducted should be well lighted and large enough to admit of the men being walked about freely, that every organ concerned in locomotion may be subjected to inspection. For obvious reasons, none others than they whose presence is absolutely required, should be admitted to the room."

"The person of the Recruit should be washed *clean* before he is presented to the Surgeon for inspection. It is impossible for the medical officer to ascertain the existence of certain defects that *absolutely disqualify*, when concealed, as they effectually may be, and sometimes are, by incrustations of filth a month old."

"We have remarked that certain defects can be ascertained only by questioning the man himself, and that, in order to avoid all subsequent evasions, the answers to these questions should be recorded on the spot. We shall now suggest a method of effecting this object as well as of making it sure that no important part shall escape inspection through any slip of the memory."

"The Questions should be asked and the man's answers recorded before he is stripped."

"He is then to be divested of *all* his clothing and the examination proceeded with systematically, in the order of regions as indicated in the 'Form.'"

"The Surgeon is to note every peculiarity or deviation from the normal Standard in each particular region. For example: If the man has received at any time a blow upon the head with a resulting cicatrix or slight depression, let it be noted thus: 'Cicatrix and slight depression upon the right parietal protuberance.'"

"Scars upon any part of the person should be noted, and the cause assigned by the man, recorded. It is not uncommon to find marks of free cupping upon the chests of Germans, without there being any indication of disease. These however should be noted."

"If, upon inspection, the man be found to have a Circocele, though not sufficient to disqualify, let it be noted under the proper head, and so of Hæmorrhoids or any other affection. The vaccine scar and its position should be noted, and whether vaccination has been practised at the rendezvous or depot."

"Under the head of 'Remarks,' Constitutional Syphilis, or other Cachexia, will find a place. If an interpreter is required during the inspection, that fact should be recorded. Men sometimes speak English very well when first examined, who, from after considerations, are entirely ignorant of the language when re-examined, and sometimes succeed in obtaining a discharge in this way."

"By this means an accurate description of the whole person is obtained, sufficient to settle questions of identity, should such be subsequently raised; and if there be any defects about which a difference of opinion may exist, the fact that such defects were not overlooked by the first inspecting Surgeon, will be apparent."

"It will frequently happen that an 'absolute disqualification' will be discovered before completing the examination. Such a defect may be detected at any stage of the inspection. In such cases it will of course be unnecessary to proceed any further."

"The above Form, when filled up, should be sent with the Recruit to the Depot where he is to be finally inspected, and thence transmitted to the Regiment to which he may be assigned."

"Defects discovered at the Depot upon reinspection should be endorsed upon the Form, and signed by the Surgeon; in case of Rejection, the document thus completed should be transmitted with the proceedings of the Board of Inspection to the Adjutant General of the Army."

NOTE 1.—This blank will be used for both enlistments and re-enlistments—enlistment of veteran, &c., &c., in the volunteer service. They will be made out in duplicate in all cases—one to accompany the recruiting report of the superintendent (not the recruiting officer) to the Adjutant General, and one to accompany the account of the officer who pays bounty, &c. The Regiment and Company to which the soldier last served should be given on the back.

NOTE 2.—An enlistment holds to service. A muster-in must, in all cases, precede payment of pay, bounty, pension, &c. A muster-in roll must, in all cases, be filed in the Adjutant General's Office as evidence of muster-in. The mustering officer, commissary, or assistant commissary of musters, as the case may be, will countersign both enlistments as having mustered the soldier into the service of the United States before either of them is given to the enlisting officer.

MODE OF EXAMINING A RECRUIT.

(From Tripler's Manual.)

"The Room in which this examination is conducted should be well lighted and large enough to admit of the men being walked about freely, that every organ concerned in locomotion may be subjected to inspection. For obvious reasons, none others than they whose presence is absolutely required, should be admitted to the room."

"The person of the Recruit should be washed *clean* before he is presented to the Surgeon for inspection. It is impossible for the medical officer to ascertain the existence of certain defects that *absolutely disqualify*, when concealed, as they effectually may be, and sometimes are, by incrustations of filth a month old."

"We have remarked that certain defects can be ascertained only by questioning the man himself, and that, in order to avoid all subsequent evasions, the answers to these questions should be recorded on the spot. We shall now suggest a method of effecting this object as well as of making it sure that no important part shall escape inspection through any slip of the memory."

"The Questions should be asked and the man's answers recorded before he is stripped."

"He is then to be divested of *all* his clothing and the examination proceeded with systematically, in the order of regions as indicated in the 'Form.'"

"The Surgeon is to note every peculiarity or deviation from the normal Standard in each particular region. For example: If the man has received at any time a blow upon the head with a resulting cicatrix or slight depression, let it be noted thus: 'Cicatrix and slight depression upon the right parietal protuberance.'"

"Scars upon any part of the person should be noted, and the cause assigned by the man, recorded. It is not uncommon to find marks of free cupping upon the chests of Germans, without there being any indication of disease. These however should be noted."

"If, upon inspection, the man be found to have a Circocele, though not sufficient to disqualify, let it be noted under the proper head; and so of Hæmorrhoids or any other affection. The vaccine scar and its position should be noted, and whether vaccination has been practised at the rendezvous or depot."

"Under the head of 'Remarks,' Constitutional Syphilis, or other Cachexia, will find a place. If an interpreter is required during the inspection, that fact should be recorded. Men sometimes speak English very well when first examined who, from after considerations, are entirely ignorant of the language when re-examined, and sometimes succeed in obtaining a discharge in this way."

"By this means an accurate description of the whole person is obtained, sufficient to settle questions of identity, should such be subsequently raised; and if there be any defects about which a difference of opinion may exist, the fact that such defects were not overlooked by the first inspecting Surgeon, will be apparent."

"It will frequently happen that an 'absolute disqualification' will be discovered before completing the examination. Such a defect may be detected at any stage of the inspection. In such cases it will of course be unnecessary to proceed any further."

"The above Form, when filled up, should be sent with the Recruit to the Depot where he is to be finally inspected, and thence transmitted to the Regiment to which he may be assigned."

"Defects discovered at the Depot upon reinspection should be endorsed upon the Form, and signed by the Surgeon; in case of Rejection, the document thus completed should be transmitted with the proceedings of the Board of Inspection to the Adjutant General of the Army."

MODE OF EXAMINING A RECRUIT.

(From Tripler's Manual.)

"The Room in which this examination is conducted should be well lighted and large enough to admit of the men being walked about freely, that every organ concerned in locomotion may be subjected to inspection. For obvious reasons, none others than they whose presence is absolutely required, should be admitted to the room."

"The person of the Recruit should be washed clean before he is presented to the Surgeon for inspection. It is impossible for the medical officer to ascertain the existence of certain defects that *absolutely disqualify*, when concealed, as they effectually may be, and sometimes are, by incrustations of dirt a month old."

"We have remarked that certain defects can be ascertained only by questioning the man himself, and that, in order to avoid all subsequent evasions, the answers to these questions should be recorded on the spot. We shall now suggest a method of effecting this object as well as of making it sure that no important part shall escape inspection through any slip of the memory."

"The Questions should be asked and the man's answers recorded before he is stripped."

"He is then to be divested of *all* his clothing and the examination proceeded with systematically, in the order of regions as indicated in the 'Form.'"

"The Surgeon is to note every peculiarity or deviation from the normal Standard in each particular region. For example: If the man has received at any time a blow upon the head with a resulting cicatrix or slight depression, let it be noted thus: 'Cicatrix and slight depression upon the right parietal protuberance.'"

"Scars upon any part of the person should be noted, and the cause assigned by the man, recorded. It is not uncommon to find marks of free cupping upon the chests of Germans, without there being any indication of disease. These however should be noted."

"If, upon inspection, the man be found to have a Circocele, though not sufficient to disqualify, let it be noted under the proper head; and so of Haemorrhoids or any other affection. The vaccine scar and its position should be noted, and whether vaccination has been practised at the rendezvous or depot."

"Under the head of 'Remarks,' Constitutional Syphilis, or other Cachexia, will find a place. If an interpreter is required during the inspection, that fact should be recorded. Men sometimes speak English very well when first examined, who, from after considerations, are entirely ignorant of the language when re-examined, and sometimes succeed in obtaining a discharge in this way."

"By this means an accurate description of the whole person is obtained, sufficient to settle questions of identity, should such be subsequently raised; and if there be any defects about which a difference of opinion may exist, the fact that such defects were not overlooked by the first inspecting Surgeon, will be apparent."

"It will frequently happen that an 'absolute disqualification' will be discovered before completing the examination. Such a defect may be detected at any stage of the inspection. In such cases it will of course be unnecessary to proceed any further."

"The above Form, when filled up, should be sent with the Recruit to the Depot where he is to be finally inspected, and thence transmitted to the Regiment to which he may be assigned."

"Defects discovered at the Depot upon reinspection should be endorsed upon the Form, and signed by the Surgeon. In case of Rejection, the document thus completed should be transmitted with the proceedings of the Board of Inspection to the Adjutant General of the Army."

NOTE 1.—This blank will be used for both enlistments and re-enlistments—enlistment of veterans, &c., &c., in the volunteer service. They will be made out in duplicate in all cases—one to accompany the recruiting return of the superintendent (not the recruiting officer) to the Adjutant General, and one to accompany the account of the officer who pays bounty, &c. The Regiment and Company in which the soldier last served should be given on the back.

NOTE 2.—An enlisting holds to service. A muster-in must, in all cases, precede payment of pay, bounty, pension, &c. A muster-in roll must, in all cases, be sent to the Adjutant General's Office as evidence of muster-in. The mustering officer, commissary, or assistant commissary of musters, as the case may be, will countersign both enlistments as having mustered the soldier into the service of the United States before either of them is given to the disbursing officer.

NOTE 1.—This blank will be used for both enlistments and re-enlistments—enlistment of veterans &c., &c., in the volunteer service. They will be made out in duplicate in all cases—one to accompany the recruiting return of the superintendent (not the recruiting officer) to the Adjutant General, and one to accompany the accounts of the officer who pays bounty, &c. The Regiment and Company to which the soldier last served should be given on the back.

NOTE 2.—An enlistment holds to service. A muster-in muds in all cases, muster, bounty, pendon, &c. A muster-in roll must, in all cases, be filed with the Adjutant General's Office as evidence of muster-in. The mustering officer, commanding officer, or assistant commissary of musters, as the case may be, will countersign both enlistments as having mustered the soldier into the service of the United States. Failure of these to be given to the disbursing officer.

MODE OF EXAMINING A RECRUIT.

(From Tripler's Manual.)

"The Room in which this examination is conducted should be well lighted and large enough to admit of the men being walked about freely, that every organ concerned in locomotion may be subjected to inspection. For obvious reasons, none others than they whose presence is absolutely required, should be admitted to the room."

"The person of the Recruit should be washed *clean* before he is presented to the Surgeon for inspection. It is impossible for the medical officer to ascertain the existence of certain defects that *absolutely disqualify*, when concealed, as they effectually may be, and sometimes are, by incrustations of fifte a month old."

"We have remarked that certain defects can be ascertained only by questioning the man himself, and that, in order to avoid all subsequent evasions, the answers to these questions should be recorded on the spot. We shall now suggest a method of effecting this object as well as of making it sure that no important part shall escape inspection through any slip of the memory."

"The Questions should be asked and the man's answers recorded before he is stripped."

"He is then to be divested of *all* his clothing and the examination proceeded with systematically, in the order of regions as indicated in the 'Form.'"

"The Surgeon is to note every peculiarity or deviation from the normal Standard in each particular region. For example: If the man has received at any time a blow upon the head with a resulting cicatrix or slight depression, let it be noted thus: 'Cicatrix and slight depression upon the right parietal protuberance.'"

"Scars upon any part of the person should be noted, and the cause assigned by the man, recorded. It is not uncommon to find marks of free cupping upon the chests of Germans, without there being any indication of disease. These however should be noted."

"If, upon inspection, the man be found to have a Circocele, though not sufficient to disqualify, let it be noted under the proper head; and so of Hæmorrhoids or any other affection. The vaccine scar and its position should be noted, and whether vaccination has been practised at the rendezvous or depot."

"Under the head of 'Remarks,' Constitutional Syphilis, or other Cachexia, will find a place. If an interpreter is required during the inspection, that fact should be recorded. Men sometimes speak English very well when first examined, who, from after considerations, are entirely ignorant of the language when re-examined, and sometimes succeed in obtaining a discharge in this way."

"By this means an accurate description of the whole person is obtained, sufficient to settle questions of identity, should such be subsequently raised; and if there be any defects about which a difference of opinion may exist, the fact that such defects were not overlooked by the first inspecting Surgeon, will be apparent."

"It will frequently happen that an 'absolute disqualification' will be discovered before completing the examination. Such a defect may be detected at any stage of the inspection. In such case it will of course be unnecessary to proceed any further."

"The above Form, when filled up, should be sent with the Recruit to the Depot where he is to be finally inspected, and thence transmitted to the Regiment to which he may be assigned."

"Defects discovered at the Depot upon reinspection should be endorsed upon the Form, and signed by the Surgeon; in case of Rejection, the document thus completed should be transmitted with the proceedings of the Board of Inspection to the Adjutant General of the Army."

MODE OF EXAMINING A RECRUIT.

(From Tripler's Manual.)

"The Room in which this examination is conducted should be well lighted and large enough to admit of the man being walked about freely, that every organ concerned in locomotion may be subjected to inspection. For obvious reasons, none others than they whose presence is absolutely required, should be admitted to the room."

"The person of the Recruit should be washed clean before he is presented to the Surgeon for inspection. It is impossible for the medical officer to ascertain the existence of certain defects that *absolutely disqualify*, when concealed, as they effectually may be, and sometimes are, by incrustations of filth a month old."

"We have remarked that certain defects can be ascertained only by questioning the man himself, and that, in order to avoid all subsequent evasions, the answers to these questions should be recorded on the spot. We shall now suggest a method of effecting this object as well as of making it sure that no important part shall escape inspection through any slip of the memory."

"The Questions should be asked and the man's answers recorded before he is stripped."

"He is then to be divested of *all* his clothing and the examination proceeded with systematically, in the order of regions as indicated in the 'Form.'"

"The Surgeon is to note every peculiarity or deviation from the normal standard in each particular region. For example: If the man has received at any time a blow upon the head with a resulting cicatrix or slight depression, let it be noted thus: 'Cicatrix and slight depression upon the right parietal protuberance.'"

"Scars upon any part of the person should be noted, and the cause assigned by the man, recorded. It is not uncommon to find marks of free cupping upon the chests of Germans, without there being any indication of disease. These however should be noted."

"If, upon inspection, the man be found to have a Circocele, though not sufficient to disqualify, let it be noted under the proper head; and so of Hemorrhoids or any other affection. The vaccine scar and its position should be noted, and whether vaccination has been practised at the rendezvous or depot."

"Under the head of 'Remarks,' Constitutional [illegible] or other Cachexia, will find a place. If an interpreter is required during the inspection, that fact should be recorded. Men sometimes speak English very well when first [illegible] who, from after considerations, are entirely ignorant of the language when re-examined, and sometimes succeed in obtaining a discharge in consequence."

"Only after having an accurate description of the whole person is obtained, and pains taken to settle questions of identity, should such be subsequently raised; and if there be any defects about which a difference of opinion may exist, the fact that such defects were not overlooked by the first inspecting Surgeon, should be noted."

"It will frequently happen that an 'absolute disqualification' will be discovered in completing the examination. Such a defect may be detected at any stage of the inspection. In such cases it will of course be unnecessary to proceed any further."

"The above Form, when filled up, should be sent with the Recruit to the rendezvous for it to be finally inspected, and thence transmitted to the Regiment to which he may be assigned."

"Defects discovered at the Depot upon reinspection should be entered upon this Form, and signed by the Surgeon; in case of Rejection, the document when completed should be transmitted with the proceedings of the Board, [illegible] to the Adjutant General of the Army."

And I, James H. I CERTIFY, ON HONOR, That I have carefully examined the above-named Volunteer, agreeably to the General Regulations of the Army, and that, in my opinion, he is free from all bodily defects and mental infirmity, which would in any way disqualify him from performing the duties of a soldier.

I CERTIFY, ON HONOR, That I have minutely inspected the Volunteer James H Burgess previously to his enlistment, and that he was entirely sober when enlisted; that, to the best of my judgment and belief, he is of lawful age; and that, in accepting him as duly qualified to perform the duties of an able-bodied soldier, I have strictly observed the Regulations which govern the recruiting service. This soldier has Hazel eyes, Light hair, Fair complexion, is Five feet 6 inches high.

MODE OF EXAMINING A RECRUIT.

(From Tripler's Manual.)

"The Room in which this examination is conducted should be well lighted and large enough to admit of the men being walked about freely, that every organ concerned in locomotion may be subjected to inspection. For obvious reasons, none others than they whose presence is absolutely required, should be admitted to the room."

"The person of the Recruit should be washed clean before he is presented to the Surgeon for inspection. It is impossible for the medical officer to ascertain the existence of certain defects that *absolutely disqualify*, when concealed, as they effectually may be, and sometimes are, by incrustations of filth a month old."

"We have remarked that certain defects can be ascertained only by questioning the man himself, and that, in order to avoid all subsequent evasions, the answers to these questions should be recorded on the spot. We shall now suggest a method of effecting this object as well as of making it sure that no important part shall escape inspection through any slip of the memory."

"The Questions should be asked and the man's answers recorded before he is stripped."

"He is then to be divested of all his clothing and the examination proceeded with systematically, in the order of regions as indicated in the 'Form.'"

"The Surgeon is to note every peculiarity or deviation from the normal Standard in each particular region. For example: If the man has received at any time a blow upon the head with a resulting cicatrix or slight depression, let it be noted thus: 'Cicatrix and slight depression upon the right parietal protuberance.'"

"Scars upon any part of the person should be noted, and the cause assigned by the man, recorded. It is not uncommon to find marks of free cupping upon the chests of Germans, without there being any indication of disease. These however should be noted."

"If, upon inspection, the man be found to have a Circocele, though not sufficient to disqualify, let it be noted under the proper head; and so of Hæmorrhoids or any other affection. The vaccine scar and its position should be noted, and whether vaccination has been practised at the rendezvous or depot."

"Under the head of 'Remarks,' Constitutional Syphilis, or other Cachexia, will find a place. If an interpreter is required during the inspection, that fact should be recorded. Men sometimes speak English very well when first examined, who, from after considerations, are entirely ignorant of the language when re-examined, and sometimes succeed in obtaining a discharge in this way."

"By this means an accurate description of the whole person is obtained, sufficient to settle questions of identity, should such be subsequently raised; and if there be any defects about which a difference of opinion may exist, the fact that such defects were not overlooked by the first Inspecting Surgeon, will be apparent."

"It will frequently happen that an 'absolute disqualification' will be discovered before completing the examination. Such a defect may be detected at any stage of the inspection. In such cases it will of course be unnecessary to proceed any further."

"The above Form, when filled up, should be sent with the Recruit to the Depot where he is to be finally inspected, and thence transmitted to the Regiment to which he may be assigned."

"Defects discovered at the Depot upon reinspection should be endorsed upon the Form, and signed by the Surgeon; in case of Rejection, the document thus completed should be transmitted with the proceedings of the Board of Inspection to the Adjutant General of the Army."

MODE OF EXAMINING A RECRUIT.

(From Tripler's Manual.)

"The Room in which this examination is conducted should be well lighted and large enough to admit of the men being walked about freely, that every organ concerned in locomotion may be subjected to inspection. For obvious reasons, none others than they whose presence is absolutely required, should be admitted to the room."

"The person of the Recruit should be washed *clean* before he is presented to the Surgeon for inspection. It is impossible for the medical officer to ascertain the existence of certain defects that *absolutely disqualify*, when concealed, as they effectually may be, and sometimes are, by incrustations of filth a month old."

"We have remarked that certain defects can be ascertained only by questioning the man himself, and that, in order to avoid all subsequent evasions, the answers to these questions should be recorded on the spot. We shall now suggest a method of effecting this object as well as of making it sure that no important part shall escape inspection through any slip of the memory."

"The Questions should be asked and the man's answers recorded before he is stripped."

"He is then to be divested of *all* his clothing and the examination proceeded with systematically, in the order of regions as indicated in the 'Form.'"

"The Surgeon is to note every peculiarity or deviation from the normal Standard in each particular region. For example: If the man has received at any time a blow upon the head with a resulting cicatrix or slight depression, let it be noted thus: 'Cicatrix and slight depression upon the right parietal protuberance.'"

"Scars upon any part of the person should be noted, and the cause assigned by the man, recorded. It is not uncommon to find marks of free cupping upon the chests of Germans, without there being any indication of disease [illegible]."

"If, upon inspection, the man be found to have a Circocele, though not sufficient to disqualify, let it be noted under the proper head; and so of Hæmorrhoids or any other affection. The vaccine scar and its position should be noted, and whether vaccination has been practised at the rendezvous or depot."

"Under the head of 'Remarks,' Constitutional Syphilis, or other Cachexia, will find a place. If an interpreter is required during the inspection, that fact should be recorded. Men sometimes speak English very well when first examined, who, from after considerations, are entirely ignorant of the language when re-examined, and sometimes succeed in obtaining a discharge in this way."

"By this means an accurate description of the whole person is obtained sufficient to settle questions of identity, should such be subsequently raised; and if there be any defects about which a difference of opinion may exist, the fact that such defects were not overlooked by the first inspecting Surgeon will be apparent."

"It will frequently happen that the 'incipient disqualification' will be discovered before completing the examination. Such a defect may be detected at any stage of the inspection. In such cases it will of course be unnecessary to proceed any further."

"The above Form, when filled up, should be sent with the Recruit to the Depot where he is to be finally inspected, and thence transmitted to the Regiment to which he may be assigned."

"Defects discovered at the Depot upon reinspection should be endorsed upon the Form, and signed by the Surgeon; in case of Rejection, the document thus completed should be transmitted with the proceedings of the Board of Inspection to the Adjutant General of the Army."

State of Kentucky McCracken County
Edward M. Byrd states on oath that he
21. years of age - and when at home resides
in the State of Texas - but is now and for the
last 9 months has been a Soldier in the 40th
Regt Mississippi Volunteers infantry - That
about the 10th day of November last - he with other
United States Soldiers was on the Steam boat
in Government employ - passing from Saint
Louis Mo. to Paducah Ky - and while on
said boat in the Mississippi River between
Cairo & Saint Louis - a difficulty occured
between him and a man man Henry Berlin
in which Berlin struck him in the face with
his fist - and he on his part struck no blow -
That they were separated - and so remained for
some time - when said Berlin returned &
renewed the attack with great violence, putting
affiant in danger of great bodily harm - and
was with blows & violence proceeding to execute his
purpose of vengeance upon him - and he being a
young strong and athletic man much over
the age and strength of affiant - he did as
his only means of defence, use a small
pocket knife - and in his proper & necessary
defence inflicted a small wound or wounds
upon said Berlin - doing him no wanton or
unnecessary damage - - That after said difficulty
said boat kept on and landed at Paducah
Ky - where he was arrested for said offence &

put in the Grand Room - where he yet is,
He denies that he ever had any difficulty
with Capt Anderson or attempted to murder
him or any one else - He denies that he has
committed offence, against either civil
or Military Law - and says that all he
did was to defend himself as every brave
man ought to do - He asked to be discharged
that he may go to his Regt. —
